Statistical Abstract of  
the United States: 2002 122nd Edition

*The National Data Book*

Issued December 2002

**U.S. Department of Commerce**  
**Donald L. Evans,**  
Secretary

**Economics and Statistics  
Administration**  
**Kathleen B. Cooper,**  
Under Secretary for Economic Affairs

**U.S. CENSUS BUREAU**  
**Charles Louis Kincannon,**  
Director

#### SUGGESTED CITATION

U.S. Census Bureau,  
*Statistical Abstract of the  
United States: 2002*  
(122nd Edition)  
Washington, DC, 2001

Library of Congress  
Card No. 4-18089

#### U.S. CENSUS BUREAU

**Charles Louis Kincannon,**  
Director

**Vacant,**  
Deputy Director and  
Chief Operating Officer

**Nancy A. Potok,**  
Principal Associate Director  
and Chief Financial Officer

**Ted A. Johnson,** Associate Director  
for Finance and Administration

**Walter C. Odom,** Chief, Administrative  
and Customer Services Division

#### Acknowledgments

**Lars B. Johanson** was responsible for the technical supervision and coordination of this volume under the general direction of **Glenn W. King**, Chief, Statistical Compendia Branch. Assisting in the research and analytical phases of assigned sections and in the developmental aspects of new tables were **Rosemary E. Clark**, **David J. Fleck**, **Stacey M. Lowe**, and **Jean F. Maloney**. **Catherine Lavender** provided primary editorial assistance. Other editorial assistance was rendered by **Susan Antroinen**, **Deena Grover**, **Kristen Iversen**, **Patricia S. Lancaster**, **Connie Nadzadi**, **Barbara Shugart**, and **Daphanie Smallwood**.

Maps were designed and produced by **Connie Beard** and **Scott Wilcox** of the Cartographic Operations Branch within the Geography Division.

**Greg Carroll**, **Penny Heiston**, **Gloria Davis**, **Shirley Clark**, **Jan Sweeney**, **Patricia Edwards**, and **Arlene C. Butler** of the Administrative and Customer Services Division, **Walter C. Odom**, Chief, provided publications and printing management, graphics design and composition, and editorial review for print and electronic media. General direction and production management were provided by **Gary J. Lauffer**, Chief, Publications Services Branch.

The cooperation of many contributors to this volume is gratefully acknowledged. The source note below each table credits the various government and private agencies that have collaborated in furnishing information for the *Statistical Abstract*. In a few instances, contributors have requested that their data be designated as subject to copyright restrictions, as indicated in the source notes to the tables affected. Permission to use copyright material should be obtained directly from the copyright owner.

# Preface

The *Statistical Abstract of the United States*, published since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source note appearing below each table, and Appendix I, which comprises the Guide to Sources of Statistics, the Guide to State Statistical Abstracts, and the Guide to Foreign Statistical Abstracts.

This volume includes a selection of data from many statistical publications, both government and private. Publications cited as sources usually contain additional statistical detail and more comprehensive discussions of definitions and concepts than can be presented here. Data not available in publications issued by the contributing agency but obtained from unpublished records are identified in the source notes as unpublished data. More information on the subjects covered in the tables so noted may generally be obtained from the source.

Except as indicated, figures are for the United States as presently constituted. Although emphasis in the *Statistical Abstract* is primarily given to national data, many tables present data for regions and individual states and a smaller number for metropolitan areas and cities. Appendix II, Metropolitan Area Concepts and Components, presents explanatory text, a complete current listing and population data for metropolitan statistical areas (MSAs), the primary metropolitan statistical areas (PMSAs), and the consolidated metropolitan statistical areas (CMSAs) defined as of June 30, 1999. Table 30, in Section 1, presents population numbers for MSAs with population of 250,000 or more. Statistics for the Commonwealth of Puerto Rico and for outlying areas of the United States are included in many state tables and are supplemented by information in Section 29.

Additional information for states, cities, counties, metropolitan areas, and other small units, as well as more historical data are available in various supplements to the *Abstract* (see inside back cover).

Statistics in this edition are generally for the most recent year or period available by summer 2002. Each year over 1,400 tables and charts are reviewed and evaluated; new tables and charts of current interest are added, continuing series are updated, and less timely data are condensed or eliminated. Text notes and appendices are revised as appropriate.

*USA Statistics in Brief*, a pocket-size pamphlet highlighting many statistical series in the *Abstract* is available and will be provided along with this edition. Additional copies can be obtained free from U.S. Census Bureau, Customer Service, Call Center, Washington, DC 20233 (telephone 301-763-INFO(4636)). We attempt to update the pamphlet several times during the year. The latest data can be found on our Web site: <<http://www.census.gov/statab/www/brief.html>>.

**Changes in this edition**—This year we have added a new section which includes Census 2000 Sample Data. The 30 new tables in this section include data covering the educational attainment, disability status, ancestry of and language spoken at home by the resident population, as well as household income, poverty and selected housing characteristics. The layout of Appendix III has been revised. In this edition, Appendix III has been organized by the source agency and title of the survey rather than by section and table number in which the survey data appeared, as was the format in earlier editions.

In addition to the above, we have introduced 49 new tables throughout our core sections. These cover a variety of topics including unmarried households, state children's health insurance programs, limitation of activity level caused by chronic

conditions, characteristics of home-schooled students, computer use by children, firearm use offenders, home-based work and flexible schedules by workers, computer use in the workplace, employee benefits in private industry as well as computer and internet use. For a complete list of new tables see Appendix VI, p. 942.

#### **Statistical Abstract on other media—**

The *Abstract* is available on the Internet and on CD-ROM, an enhanced version (except for a few copyrighted tables deleted by the request of source organizations). Our Internet site, <<http://www.census.gov/statab/www>>, contains this 2002 edition and earlier editions of the book, as well as—Statistics in Brief.

The CD-ROM version of the *Abstract* is also available. Information for the CD-ROM is located in the inside back cover.

#### **Statistics for counties and cities—**

Extensive data for counties can be found in the *County and City Data Book: 2000*. It features 191 data items covering everything from age and agriculture to water use and wholesale trade for all states and counties with U.S. totals for comparison. Also included are 103 data items for cities with population of 25,000 or more. The primary sources are Census 2000 and the 1997 Economic Census. Two tables present 11 data items from Census 2000 for all places and MCDs with a population of 2,500 or more.

This publication, as well as selected rankings will be available on our Internet site at <<http://www.census.gov/statab/www/ccdb.html>>. Some data items that appear in the book from private sources are not available on the Internet or CD-ROM versions because we did not receive copyright permission to release the data items in these formats. For a

database with over 5,000 county items, check out USA Counties at <<http://www.census.gov/statab/www/county.html>>.

#### **Statistics for states and metropolitan areas—**Extensive data for the states and metropolitan areas of the United States can be found in the *State and Metropolitan Area Data Book: 1997-98*.

This publication minus some data items, as well as selected rankings of the states and metropolitan areas, is available on our Internet site at <<http://www.census.gov/statab/www/smadb.html>>. The CD-ROM version is also available. See the inside back cover for more information.

**Limitations of the data—**The contents of this volume were taken from many sources. All data from either censuses and surveys or from administrative records are subject to error arising from a number of factors: Sampling variability (for statistics based on samples), reporting errors in the data for individual units, incomplete coverage, nonresponse, imputations, and processing error. (See also Appendix III, pp. 903.) The Census Bureau cannot accept the responsibility for the accuracy or limitations of the data presented here, other than those for which it collects. The responsibility for selection of the material and for proper presentation, however, rests with the Census Bureau.

**For additional information on data presented—**Please consult the source publications available in local libraries or write to the agency indicated in the source notes. Write to the Census Bureau only if it is cited as the source.

**Suggestions and comments—**Users of the Statistical Abstract and its supplements (see inside back cover) are urged to make their data needs known for consideration in planning future editions. Suggestions and comments for improving coverage and presentation of data should be sent to the Director, U.S. Census Bureau, Washington, DC 20233.

Example of Table Structure

No. 301. Immigration and Naturalization Service Enforcement Activities: 1990 to 2000

[For fiscal years ending in year shown. See text, Section 8, State and Local Government Finances and Employment]

Item	Unit	1990	1994	1995	1996	1997	1998	1999	2000
Deportable aliens located. . . . .	1,000 . . . .	1,169.9	1,094.7	1,394.6	1,650.0	1,536.5	1,679.4	1,714.0	1,814.7
Border Patrol . . . . .	1,000 . . . .	1,103.4	1,031.7	1,324.2	1,549.9	1,413.0	1,555.8	1,579.0	1,676.4
Southwestern border . . . . .	1,000 . . . .	(NA)	979.1	1,271.4	1,507.0	1,368.7	1,516.7	1,537.0	1,643.7
Mexican . . . . .	1,000 . . . .	1,054.8	999.9	1,293.5	1,523.1	1,387.7	1,522.9	1,534.5	1,636.9
Canadian . . . . .	1,000 . . . .	5.7	3.4	3.5	2.7	2.9	2.3	2.7	2.2
Other . . . . .	1,000 . . . .	42.8	28.4	27.2	24.0	22.4	30.5	41.8	37.3
Number of seizures by									
Border Patrol . . . . .	Number . . . .	17,275	9,134	9,327	11,129	11,792	14,401	16,803	17,269
Value of seizures by Border Patrol.	Mil. dol. . . .	843.6	1,622.0	2,011.8	1,256.0	1,094.6	1,405.0	2,004.0	1,945.0
Narcotics . . . . .	Mil. dol. . . .	797.8	1,555.7	1,965.3	1,208.8	1,046.3	1,340.0	1,919.0	1,848.0
Aliens expelled:									
Formal removals <sup>1</sup> . . . . .	1,000 . . . .	30.0	45.7	45.2	69.7	114.4	173.0	180.3	184.8
Voluntary departures <sup>2</sup> . . . . .	1,000 . . . .	1,022.5	1,029.1	1,313.8	1,573.4	1,440.7	1,570.1	1,574.5	1,675.3

NA Not available. <sup>1</sup> Include deportations, exclusions, and removals. <sup>2</sup> Includes aliens under docket control required to depart and voluntary departures not under docket control.

Source: U.S. Immigration and Naturalization Service, Statistical Yearbook, annual; and unpublished data.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Footnotes below the bottom rule of tables give information relating to specific items or figures within the table.

Unit indicators show the specified quantities in which data items are presented. They are used for two primary reasons. Sometimes data are not available in absolute form and are estimates (as in the case of many surveys). In other cases we round the numbers in order to save space to show more data, as in the case above.

EXAMPLES OF UNIT INDICATOR INTERPRETATION FROM TABLE

Year	Item	Unit Indicator	Number shown	Multiplier
1990 . . . . .	Deportable aliens located . . . . .	Thousands . . . . .	1,169.9	1,000
1990 . . . . .	Value of seizures by Border Patrol . . . . .	\$ Millions . . . . .	843.6	1,000,000

To Determine the Figure It Is Necessary to Multiply the Number Shown by the Unit Indicator:

Deportable aliens located - 1,169.9 x 1,000 = 1,169,900 (over 1 million)  
Value of seizures by Border Patrol - 843.6 x \$ 1,000,000 = \$843,600,000 (over \$843 million).

When a table presents data with more than one unit indicator, they are found in the headnotes and column headings (Tables 2 and 4), spanner (Table 40), stub (Table 27), or unit column (shown above). When the data in a table are shown in the same unit indicator, it is shown in boldface as the first part of the headnote (Table 2). If no unit indicator is shown, data presented are in absolute form (Table 1).

Vertical rules are used to separate independent sections of a table, (Table 1), or in tables where the stub is continued into one or more additional columns (Table 2).

Averages—An average is a single number or value that is often used to represent the “typical value” of a group of numbers. It is regarded as a measure of “location” or “central tendency” of a group of numbers.

The arithmetic mean is the type of average used most frequently. It is derived by summing the individual item values of a particular group and dividing the total by the number of items. The arithmetic mean is often referred to as simply the “mean” or “average.”

The median of a group of numbers is the middle number or value when each item in the group is arranged according to size (lowest to highest or visa versa); it generally has the same number of items above it as well as below it. If there is an even number if items in the group, the median is taken to be the average of the two middle numbers.

Per capita (or per person) quantities. A per capita figure represents an average computed for every person in a specified group (or population). It is derived by taking the total for an item (such as income, taxes, or retail sales) and dividing it by the number of persons in the specified population.

**Index numbers**—An index number is the measure of difference or change, usually expressed as a percent, relating one quantity (the variable) of a specified kind to another quantity of the same kind. Index numbers are widely used to express changes in prices over periods of time but may also be used to express differences between related subjects for a single point in time.

To compute a price index, a base year or period is selected. The base year price (of the commodity or service) is then designated as the base or reference price to which the prices for other years or periods are related. Many price indexes use the year 1982 as the base year; in tables this is shown as "1982=100." A method of expressing the price relationship is: The price of a set of one or more items for a related year (e.g. 1990) **divided by** the price of the same set of items for the base year (e.g. 1982). The result multiplied by 100 provides the index number. When 100 is subtracted from the index number, the result equals the percent change in price from the base year.

**Average annual percent change**—Unless otherwise stated in the *Abstract* (as in Section 1, Population), average annual percent change is computed by use of a *compound interest formula*. This formula assumes that the rate of change is constant throughout a specified compounding period (1 year for average annual rates of change). The formula is similar to that used to compute the balance of a savings account which receives compound interest. According to this formula, at the end of a compounding period the amount of accrued change (e.g. school enrollment or bank interest) is added to the amount which existed at the beginning of the period. As a result, over time (e.g., with each year or quarter), the same rate of change is applied to a larger and larger figure.

The *exponential formula*, which is based on continuous compounding, is often used to measure population change. It is preferred by population experts because they view population and population-related subjects as changing without interruption, ever ongoing. Both exponential and compound interest formulas assume a constant rate of change. The former, however, applies the amount of change continuously to the base rather than at the end of each compounding period. When the average annual rates are small (e.g., less than 5 percent) both formulas give virtually the same results. For an explanation of these two formulas as

they relate to population, see U.S. Census Bureau, *The Methods and Materials of Demography*, Vol. 2, 3d printing (rev.), 1975, pp. 372-381.

**Current and constant dollars**—Statistics in some tables in a number of sections are expressed in both current and constant dollars (see, for example, Table 643 in Section 13, Income, Expenditures, and Wealth). Current dollar figures reflect actual prices or costs prevailing during the specified year(s). Constant dollar figures are estimates representing an effort to remove the effects of price changes from statistical series reported in dollar terms. In general, constant dollar series are derived by dividing current dollar estimates by the appropriate price index for the appropriate period (for example, the Consumer Price Index). The result is a series as it would presumably exist if prices were the same throughout, as in the base year—in other words as if the dollar had constant purchasing power. Any changes in this constant dollar series would reflect only changes in real volume of output, income, expenditures, or other measure.

## Explanation of Symbols

The following symbols, used in the tables throughout this book, are explained in condensed form in footnotes to the tables where they appear:

- Represents zero or rounds to less than half the unit of measurement shown.
  - B Base figure too small to meet statistical standards for reliability of a derived figure.
  - D Figure withheld to avoid disclosure pertaining to a specific organization or individual.
  - NA Data not enumerated, tabulated, or otherwise available separately.
  - NS Percent change irrelevant or insignificant.
  - S Figure does not meet publication standards for reasons other than that covered by symbol B, above.
  - X Figure not applicable because column heading and stub line make entry impossible, absurd, or meaningless.
  - Z Entry would amount to less than half the unit of measurement shown.
- In many tables, details will not add to the totals shown because of rounding.

# Telephone and Internet Contacts

To help *Abstract* users find more data and information about statistical publications, we are issuing this list of contacts for federal agencies with major statistical programs. The intent is to give a single, first-contact point-of-entry for users of statistics. These agencies will provide general information on their statistical programs and publications, as well as specific information on how to order their publications. We are also including the Internet (World Wide Web) addresses for many of these agencies. These URLs were current in August 2002.

## Section 1

# Population

---

This section presents statistics on the growth, distribution, and characteristics of the U.S. population. The principal source of these data is the U.S. Census Bureau, which conducts a decennial census of population, a monthly population survey, a program of population estimates and projections, and a number of other periodic surveys relating to population characteristics. For a list of relevant publications, see the Guide to Sources of Statistics in Appendix I.

**Decennial censuses**—The U.S. Constitution provides for a census of the population every 10 years, primarily to establish a basis for apportionment of members of the House of Representatives among the states. For over a century after the first census in 1790, the census organization was a temporary one, created only for each decennial census. In 1902, the Census Bureau was established as a permanent federal agency, responsible for enumerating the population and also for compiling statistics on other population and housing characteristics.

Historically, the enumeration of the population has been a complete count. That is, an attempt is made to account for every person, for each person's residence, and for other characteristics (sex, age, family relationships, etc.). Since the 1940 census, in addition to the complete count information, some data have been obtained from representative samples of the population. In the 1990 and 2000 censuses, variable sampling rates were employed. For most of the country, 1 in every 6 households (about 17 percent) received the long form or sample questionnaire; in governmental units estimated to have fewer than 2,500 inhabitants, every other household (50 percent) received the sample questionnaire to enhance the reliability of sample data for small areas. Exact agreement is not to be expected between sample data and the 100-percent count. Sample data may be

used with confidence where large numbers are involved and assumed to indicate trends and relationships where small numbers are involved.

Census Bureau data presented here have not been adjusted for underenumeration. Results from the evaluation program for the 1990 census indicate that the overall national undercount was between 1 and 2 percent. The estimate from the Post Enumeration Survey (PES) was 1.6 percent, and the estimate from Demographic Analysis (DA) was 1.8 percent. Both the PES and DA estimates show disproportionately high undercounts for some demographic groups. For example, the PES estimates of percent net undercount for Blacks (4.4 percent), Hispanics (5.0 percent), and American Indians (4.5 percent) were higher than the estimated undercount of non-Hispanic Whites (0.7 percent). Historical DA estimates demonstrate that the overall undercount rate in the census has declined significantly over the past 50 years (from an estimated 5.4 percent in 1940 to 1.8 percent in 1990), yet the undercount of Blacks has remained disproportionately high.

**Current Population Survey (CPS)**—This is a monthly nationwide survey of a scientifically selected sample representing the noninstitutional civilian population. The sample is located in 754 areas with coverage in every state and the District of Columbia and is subject to sampling error. At the present time, about 60,000 occupied households are eligible for interview every month; of these about 7.5 percent are, for various reasons, unavailable for interview.

While the primary purpose of the CPS is to obtain monthly statistics on the labor force, it also serves as a vehicle for inquiries on other subjects. Using CPS data, the Bureau issues a series of publications

under the general title of *Current Population Reports*, which cover population characteristics (P20), consumer income (P60), special studies (P23), and other topics.

Estimates of population characteristics based on the CPS will not agree with the counts from the census because the CPS and the census use different procedures for collecting and processing the data for racial groups, the Hispanic population, and other topics. Caution should also be used when comparing estimates for various years because of the periodic introduction of changes into the CPS. Beginning in January 1994, a number of changes were introduced into the CPS that effect all data comparisons with prior years. These changes include the results of a major redesign of the survey questionnaire and collection methodology and the introduction of 1990 census population controls, adjusted for the estimated undercount. This change in population controls had relatively little impact on derived measures such as means, medians, and percent distribution, but did have a significant impact on levels.

**Population estimates and projections**—National population estimates start with decennial census data as benchmarks and add annual population component of change data. Component of change data come from various agencies, as follows: National Center for Health Statistics (births and deaths), Immigration and Naturalization Service (legal immigrants), Office of Refugee Resettlement (refugees), U.S. Census Bureau's International Programs Center (net movement between Puerto Rico and the U.S. mainland), Armed Forces, Department of Defense, and Office of Personnel Management (movement of military and civilian citizens abroad). Emigration and net undocumented immigration are projected based on research using census data. Estimates for states, counties, and smaller areas are based on the same component of change data and sources as the national estimates. School statistics from state departments of education and parochial school systems, federal income tax returns from the Internal Revenue Service, group quarters from the Federal-State Cooperative program and the Veterans

Administration, and medicare data from the Centers for Medicare and Medicaid Services are also included.

Data for the population by age for April 1, 1990 (shown in Table 12) are modified counts. The review of detailed 1990 information indicated that respondents tended to provide their age as of the date of completion of the questionnaire, not their age as of April 1, 1990. In addition, there may have been a tendency for respondents to round-up their age if they were close to having a birthday. A detailed explanation of the age modification procedure appears in 1990 Census of Population and Housing Data Paper Listing (CPH-L-74).

Population estimates and projections are published in the P25 Series of *Current Population Reports* and on the Census Bureau Internet site <<http://www.census.gov>>. These estimates and projections are generally consistent with official decennial census figures and do not reflect the amount of estimated census underenumeration. However, these estimates and projections by race have been modified and are not comparable to the census race categories (see section below under "Race"). For details on methodology, see the sources cited below the individual tables.

**Immigration**—The principal source of immigration data is the *Statistical Yearbook of the Immigration and Naturalization Service*, published annually by the Immigration and Naturalization Service (INS), a unit of the Department of Justice. Immigration statistics are prepared from entry visas and change of immigration status forms. Immigrants are aliens admitted for legal permanent residence in the United States. The procedures for admission depend on whether the alien is residing inside or outside the United States at the time of application for permanent residence. Eligible aliens residing outside the United States are issued immigrant visas by the U.S. Department of State. Eligible aliens residing in the United States are allowed to change their status from temporary to permanent residence at INS district offices. The category, immigrant, includes persons who may have entered the United States as nonimmigrants or

refugees, but who subsequently changed their status to that of a permanent resident. Nonresident aliens admitted to the United States for a temporary period are nonimmigrants (Table 1243). Refugees are considered nonimmigrants when initially admitted into the United States but are not included in nonimmigrant admission data. A refugee is an alien outside the United States who is unable or unwilling to return to his or her country of nationality because of persecution or a well-founded fear of persecution.

U.S. immigration law gives preferential immigration status to persons with a close family relationship with a U.S. citizen or legal permanent resident, persons with needed job skills, or persons who qualify as refugees. Immigration to the United States can be divided into two general categories: (1) those subject to the annual worldwide limitation and (2) those exempt from it. The Immigration Act of 1990 established major revisions in the numerical limits and preference system regulating legal immigration. The numerical limits are imposed on visas issued and not on admissions. The maximum number of visas allowed to be issued under the preference categories in 2000 was 436,900 – 294,601 for family-sponsored immigrants and 142,299 for employment-based immigrants. There are nine categories among which the family-sponsored and employment-based immigrant visas are distributed, beginning in fiscal year 1992. The family-sponsored preferences are based on the alien's relationship with a U.S. citizen or legal permanent resident (see Table 6). The employment-based preferences are (1) priority workers (persons of extraordinary ability, outstanding professors and researchers, and certain multinational executives and managers); (2) professionals with advanced degrees or aliens with exceptional ability; (3) skilled workers, professionals without advanced degrees, and needed unskilled workers; (4) special immigrants; and (5) employment creation immigrants (investors). Within the overall limitations the per-country limit for independent countries is set to 7 percent of the total family-sponsored and employment-based limits, while dependent areas are limited to 2 percent of the total. The 2000 limit allowed no more than 30,583 preference

visas for any independent country and 8,738 for any dependency. Those exempt from the worldwide limitation include immediate relatives of U.S. citizens, refugees and asylees adjusting to permanent residence, and other various classes of special immigrants (see Table 6).

The Refugee Act of 1980, effective April 1, 1980, provides for a uniform admission procedure for refugees of all countries, based on the United Nations' definition of refugees. Authorized admission ceilings are set annually by the President in consultation with Congress. After 1 year of residence in the United States, refugees are eligible for immigrant status. The Immigration Reform and Control Act of 1986 (IRCA) allows two groups of illegal aliens to become temporary and then permanent residents of the United States: aliens who have been in the United States unlawfully since January 1, 1982 (legalization applicants), and aliens who were employed in seasonal agricultural work for a minimum period of time (Special Agricultural Worker (SAW) applicants). The application period for temporary residency for legalization applicants began on May 5, 1987, and ended on May 4, 1988, while the application period for SAW applicants began on June 1, 1987, and ended on November 30, 1988. Legalization applicants became eligible for permanent residence beginning in fiscal year 1989. Beginning 1989 immigrant data include temporary residents who were granted permanent residence under the legalization program of IRCA.

**Metropolitan Areas (MAs)**—The general concept of a metropolitan area is one of a core area containing a large population nucleus, together with adjacent communities that have a high degree of social and economic integration with that core. Metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs) are defined by the Office of Management and Budget (OMB) as a standard for federal agencies in the preparation and publication of statistics relating to metropolitan areas. The entire territory of the United States is classified as metropolitan (inside MSAs or CMSAs—PMSAs are components of CMSAs) or non-metropolitan (outside MSAs or CMSAs).

MSAs, CMSAs, and PMSAs are defined in terms of entire counties except in New England, where the definitions are in terms of county subdivisions (primarily cities and towns). The OMB also defines New England County Metropolitan Areas (NECMAs), which are county-based alternatives to the MSAs and CMSAs in the six New England states. Over time, new MAs are created and the components of others change. The analysis of historical trends, therefore, must be made cautiously. For descriptive details and a listing of titles and components of MAs, see Appendix II.

**Urban and rural**—For Census 2000, the Census Bureau classified as urban all territory, population, and housing units located within urbanized areas (UAs) and urban clusters (UCs). A UA consists of densely settled territory that contains 50,000 or more people, while a UC consists of densely settled territory with at least 2,500 people but fewer than 50,000 people. (UCs are a new type of geographic entity for Census 2000.) Prior to Census 2000—from the 1950 census through the 1990 census—the urban population consisted of all people living in UAs and most places outside of UAs with a census population of 2,500 or more.

UAs and UCs encompass territory that generally consists of:

- A cluster of one or more block groups or census blocks each of which has a population density of at least 1,000 people per square mile at the time,
- Surrounding block groups and census blocks each of which has a population density of at least 500 people per square mile at the time, and
- Less densely settled blocks that form enclaves or indentations, or are used to connect discontinuous areas with qualifying densities.

They also may include an airport located adjacent to qualifying densely settled area if it has an annual enplanement (aircraft boarding) of at least 10,000 people.

“Rural” for Census 2000 consists of all territory, population, and housing units located outside of UAs and UCs. Prior to

Census 2000, rural consisted of all territory, population, and housing outside of UAs and outside of other places designated as “urban.” For Census 2000, many more geographic entities, including metropolitan areas, counties, county subdivisions, and places, contain both urban and rural territory, population, and housing units.

**Residence**—In determining residence, the Census Bureau counts each person as an inhabitant of a usual place of residence (i.e., the place where one usually lives and sleeps). While this place is not necessarily a person’s legal residence or voting residence, the use of these different bases of classification would produce the same results in the vast majority of cases.

**Race**—For the 1990 census, the Census Bureau collected and published racial statistics as outlined in Statistical Policy Directive No. 15 issued by the U.S. Office of Management and Budget. This directive provided standards on ethnic and racial categories for statistical reporting to be used by all federal agencies. According to the directive, the basic racial categories were American Indian or Alaska Native, Asian or Pacific Islander, Black, and White. (The directive identified Hispanic origin as an ethnicity.) The question on race for Census 2000 was different from the one for the 1990 census in several ways. Most significantly, respondents were given the option of selecting one or more race categories to indicate their racial identities. Because of these changes, the Census 2000 data on race are not directly comparable with data from the 1990 census or earlier censuses. Caution must be used when interpreting changes in the racial composition of the U.S. population over time. Census 2000 adheres to the federal standards for collecting and presenting data on race and Hispanic origin as established by the Office of Management and Budget (OMB) in October 1997. Starting with Census 2000, the OMB requires federal agencies to use a minimum of five race categories: White, Black or African American, American Indian or Alaska Native, Asian, and Native Hawaiian or Other Pacific Islander. For respondents unable to identify with any of these five race categories, OMB approved and included a sixth category—“Some other

race”—on the Census 2000 questionnaire. The Census 2000 question on race included 15 separate response categories and three areas where respondents could write in a more specific race group. The response categories and write-in answers can be combined to create the five minimum OMB race categories plus “Some other race.” People who responded to the question on race by indicating only one race are referred to as the race *alone* population, or the group that reported only one race category. Six categories make up this population: White *alone*; Black or African American *alone*; American Indian and Alaska Native *alone*; Asian *alone*; Native Hawaiian and Other Pacific Island *alone*; and Some other race *alone*. Individuals who chose more than one of the six race categories are referred to as the *Two or more races* population, or as the group that reported *more than one race*.

The concept of race the Census Bureau uses reflects self-identification by respondents; that is the individual’s perception of his/her racial identity. The concept is not intended to reflect any biological or anthropological definition. Furthermore, the Census Bureau recognizes that the categories of the race item include both racial and national origin or sociocultural groups.

Data for the population by race for April 1, 1990 (shown in Table 10) are modified counts and are not comparable to the 1990 census race categories. These numbers were computed using 1990 census data by race which had been modified to be consistent with the guidelines in Federal Statistical Policy Directive No. 15 issued by the Office of Management and Budget. A detailed explanation of the race modification procedure appears in 1990 Census of Population and Housing Data Paper Listing (CPH-L-74).

In the CPS and other household sample surveys in which data are obtained through personal interview, respondents are asked to classify their race as: (1) White; (2) Black; (3) American Indian, Aleut, or Eskimo; or (4) Asian or Pacific Islander. The procedures for classifying

persons of mixed races who could not provide a single response to the race question are generally similar to those used in the census.

**Hispanic population**—The question on Hispanic origin for Census 2000 was similar to the 1990 census question, except for its placement on the questionnaire. For Census 2000, the question on Hispanic origin was asked directly before the question on race. For the 1990 census, the order was reversed—the question on race preceded questions on age and marital status, which were followed by the question on Hispanic origin. In the 1990 census, the Census Bureau collected data on the Hispanic origin population in the United States by using a self-identification question. Persons of Spanish/Hispanic origin are those who classified themselves in one of the specific Hispanic origin categories listed on the questionnaire—Mexican, Puerto Rican, Cuban, as well as those who indicated that they were of Other Spanish/Hispanic origin. Persons of Other Spanish/Hispanic origin are those whose origins are from Spain, the Spanish-speaking countries of Central or South America, or the Dominican Republic. In 1980, 1990, and 2000, the Hispanic-origin question contained prelisted categories for the largest Hispanic-origin groups—Mexican, Puerto Rican, Cuban, and Other Spanish/Hispanic. The 1990 Hispanic-origin question differed from the 1980 question in that it contained a write-in line for the Other Spanish/Hispanic category. This was coded only for sample data. Another difference between the 1980 and 1990 Hispanic-origin question is that in 1980 the wording of the Hispanic-origin question read: “Is this person of Spanish/Hispanic origin or descent?” while in 1990 the word “descent” was dropped from the question. Persons of Hispanic origin may be of any race.

In the CPS information on Hispanic persons is gathered by using a self-identification question. Persons classify themselves in one of the Hispanic categories in response to the question: “What is the origin or descent of each person in this household?” Hispanic persons in the CPS are persons who report themselves as

Mexican-American, Chicano, Mexican, Puerto Rican, Cuban, Central or South American (Spanish countries), or other Hispanic origin.

**Nativity**—The native population consists of all persons born in the United States, Puerto Rico, or an outlying area of the United States. It also includes persons born in a foreign country who had at least one parent who was a U.S. citizen. All other persons are classified as “foreign born.”

**Mobility status**—The U.S. population is classified according to mobility status on the basis of a comparison between the place of residence of each individual at the time of the survey or census and the place of residence at a specified earlier date. Nonmovers are all persons who were living in the same house or apartment at the end of the period as at the beginning of the period. Movers are all persons who were living in a different house or apartment at the end of the period than at the beginning of the period. Movers are further classified as to whether they were living in the same or different county, state, or region or were movers from abroad. Movers from abroad include all persons, either U.S. citizens or noncitizens, whose place of residence was outside the United States at the beginning of the period; that is, in Puerto Rico, an outlying area under the jurisdiction of the United States, or a foreign country.

**Living arrangements**—Living arrangements refer to residency in households or in group quarters. A “household” comprises all persons who occupy a “housing unit,” that is, a house, an apartment or other group of rooms, or a single room that constitutes “separate living quarters.” A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone or a group of unrelated persons sharing the same housing unit is also counted as a household. See text, Section 20, Construction and Housing, for definition of housing unit.

All persons not living in housing units are classified as living in group quarters. These individuals may be institutionalized, e.g., under care or custody in juvenile facilities, jails, correctional centers, hospitals, or nursing homes; or they may be residents in noninstitutional group quarters such as college dormitories, group homes, or military barracks.

**Householder**—The householder is the first adult household member listed on the questionnaire. The instructions call for listing first the person (or one of the persons) in whose name the home is owned or rented. If a home is owned or rented jointly by a married couple, either the husband or the wife may be listed first. Prior to 1980, the husband was always considered the household head (householder) in married-couple households.

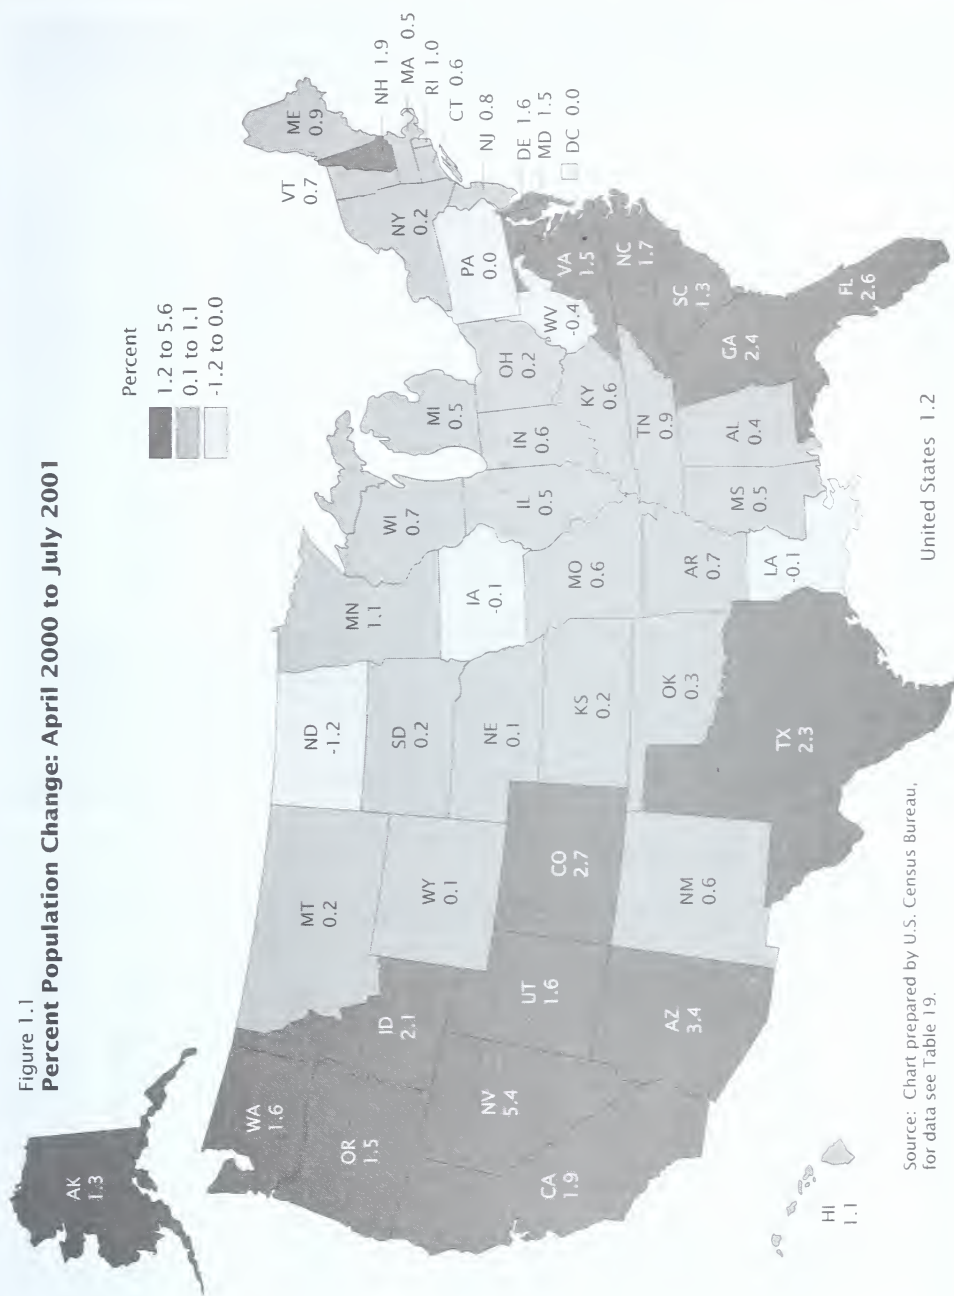

**Family**—The term family refers to a group of two or more persons related by birth, marriage, or adoption and residing together in a household. A family includes among its members the householder.

**Subfamily**—A subfamily consists of a married couple and their children, if any, or one parent with one or more never-married children under 18 years old living in a household. Subfamilies are divided into “related” and “unrelated” subfamilies. A related subfamily is related to, but does not include, the householder. Members of a related subfamily are also members of the family with whom they live. The number of related subfamilies, therefore, is not included in the count of families. An unrelated subfamily may include persons such as guests, lodgers, or resident employees and their spouses and/or children; none of whom is related to the householder.

**Married couple**—A married couple is defined as a husband and wife living together in the same household, with or without children and other relatives.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Figure 1.1  
Percent Population Change: April 2000 to July 2001

Source: Chart prepared by U.S. Census Bureau, for data see Table 19.

No. 1. Population and Area: 1790 to 2000

[Area figures represent area on indicated date including in some cases considerable areas not then organized or settled, and not covered by the census. Total area figures for 1790 to 1970 have been recalculated on the basis of the remeasurement of states and counties for the 1980 census, but not on the basis of the 1990 census. The land and water area figures for past censuses have not been adjusted and are not strictly comparable with the total area data for comparable dates because the land areas were derived from different base data, and these values are known to have changed with the construction of reservoirs, draining of lakes, etc. Density figures are based on land area measurements as reported in earlier censuses]

Census date	Resident population				Area (square miles)		
	Number	Per square mile of land area	Increase over preceding census		Total	Land	Water <sup>1</sup>
			Number	Percent			
1790 (Aug. 2)	3,929,214	4.5	(X)	(X)	891,364	864,746	24,065
1800 (Aug. 4)	5,308,483	6.1	1,379,269	35.1	891,364	864,746	24,065

No. 3. Resident Population Projections: 2002 to 2100

[In thousands (280,306 represents 280,306,000). As of July 1. The projections are based on assumptions about future childbearing, mortality, and migration. The level of childbearing among women for the middle series is assumed to remain close to present levels, with differences by race and Hispanic origin diminishing over time. Mortality is assumed to decline gradually with less variation by race and Hispanic origin than at present. International migration is assumed to vary over time and decrease generally relative to the size of the population. Assumptions for the lowest and highest series are summarized in "Methodology and Assumptions for the Population Projections of the United States: 1999 to 2100, Working Paper #38"]

Year	Middle series <sup>1</sup>	Lowest series <sup>2</sup>	Highest series <sup>3</sup>	Zero international migration series <sup>4</sup>
2002	280,306	278,801	282,087	276,709
2003	282,798	280,624	285,422	278,112
2004	285,266	282,352	288,841	279,493
2005	287,716	284,000	292,339	280,859
2006	290,153	285,581	295,911	282,219
2007	292,583	287,106	299,557	283,579
2008	295,009	288,583	303,274	284,945
2009	297,436	290,018	307,060	286,322
2010	299,862	291,413	310,910	287,710
2011	302,300	292,778	314,846	289,108
2012	304,764	294,120	318,893	290,514
2013	307,250	295,436	323,044	291,924
2014	309,753	296,723	327,293	293,334
2015	312,268	297,977	331,636	294,741
2016	314,793	299,197	336,069	296,144
2017	317,325	300,379	340,589	297,539
2018	319,860	301,521	345,192	298,921
2019	322,395	302,617	349,877	300,288
2020	324,927	303,664	354,642	301,636
2025	337,815	308,229	380,397	307,923
2030	351,070	311,656	409,604	313,219
2035	364,319	313,819	441,618	317,534
2040	377,350	314,673	475,949	321,167
2045	390,398	314,484	512,904	324,449
2050	403,687	313,546	552,757	327,641
2075	480,504	303,970	809,243	349,032
2100	570,954	282,706	1,182,390	377,444

<sup>1</sup> Total fertility rate in 2050 = 2.219; life expectancy in 2050 = 83.9 years; and annual net immigration in 2050 = 984,000. These are middle level assumptions. For explanation of total fertility rate; see headnote, Table 71. <sup>2</sup> Total fertility rate in 2050 = 1,800; life expectancy in 2050 = 82.2 years; and annual net immigration in 2050 = 169,000. These are lowest level assumptions. <sup>3</sup> Total fertility rate in 2050 = 2,647; life expectancy in 2050 = 86.1 years; and annual net immigration in 2050 = 2,812,000. These are highest level assumptions. <sup>4</sup> Middle level assumptions for fertility and mortality; zero level assumption for international migration.

NA Not available. <sup>1</sup> Persons of Hispanic origin may be of any race. <sup>2</sup> The revised 1970 resident population count is 203,302,031; which incorporates changes due to errors found after tabulations were completed. The race and sex data shown here reflect the official 1970 census count. <sup>3</sup> The race data shown have been modified; see text of this section for explanation. <sup>4</sup> See footnote 4, Table 1. <sup>5</sup> The April 1, 1990, estimates base (248,790,925) includes count resolution corrections processed through August 1997. It generally does not include adjustments for census coverage errors. However, it includes adjustments estimated for the 1995 Test Census in various localities in California, New Jersey, and Louisiana; and the 1998 census dress rehearsals in localities in California and Wisconsin. These adjustments amounted to a total of 81,052 persons. <sup>6</sup> Middle series projection; for assumptions, see Table 3.

X Not applicable. <sup>1</sup> Total population count has been revised since the 1980 census publications. Numbers by age, race, Hispanic origin, and sex have not been corrected. <sup>2</sup> The data shown have been modified from the official 1990 census counts. See text of this section for explanation. The April 1, 1990, estimates base (248,790,925) includes count resolution corrections processed through August 1997. It generally does not include adjustments for census coverage errors. However, it includes adjustments estimated for the 1995 Test Census in various localities in California, New Jersey, and Louisiana, and the 1998 census dress rehearsals in localities in California and Wisconsin. These adjustments amounted to a total of 81,052 persons.

## No. 16. Resident Population by Race and Hispanic Origin Status—Projections: 2005 to 2050

[In thousands, except as indicated (287,716 represents 287,716,000). As of July. These data are consistent with the 1980 and 1990 decennial enumerations and have been modified from the official census counts; see text of this section for explanation. Based on middle series of assumptions. See footnote 1, Table 3.]

Figure 1.2  
Center of Population: 1970 to 2000

[Prior to 1960, excludes Alaska and Hawaii. The median center is located at the intersection of two median lines, a north-south line constructed so that half of the nation's population lives east and half lives west of it, and an east-west line selected so that half of the nation's population lives north and half lives south of it. The mean center of population is that point at which an imaginary, flat, weightless, and rigid map of the United States would balance if weights of identical value were placed on it so that each weight represented the location of one person on the date of the census]

Year	Median center		Mean center		
	Latitude-N	Longitude	Latitude-N	Longitude-W	Approximate location
1790 (August 2)	(NA)	(NA)	39 16 30	76 11 12	In Kent County, MD, 23 miles E of Baltimore MD
1850 (June 1)	(NA)	(NA)	38 59 00	81 19 00	In Wirt County, WV, 23 miles SE of Parkersburg, WV <sup>1</sup>
1900 (June 1)	40 03 32	84 49 01	39 09 36	85 48 54	In Bartholomew County, IN, 6 miles SE of Columbus, IN
1950 (April 1)	40 00 12	84 56 51	38 50 21	88 09 33	In Richland County, IL, 8 miles NNW of Olney, IL
1960 (April 1)	39 56 25	85 16 60	38 35 58	89 12 35	In Clinton County, IL, 6.5 miles NW of Centralia, IL
1970 (April 1)	39 47 43	85 31 43	38 27 47	89 42 22	In St. Clair County, IL, 5.3 miles ESE of Mascoutah, IL
1980 (April 1)	39 18 60	86 08 15	38 08 13	90 34 26	In Jefferson County, MO, .25 mile W of DeSoto, MO
1990 (April 1)	38 57 55	86 31 53	37 52 20	91 12 55	In Crawford County, MO, 10 miles SE of Steelville, MO
2000 (April 1)	38 45 23	86 55 51	37 41 49	91 48 34	In Phelps County, MO, 3 miles E of Edgar Springs, MO

NA Not available. <sup>1</sup>West Virginia was set off from Virginia, Dec. 31, 1862, and admitted as a state, June 19, 1863.

## No. 18. Resident Population—States: 1980 to 2001

[In thousands (226,546 represents 226,546,000). 1980, 1990, and 2000 data as of April 1, data for other years as of July 1. Insofar as possible, population shown for all years is that of present area of state]

- Represents zero. <sup>1</sup> State estimates are constrained to sum to an independently derived estimate of the national population. The residual is the difference between a state's population before and after imposing this constraint. The residual is not a demographic component of population change; rather, it is a statistical artifact of the procedures employed to produce the estimates.

X Not applicable. <sup>1</sup> Reflects revisions to an area's 1990 census population count that may occur as the result of (1) post-1990 census corrections of political boundaries or geographic misallocations or documented underenumerations or overenumerations and (2) geographic boundary updates made after the 1990 census, resulting from annexations, de-annexations, new incorporations, and governmental mergers. Includes revisions processed through January 1, 1998.

No. 42. Foreign-Stock Population by Nativity and Parentage: 1960 to 2000

[34.1 represents 34,100,000. Information on the birthplace of parents may be used to classify the native population by parentage: native of native parentage (both parents native), native of foreign parentage (both parents foreign born), and native of mixed parentage (one parent native and one parent foreign born). The term foreign stock includes the foreign-born population and the native population of foreign or mixed parentage. For 1960 and 1970, resident population. For 2000, civilian noninstitutional population plus Armed Forces living off post or with their families on post]

Nativity and parentage	Number (mil.)			Percent of total population		
	1960	1970	2000	1960	1970	2000
Foreign stock, total . . . . .	34.1	33.6	55.9	19.0	16.5	20.4

No. 65. Christian Church Adherents, 2000, and Jewish Population, 2001—States

[Christian church adherents were defined as "all members, including full members, their children and the estimated number of other regular participants who are not considered as communicant, confirmed or full members." The Jewish population includes Jews who define themselves as Jewish by religion as well as those who define themselves as Jewish in cultural terms. Data on Jewish population are based primarily on a compilation of individual estimates made by local Jewish federations. Additionally, most large communities have completed Jewish demographic surveys from which the Jewish population can be determined]

## Section 2

# Vital Statistics

This section presents vital statistics data on births, deaths, abortions, fetal deaths, fertility, life expectancy, marriages, and divorces. Vital statistics are compiled for the country as a whole by the National Center for Health Statistics (NCHS) and published in its annual report, *Vital Statistics of the United States*, in certain reports of the *Vital and Health Statistics* series, and in the *National Vital Statistics Reports* (formerly *Monthly Vital Statistics Report*). Reports in this field are also issued by the various state bureaus of vital statistics. Data on fertility, on age of persons at first marriage, and on marital status and marital history are compiled by the U.S. Census Bureau from its Current Population Survey (CPS; see text, Section 1) and published in *Current Population Reports*, P20 Series. Data on abortions are published by the Alan Guttmacher Institute, New York, NY, in selected issues of *Family Planning Perspectives*.

**Registration of vital events**—The registration of births, deaths, fetal deaths, and other vital events in the United States is primarily a state and local function. The civil laws of every state provide for a continuous and permanent birth- and death-registration system. Many states also provide for marriage- and divorce-registration systems. Vital events occurring to U.S. residents outside the United States are not included in the data.

**Births and deaths**—The live-birth, death, and fetal-death statistics prepared by NCHS are based on vital records filed in the registration offices of all states, of New York City, and of the District of Columbia. The annual collection of death statistics on a national basis began in 1900 with a national death-registration area of 10 states and the District of Columbia; a similar annual collection of birth statistics for a national birth-registration area began in 1915, also with 10 reporting states and the District of Columbia. Since 1933, the birth- and death-registration areas have comprised

the entire United States, including Alaska (beginning 1959) and Hawaii (beginning 1960). National statistics on fetal deaths were first compiled for 1918 and annually since 1922.

Prior to 1951, birth statistics came from a complete count of records received in the Public Health Service (now received in NCHS). From 1951 through 1971, they were based on a 50-percent sample of all registered births (except for a complete count in 1955 and a 20- to 50-percent sample in 1967). Beginning in 1972, they have been based on a complete count for states participating in the Vital Statistics Cooperative Program (VSCP) (for details, see the technical appendix in *Vital Statistics of the United States*) and on a 50-percent sample of all other areas. Beginning 1986, all reporting areas participated in the VSCP. Mortality data have been based on a complete count of records for each area (except for a 50-percent sample in 1972). Beginning in 1970, births to and deaths of nonresident aliens of the United States and U.S. citizens outside the United States have been excluded from the data. Fetal deaths and deaths among Armed Forces abroad are excluded. Data based on samples are subject to sampling error; for details, see annual issues of *Vital Statistics of the United States*.

Mortality statistics by cause of death are compiled in accordance with World Health Organization regulations according to the *International Classification of Diseases* (ICD). The ICD is revised approximately every 10 years. The tenth revision of the ICD was employed beginning in 1999. Deaths for prior years were classified according to the revision of the ICD in use at the time. Each revision of the ICD introduces a number of discontinuities in mortality statistics; for a discussion of those between the ninth and tenth revisions of the ICD, see *National Vital Statistics Reports*, Vol. 49, Nos. 2 and 8. Preliminary mortality data are based on a percentage of death records weighted up to the total

number of deaths reported for the given year; for a discussion of preliminary data, see *National Vital Statistics Reports*, Vol. 49, No. 3. Information on tests of statistical significance, differences between death rates, and standard errors can also be found in the reports mentioned above.

Some of the tables present age-adjusted death rates in addition to crude death rates. Age-adjusted death rates shown in this section were prepared using the direct method, in which age-specific death rates for a population of interest are applied to a standard population distributed by age. Age adjustment eliminates the differences in observed rates between points in time or among compared population groups that result from age differences in population composition.

**Fertility and life expectancy**—The total fertility rate, defined as the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year, is compiled and published by NCHS. Other data relating to social and medical factors which affect fertility rates, such as contraceptive use and birth expectations, are collected and made available by both NCHS and the Census Bureau. NCHS figures are based on information in birth and fetal death certificates and on the periodic National Surveys of Family Growth; Census Bureau data are based on decennial censuses and the CPS.

Data on life expectancy, the average remaining lifetime in years for persons who attain a given age, are computed and published by NCHS. For details, see *National Vital Statistics Reports*, Vol. 50, No. 6.

**Marriage and divorce**—The compilation of nationwide statistics on marriages and divorces in the United States began in 1887-88 when the National Office of Vital Statistics prepared estimates for the years 1867-86. Although periodic updates took place after 1888, marriage and divorce statistics were not collected and published annually until 1944 by that office. In 1957 and 1958, respectively, the same

office established marriage- and divorce-registration areas. Beginning in 1957, the marriage-registration area comprised 30 states, plus Alaska, Hawaii, Puerto Rico, and the Virgin Islands; it currently includes 42 states and the District of Columbia. The divorce-registration area, starting in 1958 with 14 states, Alaska, Hawaii, and the Virgin Islands, it currently includes a total of 31 states and the Virgin Islands. Procedures for estimating the number of marriages and divorces in the registration states are discussed in *Vital Statistics of the United States*, Vol. III—Marriage and Divorce. Total counts of events for registration and nonregistration states are gathered by collecting already summarized data on marriages and divorces reported by state offices of vital statistics and by county offices of registration.

**Vital statistics rates**—Except as noted, vital statistics rates computed by NCHS are based on decennial census population figures as of April 1 for 1940, 1950, 1960, 1970, 1980, and 1990; and on mid-year population figures for other years, as estimated by the Census Bureau (see text, Section 1).

**Race**—Data by race for births, deaths, marriages, and divorces from NCHS are based on information contained in the certificates of registration. The Census Bureau's Current Population Survey obtains information on race by asking respondents to classify their race as (1) White, (2) Black, (3) American Indian, Eskimo, or Aleut, or (4) Asian or Pacific Islander.

Beginning with the 1989 data year, NCHS is tabulating its birth data primarily by race of the mother. In 1988 and prior years, births were tabulated by race of the child, which was determined from the race of the parents as entered on the birth certificate.

Trend data by race shown in this section are by race of mother beginning with the 1980 data. Hispanic origin of the mother is reported and tabulated independently of race. Thus persons of Hispanic origin maybe of any race. In 1994, 91 percent of women of Hispanic origin were reported as White.

No. 66. Live Births, Deaths, Marriages, and Divorces: 1950 to 2001

[3,632 represents 3,632,000. Prior to 1960, excludes Alaska and Hawaii. Beginning 1970, excludes births to, and deaths of non-residents of the United States. See Appendix III]

No. 71. Total Fertility Rate of Natural Increase: 1970 to 2000

[Based on race of child and registered births only, thru 1979. Beginning 1980, based on race of mother. Beginning 1970, excludes births to nonresidents of United States. The *total fertility rate* is the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year. A total fertility rate of 2,110 represents "replacement level" fertility for the total population under current mortality conditions (assuming no net immigration). The *intrinsic rate of natural increase* is the rate that would eventually prevail if a population were to experience, at each year of age, the birth rates and death rates occurring in the specified year and if those rates remained unchanged over a long period of time. Minus sign (-) indicates decrease. See also Appendix III]

Annual average and year	Total fertility rate			Annual average and year	Total fertility rate

## No. 75. Births to Unmarried Women by Race of Child and Age of Mother: 1990 to 2000

[Excludes births to nonresidents of United States. Marital status is inferred from a comparison of the child's and parents' surnames on the birth certificate for those States that do not report on marital status. No estimates included for misstatements on birth records or failures to register births. See also Appendix III.]

## No. 78. Live Births by Place of Delivery, Median and Low Birth Weight, and Prenatal Care: 1990 to 2000

[Represents registered births. Excludes births to nonresidents of the United States. For total number of births, see Table 68. See Appendix III]

Item	1990	1994	1995	1996	1997	1998	1999	2000
Births attended (1,000)								
in hospital	4,110	3,912	3,861	3,854	3,881	3,904	3,923	4,021
By physician, not in hospital	14	7	6	6	5	6	5	5
By midwife and other, not in hospital	21	21	21	20	20	21	21	21
Median birth weight <sup>3</sup>	7 lb.-7 oz.	(NA)	(NA)	7 lb.-7 oz.	7 lb.-7 oz.	7 lb.-7 oz.	(NA)	7 lb.-7 oz.
Percent of births with low birth weight	7.0	7.3	7.3	7.4	7.5	7.6	7.6	7.6
White	5.7	6.1	6.2	6.3	6.5	6.5	6.6	6.5
Black	13.3	13.2	13.1	13.0	13.0	13.0	13.1	13.0
Percent of births by period in which prenatal care began								
1st trimester	74.2	80.2	81.3	81.9	82.5	82.8	83.2	83.2
3d trimester or no prenatal care	6.0	4.4	4.2	4.0	3.9	3.9	3.8	3.9

NA Not available. <sup>1</sup> Includes all births in hospitals or institutions and in clinics. <sup>2</sup> Includes births with attendant not specified. <sup>3</sup> Median birth weight based on race of mother: prior to 1990, based on race of child.

Source: U.S. National Center for Health Statistics, *Vital Statistics of the United States*, annual; and *National Vital Statistics Reports* (NVSRI) (formerly *Monthly Vital Statistics Report*) and unpublished data. See also <<http://www.cdc.gov/nchs/births.htm>>

## No. 79. Method of Delivery by Race: 1990 to 2000

[In thousands (4,111 represents 4,111,000), except rate. 1990 excludes data for Oklahoma, which did not report method of delivery on the birth certificate]

Item	1990	1995	2000	Item	1990	1995	2000
Births by method of delivery	4,111	3,900	4,059	Repeat	53	46	56
Vaginal	3,111	3,064	3,108	Not stated	16	4	4
After previous cesarean	84	112	90	Hispanic births by method of delivery (1,000)			
Cesarean deliveries	914	807	924	Vaginal	595	680	816
Primary	575	510	578	After previous cesarean	458	540	633
Repeat	339	297	346	Cesarean deliveries	10	17	17
Not stated	85	29	27	Primary	123	137	180
White births by method of delivery	3,252	3,099	3,194	Repeat	76	83	105
Vaginal	2,454	2,435	2,449	Not stated	47	54	75
After previous cesarean	67	91	70	Cesarean delivery rate <sup>1</sup>	14	3	3
Cesarean deliveries	733	640	723	White	22.7	20.8	22.9
Primary	459	401	449	Black	23.0	20.8	22.8
Repeat	274	239	274	Primary	22.1	21.8	24.3
Not stated	66	24	22	Black	16.0	14.7	16.1
Black births by method of delivery	679	603	623	White	16.1	14.6	15.9
Vaginal	517	469	468	Black	15.7	15.7	17.3
After previous cesarean	13	16	14	Rate of vaginal birth after previous cesarean <sup>3</sup>			
Cesarean deliveries	146	130	150	White	19.9	27.5	20.6
Primary	93	84	95	Black	19.7	27.6	20.4
					20.3	26.1	20.5

<sup>1</sup> Cesarean rates are the number of cesarean deliveries per 100 total deliveries for specified category. <sup>2</sup> Number of primary cesareans per 100 live births to women who have not had a previous cesarean. <sup>3</sup> Number of vaginal births after previous cesarean delivery per 100 live births to women with a previous cesarean delivery.

40 to 44 years old . . . . .	59	77	125	9.9	8.6	10.9	(NA)	1.2	2.3

NA Not available. <sup>1</sup> For 1980-88, 18 to 29 years old.  
Source: U.S. Census Bureau, *Current Population Reports*, P20-375, P20-454, P20-470, and P20-499.

No. 82. Characteristics of Women Who Have Had a Child in the Last Year: 1995 and 2000

[As of June. Covers civilian noninstitutional population. Since the number of women who had a birth during the 12-month period was tabulated and not the actual numbers of births, some small underestimation of fertility for this period may exist due to the omission of: (1) Multiple births. (2) Two or more live births spaced within the 12-month period (the woman is counted only once). (3) Women who had births in the period and who did not survive to the survey date. (4) Women who were in institutions and therefore not in the survey universe. These losses may be somewhat offset by the inclusion in the CPS of births to immigrants who did not have their children born in the United States and births to nonresident women. These births would not have been recorded in the vital registration system. Based on Current Population Survey (CPS): see text, Section 1 and Appendix III]

Characteristic	1995			2000		
	Women who have had a child in the last year			Women who have had a child in the last year		
	Number of women (1,000)	Total births per 1,000 women	First births per 1,000 women	Number of women (1,000)	Total births per 1,000 women	First births per 1,000 women

<sup>1</sup> Based on the proportion of the cohort who are alive at the beginning of an indicated age interval who will die before reaching the end of that interval. For example, out of every 1,000 people alive and exactly 50 years old at the beginning of the period, between 4 and 5 (4.44) will die before reaching their 51st birthdays.

# No. 94. Deaths and Death Rates by Sex and Race: 1970 to 2000

[1,921 represents 1,921,000. Rates are per 1,000 population for specified groups. Excludes deaths of nonresidents of the United States and fetal deaths. For explanation of age-adjustment, see text, this section. The standard population for this table is the total population of the United States enumerated in 1940. See Appendix III.]

No. 98. Infant, Maternal, and Neonatal Mortality Rates by Race: 1980 to 1999

[Deaths per 1,000 live births, except as noted. Excludes deaths of nonresidents of the United States. Beginning 1989, race for live births tabulated according to race of mother, for maternal mortality rates and mortality rates. See also Appendix III]

Item	1980	1990	1994	1995	1996	1997	1998	1999 <sup>1</sup>
Infant deaths <sup>2</sup>	12.6	9.2	8.0	7.6	7.3	7.2	7.2	7.1
White	10.9	7.6	6.6	6.3	6.1	6.0	6.0	5.8
Black and other	20.2	15.5	13.5	12.6	12.2	11.8	11.9	11.9
Black	22.2	18.0	15.8	15.1	14.7	14.2	14.3	14.6
Maternal deaths <sup>3</sup>	9.2	8.2	8.3	7.1	7.6	8.4	7.1	9.9
White	6.7	5.4	6.2	4.2	5.1	5.8	5.1	6.8
Black and other	19.8	19.1	16.2	18.5	16.9	18.3	14.9	21.4
Black	21.5	22.4	18.5	22.1	20.3	20.8	17.1	25.4
Neonatal deaths <sup>4</sup>	8.5	5.8	5.1	4.9	4.8	4.8	4.8	4.7
White	7.4	4.8	4.2	4.1	4.0	4.0	4.0	3.9
Black and other	13.2	9.9	8.6	8.1	7.9	7.7	7.9	7.9
Black	14.6	11.6	10.2	9.8	9.6	9.4	9.5	9.8

<sup>1</sup> Beginning 1999, deaths are classified according to the Tenth Revision of the International Classification of Diseases; earlier years classified according to the revision in use at the time, see text, this section. <sup>2</sup> Represents deaths of infants under 1 year old, exclusive of fetal deaths. <sup>3</sup> Per 100,000 live births from deliveries and complications of pregnancy, childbirth, and the puerperium. <sup>4</sup> Represents deaths of infants under 28 days old, exclusive of fetal deaths.

No. 99. Infant Mortality Rates by Race—States: 1980 to 1999

[Deaths per 1,000 live births, by place of residence. Represents deaths of infants under 1 year old, exclusive of fetal deaths. Excludes deaths of nonresidents of the United States. See Appendix III]

- Represents zero or rounds to less than half the unit of measurement shown. B Base figure too small to meet statistical standards for reliability. <sup>1</sup> Includes deaths of persons who were not residents of the 50 states and the District of Columbia. <sup>2</sup> Starting with 1999 data, cause of death is coded according to ICD-10. Discontinuity between 1998 and 1999 due to ICD-10 coding and classification changes is measured by the comparability ratio. For explanation, see text, this section.

## Section 3

# Health and Nutrition

---

This section presents statistics on health expenditures and insurance coverage, including medicare and medicaid, medical personnel, hospitals, nursing homes and other care facilities, injuries, diseases, disability status, nutritional intake of the population, and food consumption. Summary statistics showing recent trends on health care and discussions of selected health issues are published annually by the U.S. National Center for Health Statistics (NCHS) in *Health, United States*. Data on national health expenditures, medical costs, and insurance coverage are compiled by the U.S. Centers for Medicare & Medicaid Services (CMS) (formerly Health Care Financing Administration), and appear in the quarterly *Health Care Financing Review* and in the annual *Medicare and Medicaid Statistical Supplement* to the *Health Care Financing Review*. Statistics on health insurance are also collected by NCHS and are published in Series 10 of *Vital and Health Statistics*. U.S. Census Bureau also publishes data on utilization of insurance coverage. Statistics on hospitals are published annually by the Health Forum, L.L.C., an American Hospital Association Company, in *Hospital Statistics*. Primary sources for data on nutrition are the quarterly *National Food Review* and the annual *Food Consumption, Prices, and Expenditures*, both issued by the U.S. Department of Agriculture. NCHS also conducts periodic surveys of nutrient levels in the population, including estimates of food and nutrient intake, overweight and obesity, hypercholesterolemia, hypertension, and clinical signs of malnutrition.

**National health expenditures**—CMS compiles estimates of national health expenditures (NHE) to measure spending for health care in the United States. The NHE accounts are structured to show spending by type of expenditure (i.e., hospital care, physician and clinical care, dental care, and other professional care; home health care; retail sales of prescription drugs; other medical nondurables;

vision products and other medical durables; nursing home care and other personal health expenditures; plus non-personal health expenditures for such items as public health, research, construction of medical facilities, administration, and the net cost of private health insurance) and by source of funding (e.g., private health insurance, out-of-pocket payments, and a range of public programs including medicare, medicaid, and those operated by the Department of Veterans Affairs (VA)).

Data used to estimate health expenditures come from existing sources which are tabulated for other purposes. The type of expenditure estimates rely upon statistics produced by such groups as the American Hospital Association; the Census Bureau, and the Department of Health and Human Services (HHS). Source of funding estimates are constructed using administrative and statistical records from the medicare and medicaid programs, the Department of Defense and VA medical programs, the Social Security Administration, Census Bureau's *Governmental Finances*, state and local governments, other HHS agencies, and other nongovernment sources. More information and detailed descriptions of sources and methods are available on the HCFA home page at <<http://cms.hhs.gov/statistics/nhe/default.asp>>.

**Medicare and medicaid**—Since July 1966, the federal medicare program has provided two coordinated plans for nearly all people age 65 and over: (1) A hospital insurance plan which covers hospital and related services and (2) a voluntary supplementary medical insurance plan, financed partially by monthly premiums paid by participants, which partly covers physicians' and related medical services. Such insurance also applies, since July 1973, to disabled beneficiaries of any age after 24 months of entitlement to cash

benefits under the social security or railroad retirement programs and to persons with end stage renal disease.

Medicaid is a health insurance program for certain low-income people. These include: certain low-income families with children; aged, blind, or disabled people on Supplemental Security Income; certain low-income pregnant women and children; and people who have very high medical bills. Medicaid is funded and administered through a state-federal partnership. Although there are broad federal requirements for medicaid, states have a wide degree of flexibility to design their program. States have authority to establish eligibility standards, determine what benefits and services to cover, and set payment rates. All states, however, must cover these basic services: inpatient and outpatient hospital services, laboratory and X-ray services, skilled nursing and home health services, doctor's services, family planning, and periodic health checkups, diagnosis and treatment for children.

**Health resources**—Hospital statistics based on data from the American Hospital Association's yearly survey are published annually in *Hospital Statistics* and cover all hospitals accepted for registration by the Association. To be accepted for registration, a hospital must meet certain requirements relating to number of beds, construction, equipment, medical and nursing staff, patient care, clinical records, surgical and obstetrical facilities, diagnostic and treatment facilities, laboratory services, etc. Data obtained from NCHS cover all U.S. hospitals which meet certain criteria for inclusion. The criteria are published in *Vital and Health Statistics* reports, Series 13. NCHS defines a hospital as a nonfederal short-term general or special facility with six or more inpatient beds with an average stay of less than 60 days.

Statistics on the demographic characteristics of persons employed in the health occupations are compiled by the U.S. Bureau of Labor Statistics and reported in *Employment and Earnings* (monthly) (see Table 588, Section 12, Labor Force, Employment, and Earnings). Data based

on surveys of health personnel and utilization of health facilities providing long-term care, ambulatory care, and hospital care are presented in NCHS Series 13 *Data on Health Resources Utilization and Advance Data from Vital and Health Statistics*. Statistics on patient visits to health care providers, as reported in health interviews, appear in NCHS Series 10, *National Health Interview Survey Data*.

The CMS's *Health Care Financing Review* and its annual *Medicare and Medicaid Statistical Supplement* present data for hospitals and nursing homes as well as extended care facilities and home health agencies. These data are based on records of the medicare program and differ from those of other sources because they are limited to facilities meeting federal eligibility standards for participation in medicare.

**Disability and illness**—General health statistics, including morbidity, disability, injuries, preventive care, and findings from physiological testing are collected by NCHS in its National Health Interview Survey and its National Health and Nutrition Examination Surveys and appear in *Vital and Health Statistics*, Series 10 and 11, respectively. The Department of Labor compiles statistics on occupational injuries (see Section 12, Labor Force, Employment, and Wealth). Annual incidence data on notifiable diseases are compiled by the Public Health Service (PHS) at its Centers for Disease Control and Prevention in Atlanta, Georgia, and are published as a supplement to its *Morbidity and Mortality Weekly Report*. The list of diseases is revised annually and includes those which, by mutual agreement of the states and PHS, are communicable diseases of national importance.

**Nutrition**—Statistics on annual per capita consumption of food and its nutrient value are estimated by the U.S. Department of Agriculture and published quarterly in *National Food Review*. Historical data can be found in *Food Consumption, Prices, and Expenditures*, and online at <<http://www.ers.gov/data/consumption>>. Statistics on food insufficiency and food and nutrient intake are collected by NCHS to estimate the diet

of the nation's population. NCHS also collects physical examination data to assess the population's nutritional status, including growth, overweight/obesity, nutritional deficiencies, and prevalence of nutrition-related conditions, such as hypertension, hypercholesterolemia, and diabetes.

**Statistical reliability**—For discussion of statistical collection, estimation, and sampling procedures and measures of reliability applicable to data from NCHS and CMS, see Appendix III.

**No. 112. National Health Expenditures—Summary, 1960 to 2000, and Projections, 2001 to 2011**

[In billions of dollars (27 represents \$27,000,000,000) Includes Puerto Rico and outlying areas]

No. 121. Personal Health Care Expenditures by State, 1990 to 1998, and by Selected Object, 1998

[In millions of dollars (612,245 represents \$612,245,000,000). This series of state health expenditures (SHE) uses the same definitions and, to the extent possible, the same data sources as does the national health expenditures series. For health services this structure clusters spending according to the establishment providing those services. For retail purchases of medical products it groups spending according to product classification. Thus, SHE is establishment-based, grouping services together according to place of service or of product sale rather than according to type of service. Establishment-based expenditures are those in which spending is located in the state of the provider rather than in the beneficiary's state of residence. Because people are able to cross state borders to receive health care services, health care spending by provider location is not necessarily an accurate reflection of spending on behalf of persons residing in that state.]

## No. 127. Medicare Trust Funds: 1980 to 2001

[In billions of dollars (23.9 represents \$23,900,000,000)]

Type of trust fund	1980	1990	1995	1996	1997	1998	1999	2000	2001
<b>HOSPITAL INSURANCE (HI)</b>									
Net contribution income <sup>1</sup>	23.9	72.2	103.3	115.9	119.5	130.7	140.3	154.5	160.9
Interest received <sup>2</sup>	1.1	8.5	10.8	10.2	9.6	9.3	10.1	11.7	14.0
Benefit payments <sup>3</sup>	25.1	66.2	116.4	128.6	137.8	134.0	128.8	128.5	141.2
Assets, end of year	13.7	98.9	130.3	124.9	115.6	120.4	141.4	177.5	208.7
<b>SUPPLEMENTARY MEDICAL INSURANCE (SMI)</b>									
Net premium income	3.0	11.3	19.7	18.8	19.3	<sup>4</sup> 20.9	<sup>4</sup> 19.0	20.6	22.8
Transfers from general revenue	7.5	33.0	39.0	65.0	60.2	<sup>4</sup> 64.1	<sup>4</sup> 59.1	65.9	72.8
Interest received <sup>2</sup>	0.4	1.6	1.6	1.8	2.5	2.7	2.8	3.5	3.1
Benefit payments <sup>3</sup>	10.6	42.5	65.0	68.6	72.8	76.1	80.7	88.9	99.7
Assets, end of year	4.5	15.5	13.1	28.3	36.1	46.2	44.8	44.0	41.3

<sup>1</sup> Includes income from taxation of benefits beginning in 1995. Includes premiums from aged ineligible enrollees in HI.  
<sup>2</sup> Includes recoveries of amounts reimbursed from the trust fund. <sup>3</sup> Beginning 1998 monies transferred to the SMI trust fund for home health agency costs, as provided for by P.L. 105-33, are included in HI benefit payments but excluded from SMI benefit payments. <sup>4</sup> Premiums withheld from check and associated general revenue contributions that were to occur on Jan. 3, 1999, actually occurred on December 31, 1998. These amounts are therefore excluded from 1999 data.

NA Not available. <sup>1</sup> Persons who had payments made on their behalf at any time during the fiscal year. <sup>2</sup> Payments are for fiscal year and reflect federal and state contribution payments. Data exclude disproportionate hospital share payments. Disproportionate share hospitals receive higher medicaid reimbursement than other hospitals because they treat a disproportionate share of medicaid patients.

No. 134. State Children’s Health Insurance Program-Enrollment by State: 1999 to 2001

[In thousands (1,959 represents 1,959,000). For year ending September 30. Represents the number of children ever enrolled during the year. This program provides health benefits coverage to children living in families whose incomes exceed the eligibility limits for medicaid. Although it is generally targeted to families with incomes at or below 200 percent of the federal poverty level, each state may set its own income eligibility limits, within certain guidelines. States have three options: they may expand their medicaid programs, develop a separate child health program that functions independently of medicaid, or do a combination of both]

No. 135. Health Maintenance Organizations (HMOs): 1980 to 2001

[As of January 1, except 1980 as of June 30 (9.1 represents 9,100,000). An HMO is a prepaid health plan delivering comprehensive care to members through designated providers, having a fixed periodic payment for health care services, and requiring members to be in a plan for a specified period of time (usually 1 year). A group HMO delivers health services through a physician group that is controlled by the HMO unit or contracts with one or more independent group practices to provide health services. An individual practice association (IPA) HMO contracts directly with physicians in independent practice, and/or contracts with one or more associations of physicians in independent practice, and/or contracts with one or more multispecialty group practices. Data are based on a census of HMOs]

Model type	Number of plans						Enrollment <sup>1</sup> (mil.)

Persons below poverty . . . . .	31.1	21.9	8.6	5.8	4.6	12.3	9.2	70.4	27.8	39.8	29.6

<sup>1</sup> Includes other government insurance, not shown separately. Persons with coverage counted only once in total, even though they may have been covered by more than one type of policy. <sup>2</sup> Related to employment of self or other family members. <sup>3</sup> Beginning 1997 persons with no coverage other than access to Indian Health Service are no longer considered covered by health insurance; instead they are considered to be uninsured. The effect of this change on the overall estimates of health insurance coverage is negligible; however, the decrease in the number of people covered by medicaid may be partially due to this change. <sup>4</sup> Data based on 1990 census adjusted population controls. <sup>5</sup> Estimates reflect results of follow-up verification questions. <sup>6</sup> Includes other races not shown separately. <sup>7</sup> Persons of Hispanic origin may be of any race.

No. 138. Persons With and Without Health Insurance Coverage by State: 2000

[237,857 represents 237,857,000. Based on the Current Population Survey and subject to sampling error; see text, Section 1, Population, and Appendix III]

West . . . . .	54	39	25	44	56	42.50	26	74	156.11

<sup>1</sup> The average is presented for all covered workers and excludes workers without the plan provision. Averages are for plans stating a flat monthly cost. <sup>2</sup> Employees are classified as working either a full-time or part-time schedule based on the definition used by each establishment. <sup>3</sup> Union workers are those whose wages are determined through collective bargaining. <sup>4</sup> See map, inside front cover.

- Represents zero. Z Less than 0.5 percent. <sup>1</sup> A composite rate is a set contribution covering more than one benefit area; for example, health care and life insurance. Cost data for individual plans cannot be determined. <sup>2</sup> Based on worker attributes. For example, employee contributions may vary based on earnings, length of service, or age. <sup>3</sup> Amount varies by options selected under a "cafeteria plan" or employer-sponsored reimbursement account.

Hispanic	26.2	26.5	44.3	41.6	19.2	22.0	10.0	11.0

<sup>1</sup> Estimates are age adjusted to the year 2000 standard using six age groups: Under 18 years, 18-44 years, 45-64 years, 65-74 years, 75 years and over. <sup>2</sup> Estimates by race and Hispanic origin are tabulated using the 1997 Standards for Federal data on race and ethnicity. Estimates for specific race groups are shown when they meet requirements for statistical reliability and confidentiality. The categories "White only," "Black or African American only," "American Indian or Alaska Native (AI/AN) only," and "Asian only" include persons who reported only one racial group, and the category "two or more races" includes persons who reported more than one of the five racial groups in the 1997 Standards or one of the five racial groups and "Some other race."

No. 157. Hospital Use Rates by Type of Hospital: 1980 to 2000

Type of hospital	1980	1985	1990	1995	1997	1998	1999	2000
Community hospitals: <sup>1</sup>								
Admissions per 1,000 population <sup>2</sup>	159	141	125	116	116	115	116	117
Admissions per bed	37	33	34	35	37	38	39	40
Average length of stay <sup>3</sup> (days)	7.6	7.1	7.2	6.5	6.1	6.0	5.9	5.8
Outpatient visits per admission	5.6	6.5	9.7	13.4	14.3	14.9	15.3	15.8
Outpatient visits per 1,000 population <sup>2</sup>	890	919	1,207	1,556	1,651	1,719	1,775	1,848
Surgical operations (million <sup>4</sup> )	18.8	20.1	21.9	23.2	24.2	25.3	26.3	26.1
Number per admission	0.5	0.6	0.7	0.7	0.8	0.8	0.8	0.8
Nonfederal psychiatric:								
Admissions per 1,000 population <sup>2</sup>	2.5	2.5	2.9	2.7	2.7	2.7	2.4	2.4
Days in hospital per 1,000 population <sup>2</sup>	295	224	190	122	107	101	94	93

<sup>1</sup> For definition of community hospitals, see footnote 2, Table 154. <sup>2</sup> Based on U.S. Census Bureau estimated resident population as of July 1. Estimates reflect revisions based on the 2000 Census of Population. <sup>3</sup> Number of inpatient days divided by number of admissions. <sup>4</sup> 18.8 represents 18,800,000.

No. 158. Hospital Utilization Rates: 1980 to 2000

[37,832 represents 37,832,000. Represents estimates of inpatients discharged from noninstitutional, short-stay hospitals, exclusive of federal hospitals. Excludes newborn infants. Based on sample data collected from the National Hospital Discharge Survey, a sample survey of hospital records of patients discharged in year shown; subject to sampling variability. Comparisons beginning 1990 with data for 1980 should be made with caution as estimates of change may reflect improvements in the survey design rather than true changes in hospital use]

Item and sex	1980	1990	1994	1995	1996	1997	1998	1999	2000
Patients discharged (1,000)	37,832	30,788	30,843	30,722	30,545	30,914	31,827	32,132	31,706
Patients discharged per 1,000 persons, total <sup>1</sup>	168	122	117	116	114	114	117	117	114
Male	139	100	96	94	92	93	93	95	92
Female	194	143	138	136	135	135	139	138	135
Days of care per 1,000 persons, total <sup>1</sup>	1,217	784	674	620	597	582	589	581	560
Male	1,068	694	599	551	533	508	517	510	491
Female	1,356	869	745	686	657	653	658	649	627
Average stay (days)	7.3	6.4	5.7	5.4	5.2	5.1	5.1	5.0	4.9
Male	7.7	6.9	6.2	5.8	5.8	5.5	5.5	5.4	5.3
Female	7.0	6.1	5.4	5.0	4.9	4.8	4.7	4.7	4.6

<sup>1</sup> Based on U.S. Census Bureau estimated civilian population as of July 1. Estimates for 1980 do not reflect revisions based on the 1990 Census of Population. Beginning with 1997 data, rates are based on the U.S. Census Bureau estimates of the civilian population that have been adjusted for net underenumeration in the 1990 census. Since population estimates for the 2000 census were not available when this table was prepared, the 2000 population estimates were based on the 1990 census.

Malignant neoplasms	135	21.6	163	7.6					

<sup>1</sup> Based on Census Bureau estimated civilian population as of July 1. Population figures are adjusted for net underenumeration using the 1990 National Population Adjustment Matrix from the U.S. Census Bureau. <sup>2</sup> Average length of stay and rates per 1,000 population are age-adjusted to the year 2000 standard using six age groups; Under 18 years, 18-44 years, 45-54 years, 55-64 years, 65-74 years, and 75 years and over. <sup>3</sup> Includes other first-listed diagnoses not shown separately. <sup>4</sup> Excludes discharges from other types of facilities such as the Dept. of Veterans Affairs or long-term hospitals. <sup>5</sup> Estimates are considered unreliable. <sup>6</sup> Includes abuse, dependence, and withdrawal. Excludes discharges from other types of facilities such as the Dept. of Veterans Affairs or day treatment programs.

<sup>1</sup> Based on Census Bureau estimated civilian population as of July 1. Beginning 1999 population figures are adjusted for net underenumeration in the 1990 census using the 1990 National Population Adjustment Matrix from the Census Bureau. Since population estimates for the 2000 census were not available when this table was prepared the 2000 population estimates were based on the 1990 census. <sup>2</sup> Includes other types of surgical procedures not shown separately. <sup>3</sup> Beginning 1999 includes separately coded "insertion of stent." <sup>4</sup> Excluding skull, nose, and jaw. <sup>5</sup> Includes other nonsurgical procedures not shown separately. <sup>6</sup> Using contrast material. <sup>7</sup> Computerized axial tomography.

No. 163. Hospital Utilization Measures for HIV Patients: 1985 to 2000

[HIV represents human immunodeficiency virus. See headnote, Table 158]

Measure of utilization	Unit	1985	1990	1995	1998	1999	2000
Number of patients discharged <sup>1</sup> . . . . .	1,000 . . .	23	146	249	189	180	173
Rate of patient discharges . . . . .	Rate . . .	1.0	5.8	9.4	6.9	6.5	6.2
Number of days of care . . . . .	1,000 . . .	387	2,188	2,326	1,503	1,310	1,257
Rate of days of care <sup>2</sup> . . . . .	Rate . . .	16.3	86.9	87.6	55.0	47.5	45.2
Average length of stay <sup>3</sup> . . . . .	Days . . .	17.1	14.9	9.3	8.0	7.3	7.3

<sup>1</sup> Comparisons beginning 1990 with data for earlier years should be made with caution as estimates of change may reflect improvements in the 1988 sample design rather than true changes in hospital use. <sup>2</sup> Per 10,000 population. Based on Census Bureau estimated civilian population as of July 1. Population estimates for the 1980's do not reflect revised estimates based on the 1990 Census of Population. Beginning 1998, rates are based on civilian population estimates that have been adjusted for net underenumeration in the 1990 census. Since population estimates for the 2000 census were not available when this table was prepared, the 2000 population estimates were based on the 1990 census. <sup>3</sup> For similar data on all patients, see Table 158.

No. 170. Mental Health Facilities—Summary by Type of Facility: 1998

[Beds: 261.9 represents 261,900. Facilities, beds and inpatients as of year-end. Excludes private psychiatric office practice and psychiatric service modes of all types in hospitals or outpatient clinics of federal agencies other than U.S. Dept. of Veterans Affairs. Excludes data from Puerto Rico, Virgin Islands, Guam, and other territories.]

Type of facility	Number of facilities	Inpatient beds		Inpatients		Inpatient care episodes <sup>2</sup>
		Total (1,000)	Rate <sup>1</sup>	Total (1,000)	Rate <sup>1</sup>	
Total	3,729	261.9	97.3	215.9	80.3	2,099
Mental hospitals:						
State and county	229	63.5	23.6	57.0	21.2	186
Private <sup>3</sup>	809	67.1	24.9	51.9	19.3	527
General hospitals <sup>4</sup>	1,593	54.3	20.2	37.0	13.8	1,137
Veterans Administration <sup>5</sup>	123	13.3	4.9	10.9	4.0	128
Other <sup>6</sup>	975	63.7	23.7	59.1	22.0	121

<sup>1</sup> Rate per 100,000 population. Based on Census Bureau estimated civilian population as of July 1. <sup>2</sup> "Inpatient care episodes" is defined as the number of residents in inpatient facilities at the beginning of the year plus the total additions to inpatient facilities during the year. <sup>3</sup> Includes residential treatment centers for emotionally disturbed children. <sup>4</sup> Nonfederal hospitals with separate psychiatric services. <sup>5</sup> Includes U.S. Department of Veterans Affairs (VA) neuropsychiatric hospitals, VA general hospitals with separate psychiatric settings and VA freestanding psychiatric outpatient clinics. <sup>6</sup> Includes free-standing psychiatric outpatient facilities that provide only psychiatric outpatient services and other multiservice mental health facilities with two or more settings, which are not elsewhere classified, as well as freestanding partial care facilities which only provide psychiatric partial care services. Number of facilities data also include freestanding psychiatric partial care facilities.

No. 172. Injuries Associated With Consumer Products: 1999

[For products associated with more than 40,000 injuries in 1999. Estimates calculated from a representative sample of hospitals with emergency treatment departments in the United States. Data are estimates of the number of emergency room treated cases nationwide associated with various products. Product involvement does not necessarily mean the product caused the accident. Products were selected from the U.S. Consumer Product Safety Commission's National Electronic Injury Surveillance System]

Product	Number	Product	Number
Home workshop equipment:		Ceilings and walls	259,301
Saws (hand or power)	96,658	Household cabinets, racks, and shelves	240,629
Hammers	40,015	Nails, screws, tacks, or bolts	162,597
Household packaging and containers:		Windows	129,276
Household containers and packaging	196,111	Porches, balconies, open-side floors	139,105
Bottles and jars	75,581	Fences or fence posts	117,175
Housewares:		Home entertainment equipment:	
Knives	446,225	Televisions	40,634
Tableware and flatware	112,665	Personal use items:	
Home furnishing: <sup>1</sup>		Footwear	94,170
Beds	455,027	Jewelry	65,127
Tables	304,758	Yard and garden equipment:	
Chairs	292,406	Lawn mowers	70,640
Bathtubs and showers	195,324	Sports and recreation equipment:	
Ladders	163,138	Bicycles	595,679
Sofas, couches, davenports, etc.	120,653	Trampolines	98,889
Carpets, rugs	117,156	Swings or swing sets	79,893
Toilets	56,424	Playground climbing equipment	78,576
Home structures, construction: <sup>2</sup>		Swimming pools	81,809
Stairs or steps	1,029,418	All-terrain vehicles	84,800
Floors or flooring materials	1,024,522	Skateboards	59,964
Other doors (excl. garage)	331,344	Slides or sliding boards	51,423

<sup>1</sup> Includes accessories. <sup>2</sup> Includes materials.

No. 173. Costs of Unintentional Injuries: 2000

[512.4 represents \$512,400,000,000. Covers costs of deaths or disabling injuries together with vehicle accidents and fires]

Cost	Amount (bil. dol.)					Percent distribution				
	Total <sup>1</sup>	Motor vehicle	Work	Home	Other	Total <sup>1</sup>	Motor vehicle	Work	Home	Other
Total	512.4	201.5	131.2	111.9	82.6	100.0	100.0	100.0	100.0	100.0
Wage and productivity losses <sup>2</sup>	259.8	71.5	67.6	70.9	53.6	50.7	35.5	51.5	63.4	64.9
Medical expense	93.5	24.6	24.2	26.4	19.6	18.2	12.2	18.4	23.6	23.7
Administrative expenses <sup>3</sup>	72.6	48.0	22.3	4.9	4.5	14.2	23.8	17.0	4.4	5.4

<sup>1</sup> Statistical estimates for AIDS prevalence in 2000 among persons exposed to HIV through hemophilia/coagulation disorder or receipt of blood transfusion, blood components, or tissue are not presented, but are included in the exposure category "other." The relatively small number of AIDS cases in these categories in recent years does not provide information that results in reliable annual estimates of prevalence. <sup>2</sup> Less than 13 years old.

No. 179. Persons With Limitation of Activity Caused by Chronic Conditions: 1997 and 1999

[In percent. Limitation of activity is assessed by asking respondents a series of questions about limitations in their ability to perform activities usual for their age group because of a physical, mental, or emotional problem. Respondents are asked about limitations in activities of daily living, or instrumental activities of daily living, play, school, work, difficulty walking or remembering, and any other activity limitations. For reported limitations, the causal health conditions are determined and respondents are considered limited if one or more of these conditions is chronic. Based on the National Health Interview Survey, a sample survey of the civilian noninstitutionalized population; see Appendix III]

Characteristic	1997	1999	Characteristic	1997	1999
Total <sup>1 2</sup>	13.3	12.2	Male <sup>2</sup>	13.1	12.1
Under 18 years	6.6	6.0	Female <sup>2</sup>	13.4	12.2
18 to 44 years	7.0	6.3			
45 to 54 years	14.2	13.1	White, non-Hispanic <sup>2</sup>	13.2	12.3
55 to 64 years	22.2	21.1	Black, non-Hispanic <sup>2</sup>	17.0	15.3
65 to 74 years	30.0	27.5	Hispanic <sup>2 3</sup>	12.8	10.4
75 years and over	50.2	45.6	Mexican <sup>2 3</sup>	12.5	9.6

<sup>1</sup> Includes all other races not shown separately. <sup>2</sup> Estimates for all persons are age adjusted to the year 2000 standard using six age groups: Under 18 years, 18-44 years, 45-54 years, 55-64 years, 65-74 years, and 75 years and over. <sup>3</sup> Persons of Hispanic origin may be of any race.

No. 180. Persons 65 Years Old and Over With Limitation of Activity Caused by Chronic Conditions: 1997 to 1999

[In percent. Covers noninstitutionalized persons 65 years old and over. To determine activities of daily living (ADL) limitations respondents were asked "Because of a physical, mental, or emotional problem, does (this person) need the help of other persons with personal care needs, such as eating, bathing, dressing, or getting around inside this home?" Instrumental activities of daily living (IADL) were determined by asking respondents "Because of a physical, mental, or emotional problem, does (this person) need the help of other persons in handling routine needs, such as everyday household chores, doing necessary business, shopping, or getting around for other purposes?" See also headnote, Table 179]

Characteristic	Percent with ADL limitation			Percent with IADL limitation		
	1997	1998	1999	1997	1998	1999
Total <sup>1 2</sup>	6.7	6.3	6.3	13.7	13.5	12.4
65 to 74 years	3.4	3.3	3.1	6.9	7.1	6.2
75 years and over	10.4	9.6	9.9	21.2	20.5	19.1

1999 . . . . .	15,239				
2000, total . . . . .	13,428	2000, total . . . . .	1,000,896	Drug only . . . . .	287,008
Substance abuse treatment services . . . . .	8,147	Substance abuse treatment services . . . . .	668,835	Alcohol only . . . . .	222,193
Mental health services . . . . .	1,260	Mental health services . . . . .	54,936	Both alcohol & drug . . . . .	475,096
General health care . . . . .	381	General health care . . . . .	32,273	Total with a drug problem <sup>2</sup> . . . . .	762,104
Both substance abuse and mental health . . . . .	3,303	Both substance abuse and mental health . . . . .	226,326	Total with an alcohol problem <sup>3</sup> . . . . .	697,289
Other . . . . .	337	Other . . . . .	18,526		

<sup>1</sup> Includes clients at facilities that did not provide data on type of substance abuse problem treated. <sup>2</sup> The sum of clients with a drug problem and clients with both diagnoses. <sup>3</sup> The sum of clients with an alcohol problem and clients with both diagnoses.

Source: U.S. Substance Abuse and Mental Health Services Administration, *Uniform Facility Data Set (UFDS): Annual surveys for 1995, 1996, 1997, 1998, and 1999* and National Survey of Substance Abuse Treatment Services (N-SSATS) 2000.

## No. 182. Drug Use by Type of Drug and Age Group: 1999 and 2000

[In percent. Current users are those who used drugs at least once within month prior to this study. Based on a representative sample of the U.S. population age 12 and older, including persons living in households and in some group quarters such as dormitories and homeless shelters. Estimates are based on computer-assisted interviews of about 72,000 respondents. Subject to sampling variability; see source]

No. 183. Estimated Use of Selected Drugs by State: 1999

[15,193 represents 15,193,000. Current users are those persons 12 years old and over who used drugs at least once within month prior to this study. Based on national sample of respondents (see also headnote, Table 182). The state estimates were produced by combining the prevalence rate based on the state sample data and the prevalence rate based on a national regression model applied to local-area county and census block group/tract-level estimates from the state. The parameters of the regression model are estimated from the entire national sample. For comparison purposes, the data shown here display estimates for all 50 States and the District of Columbia utilizing the modeled estimates for all 51 areas]

<sup>1</sup> Any illicit drug indicates use at least once of marijuana/hashish, cocaine (including crack), inhalants, hallucinogens (including PCP and LSD), heroin, or any prescription-type psychotherapeutic used nonmedically. Any illicit drug other than marijuana indicates use at least once of any of these listed drugs, regardless of marijuana/hashish use; marijuana/hashish users who also have used any of the other listed drugs are included. <sup>2</sup> Binge use is defined as drinking five or more drinks on the same occasion on at least 1 day in the past 30 days. By "occasion" is means at the same time or within a couple hours of each other.

No. 185. Current Cigarette Smoking by Sex and State: 2000

[In percent. Current cigarette smoking is defined as persons who reported having smoked 100 or more cigarettes during their lifetime and who currently smoke every day or some days. Based on the Behavioral Risk Factor Surveillance System, a telephone survey of health behaviors of the civilian, noninstitutionalized U.S. population, 18 years old and over; for details, see source]

No. 187. Cancer—Estimated New Cases, 2002, and Survival Rates, 1980-82 to 1992-98

[1,285 represents 1,285,000. The 5-year relative survival rate, which is derived by adjusting the observed survival rate for expected mortality, represents the likelihood that a person will not die from causes directly related to their cancer within 5 years. Survival data shown are based on those patients diagnosed while residents of an area listed below during the time periods shown. Data are based on information collected as part of the National Cancer Institute's Surveillance, Epidemiology and End Results (SEER) program, a collection of population-based registries in Connecticut, New Mexico, Utah, Iowa, Hawaii, Atlanta, Detroit, Seattle-Puget Sound, and San Francisco-Oakland]

No. 190. Percent of U.S. Adults Who Were Overweight and Percent Who  
Were Obese: 1999

[Percent who are overweight includes those who are obese and represent those who have a body mass index (BMI) equal to or above 25. Percent who are obese represent those who have a BMI equal to or above 30. BMI is a measure that adjusts body weight for height. It is calculated as weight in kilograms divided by height in meters squared. These estimates are based on definitions provided in the *Dietary Guidelines for Americans*, published by the U.S. Dept. of Agriculture and the U.S. Dept. of Health and Human Services. Based on the National Health Interview Survey; for details, see Appendix III]

Characteristic	Both sexes		Males		Females	
	Overweight	Obese	Overweight	Obese	Overweight	Obese

No. 192. Households and Persons Having Problems With Access to Food: 1995 to 2000

[100,445 represents 100,445,000. Food secure means that a household had access at all times to enough food for an active healthy life, with no need for recourse to emergency food sources or other extraordinary coping behaviors to meet their basic food needs. A food insecure household did not have this same access to enough food to fully meet basic needs at all times. Food insecure households with hunger were those with one or more household members who were hungry at least sometime during the period due to inadequate resources for food. The omission of homeless persons may be a cause of underreporting. The Federal food security measure was developed through a collaborative process between private non-government experts, academic researchers, and a Federal interagency working group, with leadership from the U.S. Dept. of Agriculture and the U.S. Dept. of Health and Human Services. The severity of food insecurity and hunger in households is measured through a series of questions about experiences and behaviors known to characterize households that are having difficulty meeting basic food needs. These experiences and behaviors generally occur in an ordered sequence as the severity of food insecurity increases. As resources become more constrained, adults in typical households first worry about having enough food, then they stretch household resources and juggle other necessities, then decrease the quality and variety of household members' diets, then decrease the frequency and quantity of adults' food intake, and finally decrease the frequency and quantity of children's food intake. All questions refer to the previous 12 months and include a qualifying phrase reminding respondents to report only those occurrences that resulted from inadequate financial resources. Restrictions to food intake due to dieting or busy schedules are excluded. Data are from the Food Security Supplement to the Current Population Survey (CPS); for details about the CPS, see text, Section 1. Population, and Appendix III]

Household food security level	Number (1,000)				Percent distribution			
	1995	1998 <sup>1</sup>	1998 <sup>2</sup>	2000	1995	1998 <sup>1</sup>	1998 <sup>2</sup>	2000

No. 193. Nutrition—Nutrients in Foods Available for Civilian Consumption Per Capita Per Day: 1970 to 1999

[Computed by the Center for Nutrition Policy and Promotion (CNPP). Based on Economic Research Service (ERS) estimates of per capita quantities of food available for consumption from "Food Consumption, Prices, and, Expenditures," on imputed consumption data for foods no longer reported by ERS, and on CNPP estimates of quantities of produce from home gardens. Food supply estimates do not reflect loss of food or nutrients from further marketing or home processing. Enrichment and fortification levels of iron, zinc, thiamin, riboflavin, niacin, vitamin A, vitamin B<sub>6</sub>, vitamin B<sub>12</sub>, and ascorbic acid are included]

## Section 4

# Education

This section presents data primarily concerning formal education as a whole, at various levels, and for public and private schools. Data shown relate to the school-age population and school enrollment, educational attainment, education personnel, and financial aspects of education. In addition, data are shown for charter schools, computer usage in schools, distance education, and adult education. The chief sources are the decennial census of population and the Current Population Survey (CPS), both conducted by the U.S. Census Bureau (see text, Section 1, Population); annual, biennial, and other periodic surveys conducted by the National Center for Education Statistics (NCES), a part of the U.S. Department of Education; and surveys conducted by the National Education Association.

The censuses of population have included data on school enrollment since 1840 and on educational attainment since 1940. The CPS has reported on school enrollment annually since 1945 and on educational attainment periodically since 1947.

The NCES is continuing the pattern of statistical studies and surveys conducted by the U.S. Office of Education since 1870. The annual *Digest of Education Statistics* provides summary data on pupils, staff, finances, including government expenditures, and organization at the elementary, secondary, and higher education levels. It is also a primary source for detailed information on federal funds for education, projections of enrollment, graduates, and teachers. *The Condition of Education*, issued annually, presents a summary of information on education of particular interest to policymakers. NCES also conducts special studies periodically.

The census of governments, conducted by the Census Bureau every 5 years (for the years ending in "2" and "7"), provides data on school district finances and state and local government expenditures for education. Reports published by the

Bureau of Labor Statistics contain data relating civilian labor force experience to educational attainment (see also Tables 564, 590, and 598 in Section 12, Labor Force, Employment, and Earnings).

**Types and sources of data**—The statistics in this section are of two general types. One type, exemplified by data from the Census Bureau, is based on direct interviews with individuals to obtain information about their own and their family members' education. Data of this type relate to school enrollment and level of education attained, classified by age, sex, and other characteristics of the population. The school enrollment statistics reflect attendance or enrollment in any regular school within a given period; educational attainment statistics reflect the highest grade completed by an individual, or beginning 1992, the highest diploma or degree received.

Starting in October 1994, the CPS used 1990 census population controls plus adjustment for undercount. Also the survey changed from paper to computer assisted technology. For years 1981 through 1993, 1980 census population controls were used; 1971 through 1980, 1970 census population controls had been used. These changes had little impact on summary measures (e.g., medians) and proportional measures (e.g., enrollment rates); however, use of the controls may have significant impact on absolute numbers.

The second type, generally exemplified by data from the NCES and the National Education Association, is based on reports from administrators of educational institutions and of state and local agencies having jurisdiction over education. Data of this type relate to enrollment, attendance, staff, and finances for the nation, individual states, and local areas.

Unlike the NCES, the Census Bureau does not regularly include specialized vocational, trade, business, or correspondence

schools in its surveys. The NCES includes nursery schools and kindergartens that are part of regular grade schools in their enrollment figures. The Census Bureau includes all nursery schools and kindergartens. At the higher education level, the statistics of both agencies are concerned with institutions granting degrees or offering work acceptable for degree-credit, such as junior colleges.

**School attendance**—All states require that children attend school. While state laws vary as to the ages and circumstances of compulsory attendance, generally they require that formal schooling begin by age 6 and continue to age 16.

**Schools**—The NCES defines a school as “a division of the school system consisting of students composing one or more grade groups or other identifiable groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant.”

*Regular* schools are those which advance a person toward a diploma or degree. They include public and private nursery schools, kindergartens, graded schools, colleges, universities, and professional schools.

*Public* schools are schools controlled and supported by local, state, or federal governmental agencies; private schools are

those controlled and supported mainly by religious organizations or by private persons or organizations.

The Census Bureau defines *elementary* schools as including grades 1 through 8; *high* schools as including grades 9 through 12; and *colleges* as including junior or community colleges, regular 4-year colleges, and universities and graduate or professional schools. Statistics reported by the NCES and the National Education Association by type of organization, such as elementary level and secondary level, may not be strictly comparable with those from the Census Bureau because the grades included at the two levels vary, depending on the level assigned to the middle or junior high school by the local school systems.

**School year**—Except as otherwise indicated in the tables, data refer to the school year which, for elementary and secondary schools, generally begins in September of the preceding year and ends in June of the year stated. For the most part, statistics concerning school finances are for a 12-month period, usually July 1 to June 30. Enrollment data generally refer to a specific point in time, such as fall, as indicated in the tables.

**Statistical reliability**—For a discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to the Census Bureau and the NCES data, see Appendix III.

No. 198. School Enrollment: 1965 to 2011

[In thousands (54,394 represents 54,394,000). As of fall]

Year	All levels			K through grade 8		Grades 9 through 12		College <sup>1</sup>

No. 199. School Expenditures by Type of Control and Level of Instruction in Constant (2000-2001) Dollars: 1960 to 2001

[In billions of dollars (142.2 represents \$142,200,000,000). For school years ending in year shown. Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt and capital outlay. Data deflated by the Consumer Price Index, wage earners, and clerical workers through 1975; thereafter, all urban consumers, on a school year basis (supplied by the National Center for Education Statistics). See also Appendix A.]

Year	Elementary and secondary schools				Colleges and universities <sup>2</sup>		
	Total	Total	Public	Private <sup>1</sup>	Total	Public	Private
1960	142.2	99.6	93.0	6.6	42.6	23.3	19.3
1970	317.3	200.2	188.6	11.6	117.2	75.2	41.9
1975	367.4	232.7	219.2	13.5	134.6	91.2	43.4
1980	373.6	232.7	216.4	16.2	140.9	93.4	47.4

No. 220. Public Charter Schools—Selected Characteristics: 1999-2000

[A public charter school is a public school that, in accordance with an enabling state statute, has been granted a charter exempting it from selected state and local rules and regulations. All schools open as public charter schools during 1998-99 and still open in the 1999-2000 school year were surveyed. Based in the School and Staffing Survey; see source for details]

No. 223. Students Who Are Homeschooled by Selected Characteristics: 1999

[As of spring, (50,188 represents 50,188,000). For students 5 to 17 with a grade equivalent of K-12. Homeschoolers are students whose parents reported them to be schooled at home instead of a public or private school. Excludes students who were enrolled in school for more than 25 hours a week or were homeschooled due to a temporary illness. Based on the Parent Survey of the National Household Education Surveys Program; see source for details]

NA Not available. <sup>1</sup> Beginning 1980, number of institutions includes count of branch campuses. Due to revised survey procedures, data beginning 1990 are not comparable with previous years. Beginning 1996 data reflect a new classification of institutions; this classification includes some additional, primarily 2-year, colleges than before and excludes a few institutions that did not award degrees. Includes institutions that were eligible to participate in Title IV Federal financial aid programs. <sup>2</sup> Due to revised survey methods, data beginning 1990 not comparable with previous years. <sup>3</sup> Beginning 1980, branch campuses counted according to actual status, e.g., 2-year branch in 2-year category; previously a 2-year branch included in university category. <sup>4</sup> Includes unclassified students. (Students taking courses for credit, but are not candidates for degrees.) <sup>5</sup> Includes items not shown separately. <sup>6</sup> Data for 1970 are not strictly comparable with later years. <sup>7</sup> Beginning 1980, includes schools accredited by the National Association of Trade and Technical Schools. See footnote 1 for information pertaining to data beginning 1996.

# No. 282. Participation in Adult Education: 1994-95 and 1998-99

[In thousands (189,543 represents 189,543,000), except percent. For the civilian noninstitutional population 17 years old and over not enrolled full time in elementary or secondary school at the time of the survey. Adult education is considered any enrollment in any educational activity at any time in the prior 12 months, except full-time enrollment in a higher education credential program. Based on survey and subject to sampling error; see source for details]

## Law Enforcement, Courts, and Prisons

This section presents data on crimes committed, victims of crimes, arrests, and data related to criminal violations and the criminal justice system. The major sources of these data are the Bureau of Justice Statistics (BJS), the Federal Bureau of Investigation (FBI), and the Administrative Office of the U.S. Courts. BJS issues several reports, including *Sourcebook of Criminal Justice Statistics*, *Criminal Victimization in the United States*, *Prisoners in State and Federal Institutions*, *Children in Custody*, *Census of State Correctional Facilities and Survey of Prison Inmates*, *Census of Jails and Survey of Jail Inmates*, *Parole in the United States*, *Capital Punishment*, and the annual *Expenditure and Employment Data for the Criminal Justice System*. The Federal Bureau of Investigation's major annual reports are *Crime in the United States*, *Law Enforcement Officers Killed and Assaulted*, annual, and *Hate Crimes*, annual, which presents data on reported crimes as gathered from state and local law enforcement agencies.

### Legal jurisdiction and law enforcement

Law enforcement is, for the most part, a function of state and local officers and agencies. The U.S. Constitution reserves general police powers to the states. By act of Congress, federal offenses include only offenses against the U.S. government and against or by its employees while engaged in their official duties and offenses which involve the crossing of state lines or an interference with interstate commerce. Excluding the military, there are 52 separate criminal law jurisdictions in the United States: 1 in each of the 50 states, 1 in the District of Columbia, and the federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. While the systems of law enforcement are quite similar among the states, there are often substantial differences in the penalties for like offenses.

Law enforcement can be divided into three parts: Investigation of crimes and

arrests of persons suspected of committing them; prosecution of those charged with crime; and the punishment or treatment of persons convicted of crime.

**Crime**—There are two major approaches taken in determining the extent of crime. One perspective is provided by the FBI through its Uniform Crime Reporting Program (UCR). The FBI receives monthly and annual reports from law enforcement agencies throughout the country, currently representing 94 percent of the national population. Each month, city police, sheriffs, and state police file reports on the number of index offenses, hate crimes and law enforcement assaults that become known to them. Additionally, data are collected for officers killed in the line of duty.

The FBI Crime Index offenses are as follows: *Murder and nonnegligent manslaughter* is based on police investigations, as opposed to the determination of a medical examiner or judicial body, includes willful felonious homicides and excludes attempts and assaults to kill, suicides, accidental deaths, justifiable homicides, and deaths caused by negligence; *forcible rape* includes forcible rapes and attempts; *robbery* includes stealing or taking anything of value by force or violence or threat of force or violence and includes attempted robbery; *aggravated assault* includes assault with intent to kill; *burglary* includes any unlawful entry to commit a felony or a theft and includes attempted burglary and burglary followed by larceny; *larceny* includes theft of property or articles of value without use of force and violence or fraud and excludes embezzlement, "con games," forgery, etc.; *motor vehicle theft* includes all cases where vehicles are driven away and abandoned but excludes vehicles taken for temporary use and returned by the taker. Arson was added as the eighth Index offense in April 1979 following a Congressional mandate. *Arson* includes any willful or malicious burning

or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The monthly Uniform Crime Reports also contain data on crimes cleared by arrest and on characteristics of persons arrested for all criminal offenses. In summarizing and publishing crime data, the FBI depends primarily on the adherence to the established standards of reporting for statistical accuracy, presenting the data as information useful to persons concerned with the problem of crime and criminal law enforcement.

**National Crime Victimization Survey (NCVS)**—A second perspective on crime is provided by this survey of the Bureau of Justice Statistics. Details about the crimes come directly from the victims. No attempt is made to validate the information against police records or any other source.

The NCVS measures rape, robbery, assault, household and personal larceny, burglary, and motor vehicle theft. The NCVS includes offenses reported to the police, as well as those not reported.

Police reporting rates (percent of victimizations) varied by type of crime. In 1994, for instance, 32 percent of the rapes/sexual assaults were reported; 55 percent of the robberies; 40 percent of assaults; 33 percent of personal thefts; 51 percent of the household burglaries; and 78 percent of motor vehicle thefts.

Murder and kidnaping are not covered. Commercial burglary and robbery were dropped from the program during 1977. The so-called victimless crimes, such as drunkenness, drug abuse, and prostitution, also are excluded, as are crimes for which it is difficult to identify knowledgeable respondents or to locate data records.

Crimes of which the victim may not be aware also cannot be measured effectively. Buying stolen property may fall into this category, as may some instances of embezzlement. Attempted crimes of many types probably are under recorded

for this reason. Events in which the victim has shown a willingness to participate in illegal activity also are excluded.

In any encounter involving a personal crime, more than one criminal act can be committed against an individual. For example, a rape may be associated with a robbery or a household offense, such as a burglary, can escalate into something more serious in the event of a personal confrontation. In classifying the survey-measured crimes, each criminal incident has been counted only once—by the most serious act that took place during the incident and ranked in accordance with the seriousness classification system used by the Federal Bureau of Investigation. The order of seriousness for crimes against persons is as follows: Rape, robbery, assault, and larceny. Personal crimes take precedence over household offenses.

A *victimization*, basic measure of the occurrence of crime, is a specific criminal act as it affects a single victim. The number of victimizations is determined by the number of victims of such acts. Victimization counts serve as key elements in computing rates of victimization. For crimes against persons, the rates are based on the total number of individuals age 12 and over or on a portion of that population sharing a particular characteristic or set of traits. As general indicators of the danger of having been victimized during the reference period, the rates are not sufficiently refined to represent true measures of risk for specific individuals or households.

An *incident* is a specific criminal act involving one or more victims; therefore the number of incidents of personal crimes is lower than that of victimizations.

**Courts**—Statistics on criminal offenses and the outcome of prosecutions are incomplete for the country as a whole, although data are available for many states individually. The only national compilations of such statistics were made by the Census Bureau for 1932 to 1945 covering a maximum of 32 states and by the Bureau of Justice Statistics for 1986, 1988, 1990, and 1992 based on a nationally representative sample survey.

The bulk of civil and criminal litigation in the country is commenced and determined in the various state courts. Only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the federal courts may civil or criminal litigation be heard and decided by them. Generally, the federal courts have jurisdiction over the following types of cases: Suits or proceedings by or against the United States; civil actions between private parties arising under the Constitution, laws, or treaties of the United States; civil actions between private litigants who are citizens of different states; civil cases involving admiralty, maritime, or prize jurisdiction; and all matters in bankruptcy. The Administrative Office of the United States Courts has compiled statistics on the caseload of the federal courts annually since 1940.

There are several types of courts with varying degrees of legal jurisdiction. These jurisdictions include original, appellate, general, and limited or special. A court of original jurisdiction is one having the authority initially to try a case and pass judgment on the law and the facts; a court of appellate jurisdiction is one with the legal authority to review cases and hear appeals; a court of general jurisdiction is a trial court of unlimited original jurisdiction in civil and/or criminal cases, also called a "major trial court"; a court of limited or special jurisdiction is a trial court with legal authority over only a particular class of cases, such as probate, juvenile, or traffic cases.

The 94 federal courts of original jurisdiction are known as the U.S. district courts. One or more of these courts is established in every state and one each in the District of Columbia, Puerto Rico, the Virgin Islands, the Northern Mariana Islands, and Guam. Appeals from the district courts are taken to intermediate appellate

courts of which there are 13, known as U.S. courts of appeals and the United States Court of Appeals for the Federal Circuit. The Supreme Court of the United States is the final and highest appellate court in the federal system of courts.

**Juvenile offenders**—For statistical purposes, the FBI and most states classify as juvenile offenders persons under the age of 18 years who have committed a crime or crimes.

Delinquency cases are all cases of youths referred to a juvenile court for violation of a law or ordinance or for seriously "anti-social" conduct. Several types of facilities are available for those adjudicated delinquent, ranging from the short-term physically unrestricted environment to the long-term very restrictive atmosphere.

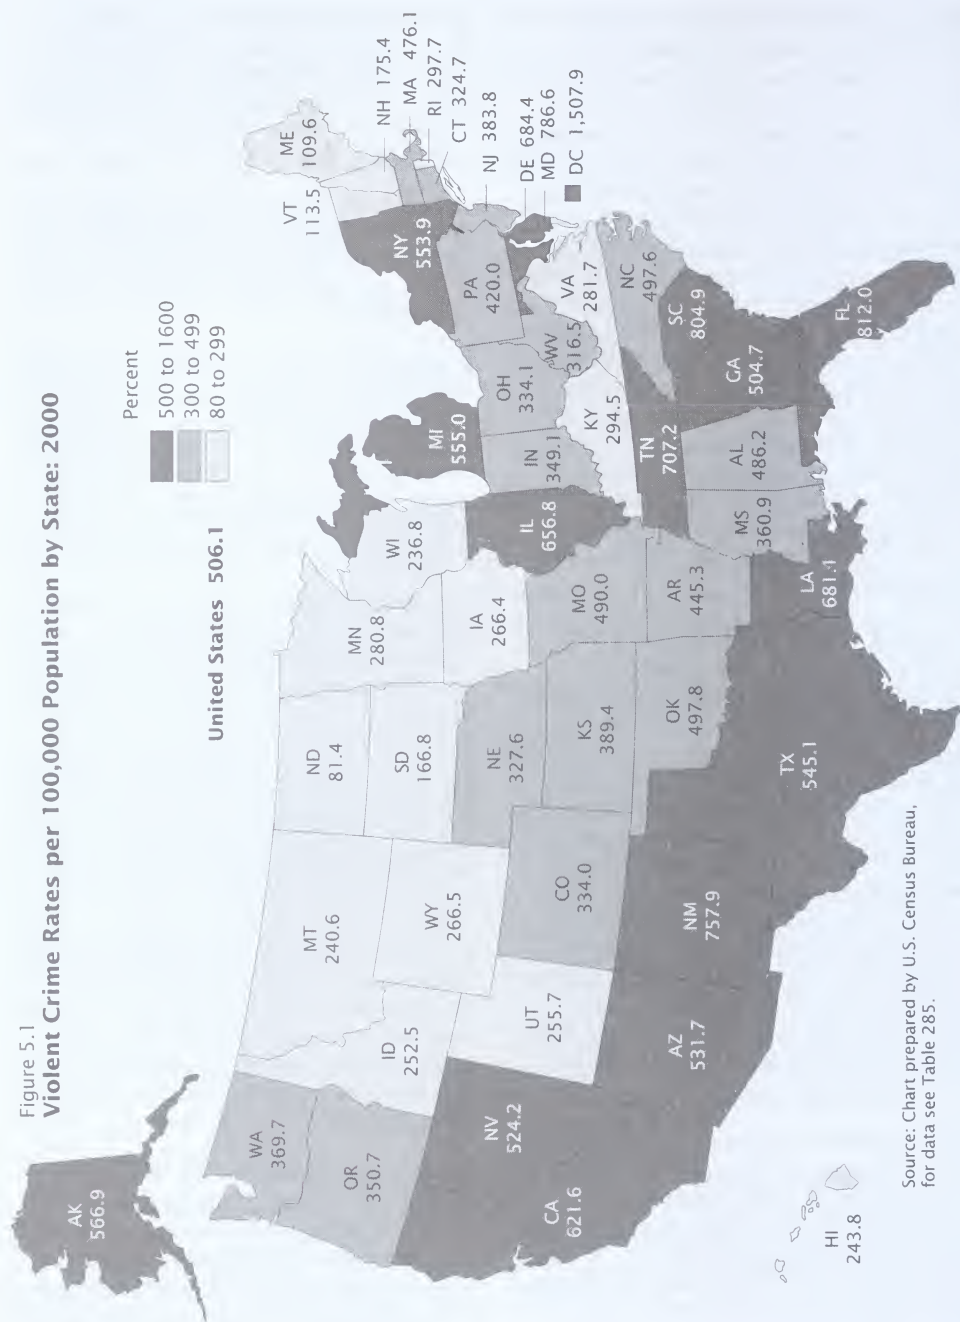

**Prisoners**—Data on prisoners in federal and state prisons and reformatory were collected annually by the Census Bureau until 1950, by the Federal Bureau of Prisons until 1971, transferred then to the Law Enforcement Assistance Administration, and, in 1979, to the Bureau of Justice Statistics. Adults convicted of criminal activity may be given a prison or jail sentence. A *prison* is a confinement facility having custodial authority over adults sentenced to confinement of more than 1 year. A *jail* is a facility, usually operated by a local law enforcement agency, holding persons detained pending adjudication and/or persons committed after adjudication to 1 year or less. Nearly every state publishes annual data either for its whole prison system or for each separate state institution.

**Statistical reliability**—For discussion of statistical collection, estimation and sampling procedures, and measures of statistical reliability pertaining to the National Crime Victimization Survey and Uniform Crime Reporting Program, see Appendix III.

Figure 5.1

# Violent Crime Rates per 100,000 Population by State: 2000

<sup>1</sup> Includes nonnegligent manslaughter. <sup>2</sup> Forcible rape figures furnished by the state-level uniform crime reporting (UCR) Program administered by the Delaware State Bureau of Investigation were not in accordance with the national UCR guidelines; therefore, it was necessary that the forcible rape count be estimated. <sup>3</sup> Includes offenses reported by the police at the National Zoo. <sup>4</sup> Complete data were not available; therefore, it was necessary for the crime counts to be estimated for Illinois, Kansas, Kentucky, and Montana, for all years shown, for Maine in 1999, and for New Hampshire and Wisconsin for 1998.

No. 289. Homicide Victims by Race and Sex: 1980 to 1999

[Rates per 100,000 resident population in specified group. Excludes deaths to nonresidents of United States. Deaths classified according to the tenth revision of the *International Classification of Diseases as of 1999*; see text, Section 2, Vital Statistics]

Year	Homicide victims						Homicide rate <sup>2</sup>					
	White			Black			White			Black		
	Total <sup>1</sup>	Male	Female	Male	Female		Total <sup>1</sup>	Male	Female	Male	Female	
1980 . . . . .	24,278	10,381	3,177	8,385	1,898	10.7	10.9	3.2	66.6	13.5		
1985 . . . . .	19,893	8,122	3,041	6,616	1,666	8.3	8.2	2.9	48.4	11.0		
1990 . . . . .	24,932	9,147	3,006	9,981	2,163	10.0	9.0	2.8	69.2	13.5		
1992 . . . . .	25,488	9,456	3,012	10,131	2,187	10.0	9.1	2.8	67.5	13.1		
1993 . . . . .	26,009	9,054	3,232	10,640	2,297	10.1	8.6	3.0	69.7	13.6		
1994 . . . . .	24,926	9,055	2,921	10,083	2,124	9.6	8.5	2.6	65.1	12.4		
1995 . . . . .	22,895	8,336	3,028	8,847	1,936	8.7	7.8	2.7	56.3	11.1		
1996 . . . . .	20,971	7,570	2,747	8,183	1,800	7.9	7.0	2.5	51.5	10.2		
1997 . . . . .	19,846	7,343	2,570	7,601	1,652	7.4	6.7	2.3	47.1	9.3		
1998 . . . . .	18,272	6,707	2,534	6,873	1,547	6.8	6.1	2.2	42.1	8.6		
1999 <sup>3</sup> . . . . .	16,889	6,162	2,466	6,214	1,434	6.2	5.6	2.2	37.5	7.8		

<sup>1</sup> Includes races not shown separately.    <sup>2</sup> Rate based on enumerated population figures as of April 1 for 1980 and 1990; July 1 estimates for other years.    <sup>3</sup> Effective with data for 1999, causes of death are classified by The Tenth Revision International Classification of Diseases (ICD-10), replacing the Ninth Revision (ICD-9) used for 1979-98 data. Breaks in the comparability of some cause of death statistics result from changes in category titles, changes in the structure and content of the classification, and changes in coding rules used to select the underlying cause of death. In ICD-9, the category Homicide also includes death as a result of legal intervention. ICD-10 has two separate categories for these two causes of death. Some caution should be used in comparing data between 1998 and 1999.

No. 292. Hate Crimes—Number of Incidents, Offenses, Victims, and Known Offenders by Bias Motivation: 2000

[The FBI collected statistics on hate crimes from 11,720 law enforcement agencies representing over 238 million inhabitants in 2000. Hate crime offenses cover incidents motivated by race, religion, sexual orientation, ethnicity/national origin, and disability]

Bias motivation	Incidents reported	Offenses	Victims <sup>1</sup>	Known offenders <sup>2</sup>
Total bias motivations	8,224	9,638	10,140	7,705
Race, total	4,433	5,300	5,532	4,559
Anti-White	910	1,093	1,125	1,202
Anti-Black	2,937	3,482	3,609	2,865
Anti-American Indian/Alaskan native	59	64	66	60
Anti-Asian/Pacific Islander	282	322	347	275
Anti-multiracial group	245	339	385	157
Ethnicity/national origin, total	921	1,180	1,232	1,030
Anti-Hispanic	566	749	777	711
Anti-other ethnicity/national origin	355	431	455	319
Religion, total	1,493	1,581	1,726	598
Anti-Jewish	1,121	1,177	1,285	419
Anti-Catholic	57	62	64	33
Anti-Protestant	59	62	62	23
Anti-Islamic	29	34	37	21
Anti-other religious group	174	189	212	79
Anti-multireligious group	49	51	59	22
Anti-atheism/agnosticism/etc	4	6	7	1
Sexual orientation, total	1,332	1,524	1,596	1,474
Anti-male homosexual	905	1,033	1,070	1,098
Anti-female homosexual	192	227	244	177
Anti-homosexual	188	217	233	159
Anti-heterosexual	26	26	28	25
Anti-bisexual	21	21	21	15
Disability, total	38	38	38	36
Anti-physical	20	20	20	22
Anti-mental	18	18	18	14
Multiple bias	7	15	16	8

<sup>1</sup> The term "victim" may refer to a person, business, institution, or a society as a whole. <sup>2</sup> The term "known offender" does not imply that the identity of the suspect is known, but only that an attribute of the suspect is identified which distinguishes him/her from an unknown offender.

No. 320. Child Abuse and Neglect Cases Substantiated and Indicated—Victim Characteristics: 1990 to 2000

[Based on reports alleging child abuse and neglect that were referred for investigation/assessment by the respective child protective services agency in each state. The reporting period may be either calendar or fiscal year. Children are counted each time they were subjects of an investigation report. In 2000, the data are from 49 states. Victims are children whose alleged maltreatments have been substantiated, indicated, or assessed as maltreatments. A substantiated case represents a type of investigation disposition that determines that there is sufficient evidence under state law to conclude that maltreatment occurred or that the child is at risk of maltreatment. An indicated case represents a type of disposition that concludes that there was a reason to suspect maltreatment had occurred. An alternative response-victim case represents a type of disposition that identifies child as a victim within the alternative response system.]

Item	1990		1998		1999		2000	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent

- Represents zero. NA Not available. <sup>1</sup> The number of investigations includes assessments. The number of investigations is based on the total number of investigations that received a disposition in 2000. <sup>2</sup> The number of Children Subject of an Investigation of Assessment is based on the total number of children for whom an alleged maltreatment was substantiated, indicated, or assessed to have occurred or the child was at risk of occurrence. <sup>3</sup> Victims are defined as children subject of a substantiated, indicated, or alternative response-victim maltreatment. <sup>4</sup> Includes estimates for states that did not report.

Source of Tables 320 and 321: U.S. Department of Health and Human Services, Administration on Children, Youth and Families. *Child Maltreatment 2000* (Washington, DC: U. S. Government Printing Office, 2001).

No. 322. Jail Inmates by Sex, Race, and Hispanic Origin: 1990 to 2001

[As of June 30. Excludes federal and state prisons or other correctional institutions; institutions exclusively for juveniles; state-operated jails in Alaska, Connecticut, Delaware, Hawaii, Rhode Island, and Vermont; and other facilities which retain persons for less than 48 hours. Data based on the Annual Survey of Jails, which is a sample survey and subject to sampling variability]

- Represents or rounds to zero. NA Not available. <sup>1</sup> State-level data excludes federal inmates. <sup>2</sup> Includes both jail and prison inmates (state has combined jail and prison system). <sup>3</sup> Numbers are for custody rather than jurisdiction counts. <sup>4</sup> 1980 and 1990, data are for custody counts; thereafter, jurisdiction counts are reported. <sup>5</sup> Reporting criteria were expanded in 1999 to include home confinement clients in supervised custody facilities. Comparable counts for 1998 were not available. <sup>6</sup> Reporting criteria changed in 1999; percent calculated based on counts adjusted for comparable reporting.

## Geography and Environment

This section presents a variety of information on the physical environment of the United States, starting with basic area measurement data and ending with climatic data for selected weather stations around the country. The subjects covered between those points are mostly concerned with environmental trends but include related subjects such as land use, water consumption, air pollutant emissions, toxic releases, oil spills, hazardous waste sites, municipal waste and recycling, threatened and endangered wildlife, and the environmental industry.

The information in this section is selected from a wide range of federal agencies that compile the data for various administrative or regulatory purposes, such as the Environmental Protection Agency, U.S. Geological Survey, National Oceanic and Atmospheric Administration (NOAA), Natural Resources Conservation Service, and General Services Administration.

**Area**—For the 2000 census, area measurements were calculated by computer based on the information contained in a single, consistent geographic database, the TIGER® database, rather than relying on historical, local, and manually calculated information. New information from the 2000 census may be found in Table 335.

**Geography**—The U.S. Geological Survey conducts investigations, surveys, and research in the fields of geography, geology, topography, geographic information systems, mineralogy, hydrology, and geothermal energy resources as well as natural hazards. The U.S. Geological Survey provides United States cartographic data through the Earth Sciences Information Center, water resources data through the National Water Data Exchange (NAWDEX), and a variety of research and Open-File reports which are announced monthly in *New Publications of the U.S. Geological Survey*.

In a joint project with the U.S. Census Bureau, during the 1980s, the U.S. Geological Survey provided the basic information on geographic features for input into a national geographic and cartographic database prepared by the Census Bureau, called the TIGER® (Topologically Integrated Geographic Encoding and Referencing) database. Since then, using a variety of sources, the Census Bureau has updated these features and their related attributes (names, descriptions, etc.) and inserted current information on the boundaries, names, and codes of legal and statistical geographic entities; very few of these updates added aerial water features, however. Maps prepared by the Census Bureau using the TIGER database show the names and boundaries of entities and are available on a current basis.

The Census Bureau maintains a current inventory of governmental units and their legal boundaries primary through its Boundary and Annexation Survey. The information is available to the public in the several files, all available on line: TIGER/Line®, there are also several series of maps for Census 2000: P.L. County Block Maps, Census Tract Outline Maps, and Voting District/ State Legislative District Outline Maps. These maps can be obtained online via the American Fact-Finder.

An inventory of the nation's land resources by type of use/cover was conducted by the National Resource Recovery Conservation Service (formerly the Soil Conservation Service) every 5 years beginning in 1982. The most recent survey results, which were published in the 1997 National Resources Inventory, cover all nonfederal land in Puerto Rico, the Virgin Islands, and the United States except Alaska. Tables 337 and 338 provide results from the survey.

**Environment**—The principal federal agency responsible for pollution abatement and control activities is the Environmental Protection Agency (EPA). It is

responsible for establishing and monitoring national air quality standards, water quality activities, solid and hazardous waste disposal, and control of toxic substances. Many of these series now appear on the EPA Web site at the Center for Environmental Information and Statistics and can be accessed at <<http://www.epa.gov/ceis/>>.

National Ambient Air Quality Standards (NAAQS) for suspended particulate matter, sulfur dioxide, photochemical oxidants, carbon monoxide, and nitrogen dioxide were originally set by the EPA in April 1971. Every 5 years, each of the NAAQS is reviewed and revised if new health or welfare data indicates that a change is necessary. The standard for photochemical oxidants, now called ozone, was revised in February 1979. Also, a new NAAQS for lead was promulgated in October 1978 and for suspended particulate matter in 1987. Table 347 gives some of the health-related standards for the six air pollutants having NAAQS. Data gathered from state networks are periodically submitted to EPA's National Aerometric Information Retrieval System (AIRS) for summarization in annual reports on the nationwide status and trends in air quality; for details, see *National Air Quality and Emissions Trends Report*. More current information on emissions may be found on the EPA Web site at <<http://www.epa.gov/ttn/chief/trends>>.

The Toxics Release Inventory (TRI), published by the U.S. EPA, is a valuable source of information regarding toxic chemicals that are being used, manufactured, treated, transported, or released into the environment. Two rules, Section 313 of the Emergency Planning and Community Right-To-Know Act (EPCRA) and Section 6607 of the Pollution Prevention Act (PPA), mandate that a publicly accessible toxic chemical database be developed and maintained by U.S. EPA. This database, known as the TRI, contains

information concerning waste management activities and the release of toxic chemicals by facilities that manufacture, process, or otherwise use said materials.

Data on the release of these chemicals are collected from manufacturing facilities and facilities added in 1998 that have the equivalent of 10 or more full-time employees and meet the established thresholds for manufacturing, processing, or "otherwise use" of listed chemicals. Facilities must report their releases and other waste management quantities. Federal facilities have been required to report since 1994, regardless of industry classification. In May 1997, EPA added seven new industry sectors that reported to the TRI for the first time in July 1999 for the 1998 reporting year.

**Climate**—NOAA, through the National Weather Service and the National Environmental Satellite, Data, and Information Service, is responsible for data on climate. NOAA maintains about 11,600 weather stations, of which over 3,000 produce autographic precipitation records, about 600 take hourly readings of a series of weather elements, and the remainder record data once a day. These data are reported monthly in the *Climatological Data* and *Storm Data*, published monthly, and annually in the *Local Climatological Data* (published by location for major cities).

The normal climatological temperatures, precipitation, and degree days listed in this publication are derived for comparative purposes and are averages for the 30-year period, 1971-2000. For stations that did not have continuous records for the entire 30 years from the same instrument site, the normals have been adjusted to provide representative values for the current location. The information in all other tables is based on data from the beginning of the record at that location through 2000, except as noted.

No. 340. U.S. Wetland Resources and Deepwater Habitats by Type: 1986 and 1997

[In thousands of acres (144,673.3 represents 144,677,300). Wetlands and deepwater habitats are defined separately because the term wetland does not include permanent water bodies. Deepwater habitats are permanently flooded land lying below the deepwater boundary of wetlands. Deepwater habitats include environments where surface water is permanent and often deep, so that water, rather than air, is the principal medium within which the dominant organisms live, whether or not they are attached to the substrate. As in wetlands, the dominant plants are hydrophytes; however, the substrates are In general terms, wetlands are lands where saturation with water is the dominant factor determining the nature of soil development and the types of plant and animal communities living in the soil and on its surface. The single feature that most wetlands share is soil or substrate that is at least periodically saturated with or covered by water. Wetlands are lands transitional between terrestrial and aquatic systems where the water table is usually at or near the surface or the land is covered by shallow water]

Wetland or deepwater category	1986	1997	Change, 1986 to 1997
All wetlands and deepwater habitats, total . . . . .	144,673.3	144,136.8	-536.5
All deepwater habitats, total . . . . .	38,537.6	38,645.1	107.5
Lacustrine <sup>1</sup> . . . . .	14,608.9	14,725.3	116.4
Riverine <sup>2</sup> . . . . .	6,291.1	6,255.9	-35.2
Estuarine subtidal <sup>3</sup> . . . . .	17,637.6	17,663.9	26.3
All wetlands, total . . . . .	106,135.7	105,491.7	-644
Intertidal wetlands <sup>4</sup> . . . . .	5,336.6	5,326.2	-10.4
Marine intertidal . . . . .	133.1	130.9	-2.2
Estuarine intertidal nonvegetated . . . . .	580.4	580.1	-0.3
Estuarine intertidal vegetated . . . . .	4,623.1	4,615.2	-7.9
Freshwater wetlands . . . . .	100,799.1	100,165.5	-633.6
Freshwater nonvegetated . . . . .	5,251.0	5,914.3	663.3
Freshwater vegetated . . . . .	95,548.1	94,251.2	-1,296.9
Freshwater emergent <sup>5</sup> . . . . .	26,383.3	25,157.1	-1,226.2
Freshwater forested <sup>6</sup> . . . . .	51,929.6	50,728.5	-1,201.1
Freshwater shrub <sup>7</sup> . . . . .	17,235.2	18,365.6	1,130.4

<sup>1</sup> The lacustrine system includes deepwater habitats with all of the following characteristics: (1) situated in a topographic depression or a dammed river channel; (2) lacking trees, shrubs, persistent emergents, emergent mosses or lichens with greater than 30 percent coverage; (3) total area exceeds 20 acres. <sup>2</sup> The riverine system includes deepwater habitats contained within a channel, with the exception of habitats with water containing ocean derived salts in excess of 0.5 parts per thousand. <sup>3</sup> The estuarine system consists of deepwater tidal habitats and adjacent tidal wetland that are usually semi-enclosed by land but have open, partly obstructed, or sporadic access to the open ocean, and in which ocean water is at least occasionally diluted by freshwater runoff from the land. Subtidal is where the substrate is continuously submerged by marine or estuarine waters. <sup>4</sup> Intertidal is where the substrate is exposed and flooded by tides. Intertidal includes the splash zone of coastal waters. <sup>5</sup> Emergent wetlands are characterized by erect, rooted, herbaceous hydrophytes, excluding mosses and lichens. This vegetation is present for most of the growing season in most years. These wetlands are usually dominated by perennial plants. <sup>6</sup> Forested wetlands are characterized by woody vegetation that is 20 feet tall or taller. <sup>7</sup> Shrub wetlands include areas dominated by woody vegetation less than 20 feet tall. The species include true shrubs, young trees, and trees or shrubs that are small or stunted because of environmental conditions.

No. 345. U.S. Water Quality Conditions by Type of Waterbody: 1998

[Section 305(b) of the Clean Water Act requires states and other jurisdictions to assess the health of their waters and the extent to which their waters support water quality standards. Section 305(b) requires that states submit reports describing water quality conditions to the Environmental Protection Agency every 2 years. Water quality standards have three elements (designated uses, criteria developed to protect each use, and an antidegradation policy. For information on survey methodology and assessment criteria, see report]

NA Not available. <sup>1</sup> Includes waterbodies accessed as not attainable for one or more uses. Most states do not assess all their waterbodies during the 2-year reporting cycle, but use a “rotating basin approach” whereby all waters are monitored over a set period of time. <sup>2</sup> Based on assessment of available data, water quality supports all designated uses. Water quality meets narrative and/or numeric criteria adopted to protect and support a designated use. <sup>3</sup> Although all assessed uses are currently met, data show a declining trend in water quality. Projections based on this trend indicate water quality will be impaired in the future, unless action is taken to prevent further degradation. <sup>4</sup> Impaired or not attainable. The reporting state or jurisdiction has performed a “use-attainability analysis” and demonstrated that support of one or more designated beneficial uses is not attainable due to specific biological, chemical, physical, or economic/social conditions. <sup>5</sup> Excludes unknown and natural sources.

No. 347. National Ambient Air Pollutant Concentrations: 1990 to 1999

[Data represent annual composite averages of pollutant based on daily 24-hour averages of monitoring stations, except carbon monoxide is based on the second-highest, nonoverlapping, 8-hour average; ozone, average of the second-highest daily maximum 1-hour value; and lead, quarterly average of ambient lead levels. Based on data from the Aerometric Information Retrieval System.  $\mu\text{g}/\text{m}^3$ =micrograms of pollutant per cubic meter of air; ppm=parts per million]

Pollutant	Unit	Monitoring stations, number	Air quality standard <sup>1</sup>	1990	1994	1995	1996	1997	1998	1999
Carbon monoxide	ppm	388	<sup>2</sup> 9	5.8	5.1	4.6	4.3	3.9	3.8	3.7
Ozone	ppm	703	<sup>3</sup> 0.12	0.112	0.107	0.112	0.105	0.105	0.110	0.107
Ozone	ppm	705	<sup>4</sup> 0.08	0.085	0.084	0.087	0.083	0.082	0.086	0.085
Sulfur dioxide	ppm	480	0.03	0.0081	0.0069	0.0056	0.0056	0.0054	0.0053	0.0052
Particulates (PM-10)	$\mu\text{g}/\text{m}^3$	954	<sup>5</sup> 50	29.2	26.0	24.8	23.9	23.8	23.6	23.9

### No. 352. Generation and Recovery of Selected Materials in Municipal Solid Waste: 1980 to 2000

[In millions of tons (151.6 represents 151,600,000), except as indicated. Covers post-consumer residential and commercial solid wastes which comprise the major portion of typical municipal collections. Excludes mining, agricultural and industrial processing, demolition and construction wastes, sewage sludge, and junked autos and obsolete equipment wastes. Based on material-flows estimating procedure and wet weight as generated]

- Represents zero. NA Not available. <sup>1</sup> Source: U.S. National Weather Service, Internet site <<http://www.spc.noaa.gov/climo/torn/monthlytornstats.html>> (accessed 06 June 2002). A violent, rotating column of air descending from a cumulonimbus cloud in the form of a tubular- or funnel-shaped cloud, usually characterized by movements along a narrow path and wind speeds from 100 to over 300 miles per hour. Also known as a "twister" or "waterspout." <sup>2</sup> Source: National Hurricane Center (NHC), Coral Gables, FL, unpublished data. For data on individual hurricanes, see the NHC web site at <<http://www.nhc.noaa.gov/>>. Tropical storms have maximum winds of 39 to 73 miles per hour; hurricanes have maximum winds of 74 miles per hour or higher.

No. 361. Major U.S. Weather Disasters: 1980 to 2001

[5.0 represents \$5,000,000,000. Covers only weather related disasters costing \$1 billion or more]

Event	Description	Estimated cost			Deaths
		Time period	(bil. dol.)		
Tropical Storm Allison . . .	Tropical storm produced rainfall & severe flooding in coastal portions of TX & LA & damage also in MS, FL, VA, & PA .	June 2001	5.0		43
Midwest and Ohio Valley hail and tornadoes . . . . .	Storms, tornadoes, and hail in TX, OK, KS, NE, IA, MO, IL, IN, WI, MI, OH, KY, and PA . . . . .	April 2001	1.7		3
Southern drought/heat wave . . . . .	Severe drought and heat over south-central and south-eastern states cause significant agricultural losses. . . . .	Spring-summer 2000	Over 4.0		140
Western fire season . . . . .	Severe fire season in western states due to drought and frequent winds . . . . .	Spring-summer 2000	Over 2.0		-
Hurricane Floyd . . . . .	Category 2 hurricane in NC, causing severe flooding in NC and some flooding in SC, VA, MD, PA, NY, NJ, DE, RI, CT, MA, and VT . . . . .	Sept. 1999	6.0		75
Drought/heat wave . . . . .	Drought/heatwave over eastern U.S. . . . .	Summer 1999	1.0		256
OK-KS tornadoes . . . . .	Category F4-F5 tornados hit OK, KS, TX, and TN . . . . .	May 1999	1.0		55
AR-TN tornadoes . . . . .	Two outbreaks of tornadoes in 6-day period . . . . .	January 1999	1.3		31
Texas flooding . . . . .	Severe flooding in southeast Texas from 2 heavy rain events with 10-20 in. totals . . . . .	Oct.-Nov. 1998	1.0		31
Hurricane Georges . . . . .	Category 2 hurricane in Puerto Rico, Florida Keys, and Gulf coasts of LA, MS, AL, and FL . . . . .	Sept. 1998	3-4		16
Hurricane Bonnie . . . . .	Category 3 hurricane in eastern NC and VA . . . . .	August 1998	1.0		2
Southern drought/heat wave . . . . .	Severe drought and heat wave from TX/OK eastward to the Carolinas . . . . .	Summer 1998	6.0		200
Minnesota severe storms/hail. . . . .	Very damaging severe thunderstorms with large hail over wide areas of Minnesota. . . . .	May 1998	1.5		1
Southeast severe weather . . . . .	Tornadoes and flooding related to strong El Nino in the southeast . . . . .	Winter/spring 1998	1.0	Over 130	
Northeast ice storm . . . . .	Intense ice storm hits ME, NH, VT, and NY . . . . .	January 1998	1.4		16
Northern plains flooding. . . . .	Severe flooding in Dakotas and MN due to heavy spring snowmelt . . . . .	April-May 1997	2.0		11
MS and OH valleys flooding and tornadoes . . . . .	Tornadoes and severe flooding hit the states of AR, MO, MS, TN, IL, IN, KY, OH, and WV . . . . .	March 1997	1.0		67
West Coast flooding . . . . .	Flooding from rains & snowmelt in CA, WA, OR, ID, NV, & MT. . . . .	Dec. 1996-Jan. 1999	2-3		36
Hurricane Fran. . . . .	Category 3 hurricane in NC and VA . . . . .	Sept. 1996	5.0		37
Southern Plains severe drought. . . . .	Drought in agricultural areas of TX & OK . . . . .	Fall 1995-summer 1996	Over 4	(NA)	
Pacific Northwest severe flooding . . . . .	Flooding from heavy rain & snowmelt in OR, WA, ID, and MT. . . . .	Feb. 1996	1.0		9
Blizzard of '96 followed by flooding . . . . .	Heavy snowstorm followed by severe flooding in Appalachians, Mid-Atlantic, and Northeast . . . . .	Jan. 1996	3.0		187
Hurricane Opal . . . . .	Category 3 hurricane in FL, AL, parts of GA, TN, & Carolinas. . . . .	Oct. 1995	Over 3		27
Hurricane Marilyn. . . . .	Category 2 hurricane in Virgin Islands . . . . .	Sept. 1995	2.1		13
TX/OK/LA/MS severe weather and flooding. . . . .	Flooding, hail, & tornadoes across TX, OK, parts of LA, MS, Dallas & New Orleans hardest hit . . . . .	May 1995	5-6		32
California flooding. . . . .	Flooding from frequent winter storms across much of CA . . . . .	Jan.-Mar. 1995	3.0		27
Western fire season . . . . .	Severe fire season in western states due to dry weather. . . . .	Summer-fall 1994	1.0	(NA)	
Texas flooding . . . . .	Flooding from torrential rain & thunderstorms across southeast TX. . . . .	Oct. 1994	1.0		19
Tropical Storm Alberto. . . . .	Flooding due to 10 to 25 inch rain across GA, AL, part of FL. . . . .	July 1994	1.0		32
Southeast ice storm . . . . .	Intense ice storm in pts of TX, OK, AR, LA, MS, AL, TN, GA, SC, NC, & VA . . . . .	Feb. 1994	3.0		9
California wildfires . . . . .	Out-of-control wildfires over southern CA . . . . .	Fall 1993	1.0		4
Midwest flooding . . . . .	Extreme flooding across central U.S. . . . .	Summer 1993	15-20		48
Drought/heat wave . . . . .	Extreme drought/heatwave across southeastern U.S. . . . .	Summer 1993	1.0	(NA)	
Storm/blizzard . . . . .	"Storm of the Century" hits entire eastern seaboard . . . . .	Mar. 1993	3-6		270
Nor'easter of 1992 . . . . .	Slow-moving storm batters northeast U.S. coast, New England hardest hit . . . . .	Dec. 1992	1-2		19
Hurricane Iniki . . . . .	Category 4 hurricane hit Hawaiian island of Kauai . . . . .	Sept. 1992	1.8		7
Hurricane Andrew. . . . .	Category 4 hurricane hit FL & LA . . . . .	Aug. 1992	27.0		58
Oakland firestorm. . . . .	Oakland, CA firestorm due to low humidity & high winds . . . . .	Oct. 1991	1.5		25
Hurricane Bob . . . . .	Category 2 hurricane—mainly coastal NC, Long Island, & New England . . . . .	Aug. 1991	1.5		18
TX/OK/LA/AR flooding. . . . .	Torrential rains cause flooding along Trinity, Red, and Arkansas rivers . . . . .	May 1990	1.0		13
Hurricane Hugo . . . . .	Category 4 hurricane hit Puerto Rico & Virgin Islands, devastated NC & SC . . . . .	Sept. 1989	Over 9		86
Drought/heat wave . . . . .	Drought/heatwave over central & eastern U.S. . . . .	Summer 1988	40.0		5,000-10,000
Hurricane Juan . . . . .	Category 1 hurricane, flooding most severe problem, hit LA and southeast U.S. . . . .	Oct.-Nov. 1985	1.5		63
Hurricane Elena . . . . .	Category 3 hurricane across FL to LA . . . . .	Aug.-Sept. 1985	1.3		4
Florida freeze . . . . .	Severe freeze central/northern FL, damage to citrus ind. . . . .	Jan. 1985	1.2		-
Florida freeze . . . . .	Severe freeze central/northern FL, damage to citrus ind. . . . .	Dec. 1983	2.0		-
Hurricane Alicia . . . . .	Category 3 hurricane across TX . . . . .	Aug. 1983	3.0		21
Drought/heat wave . . . . .	Drought/heatwave over central & eastern U.S. . . . .	June-Sept. 1980	20.0		10,000

- Represents zero. NA Not available or not reported.

## Section 7

# Elections

---

This section relates primarily to presidential, congressional, and gubernatorial elections. Also presented are summary tables on congressional legislation; state legislatures; Black, Hispanic, and female officeholders; population of voting age; voter participation; and campaign finances.

Official statistics on federal elections, collected by the Clerk of the House, are published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election*. Federal and state elections data appear also in *America Votes*, a biennial volume published by Congressional Quarterly, Inc., Washington, DC. Federal elections data also appear in the U.S. Congress, *Congressional Directory*, and in official state documents. Data on reported registration and voting for social and economic groups are obtained by the U.S. Census Bureau as part of the Current Population Survey (CPS) and are published in *Current Population Reports*, Series P20 (see text, Section 1).

Almost all federal, state, and local governmental units in the United States conduct elections for political offices and other purposes. The conduct of elections is regulated by state laws or, in some cities and counties, by local charter. An exception is that the U.S. Constitution prescribes the basis of representation in Congress and the manner of electing the President and grants to Congress the right to regulate the times, places, and manner of electing federal officers. Amendments to the Constitution have prescribed national criteria for voting eligibility. The 15th Amendment, adopted in 1870, gave all citizens the right to vote regardless of race, color, or previous condition of servitude. The 19th Amendment, adopted in 1919, further extended the right to vote to all citizens regardless of sex. The payment of poll taxes as a prerequisite to voting in federal elections was banned by the 24th Amendment in

1964. In 1971, as a result of the 26th Amendment, eligibility to vote in national elections was extended to all citizens, 18 years old and over.

**Presidential election**—The Constitution specifies how the President and Vice President are selected. Each state elects, by popular vote, a group of electors equal in number to its total of members of Congress. The 23d Amendment, adopted in 1961, grants the District of Columbia three presidential electors, a number equal to that of the least populous state. Subsequent to the election, the electors meet in their respective states to vote for President and Vice President. Usually, each elector votes for the candidate receiving the most popular votes in his or her state. A majority vote of all electors is necessary to elect the President and Vice President. If no candidate receives a majority, the House of Representatives, with each state having one vote, is empowered to elect the President and Vice President, again, with a majority of votes required.

The 22d Amendment to the Constitution, adopted in 1951, limits presidential tenure to two elective terms of 4 years each or to one elective term for any person who, upon succession to the Presidency, has held the office or acted as President for more than 2 years.

**Congressional election**—The Constitution provides that Representatives be apportioned among the states according to their population, that a census of population be taken every 10 years as a basis for apportionment, and that each state have at least one Representative. At the time of each apportionment, Congress decides what the total number of Representatives will be. Since 1912, the total has been 435, except during 1960 to 1962 when it increased to 437, adding one Representative each for Alaska and Hawaii. The total reverted to 435 after

reapportionment following the 1960 census. Members are elected for 2-year terms, all terms covering the same period. The District of Columbia, American Samoa, Guam, and the Virgin Islands each elect one nonvoting Delegate, and Puerto Rico elects a nonvoting Resident Commissioner.

The Senate is composed of 100 members, 2 from each state, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were originally chosen by the state legislatures. The 17th Amendment to the Constitution, adopted in 1913, prescribed that Senators be elected by popular vote.

**Voter eligibility and participation—**The Census Bureau publishes estimates of the population of voting age and the

percent casting votes in each state for Presidential and congressional election years. These voting-age estimates include a number of persons who meet the age requirement but are not eligible to vote, (e.g. aliens and some institutionalized persons). In addition, since 1964, voter participation and voter characteristics data have been collected during November of election years as part of the CPS. These survey data include noncitizens in the voting age population estimates but exclude members of the Armed Forces and the institutional population.

**Statistical reliability—**For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Figure 7.1  
**Vote Cast for President by Major Political Party:  
1972 to 2000**

<sup>1</sup> 1972—American, John Schmitz; 1980—Independent, John Anderson; 1992—Independent; Ross Perot, 1996 Reform, Ross Perot. 2000—Green, Ralph Nader.

No. 372. Democratic and Republican Percentages of Two-Party Presidential Vote by Selected Characteristics of Voters: 1996 and 2000

[In percent. Covers citizens of voting age living in private housing units in the contiguous United States. Percentages for Democratic presidential vote are computed by subtracting the percentage Republican vote from 100 percent; third-party or independent votes are not included as valid data. Data are from the National Election Studies and are based on a sample and subject to sampling variability; for details, see source]

Characteristic	1996		2000		Characteristic	1996		2000

No. 376. Apportionment of Membership in House of Representatives by State: 1790 to 2000

Total membership includes Representatives assigned to newly admitted states after the apportionment acts. Population figures used for apportionment purposes are those determined for states by each decennial census. No reapportionment based on 1920 population census. For method of calculating apportionment and a short history of apportionment, see House Report 91-1314, 91st Congress, 2d session. The Decennial Population Census and Congressional Apportionment]

No. 377. Vote Cast for United States Representatives by Major Political Party—States: 1996 to 2000

[In thousands (89,863 represents 89,863,000), except percent. R=Republican, D=Democratic, and I=Independent. In each state, totals represent the sum of votes cast in each Congressional District or votes cast for Representative at Large in states where only one member is elected. In all years there are numerous districts within the state where either the Republican or Democratic party had no candidate. In some states the Republican and Democratic vote includes votes cast for the party candidate by endorsing parties]

VA . . . .	(X).	(X)	(X).	(X)					

X Not applicable. <sup>1</sup> No candidate. <sup>2</sup> According to state law, it is not required to tabulate votes for unopposed candidates. <sup>3</sup> Louisiana holds an open-primary election with candidates from all parties running on the same ballot. Any candidate who receives a majority is elected; if no candidate receives 50 percent, there is a run off election in November between the top two finishers. <sup>4</sup> Sanders, an Independent, was elected with 69.2 percent of the vote. <sup>5</sup> Goode, an Independent, was elected in the Virginia 5th with 67.4 percent of the vote.

No. 388. Political Party Control of State Legislatures by Party: 1975 to 2000

[As of beginning of year. Until 1972, there were two nonpartisan legislatures in Minnesota and Nebraska. Since then only Nebraska has had a nonpartisan legislature]

Year	Legislatures under—			Year	Legislatures under—			Year	Legislatures under—		
	Demo- cratic control	Split control or tie	Re- publican control		Demo- cratic control	Split control or tie	Re- publican control		Demo- cratic control	Split control or tie	Re- publican control
1975. . .	37	7	5	1987. . .	28	12	9	1995. . .	18	12	19
1977. . .	36	8	5	1989 <sup>2</sup> . . .	28	13	8	1996. . .	16	15	18
1979. . .	30	7	12	1990. . .	29	11	9	1997. . .	20	11	18
1981. . .	28	6	15	1992. . .	29	14	6	1999. . .	20	12	17
1983 <sup>1</sup> . . .	34	4	11	1993. . .	25	16	8	2000. . .	16	15	18
1985. . .	27	11	11	1994. . .	24	17	8				

<sup>1</sup> Two 1984 midterm recall elections resulted in a change in control of the Michigan State Senate. At the time of the 1984 election, therefore, Democrats controlled 33 legislatures. <sup>2</sup> A party change during the year by a Democratic representative broke the tie in the Indiana House of Representatives, giving the Republicans control of both chambers.

## No. 397. Political Party Financial Activity by Major Political Party: 1981 to 2000

[In millions of dollars (\$39.3 represents \$39,300,000). Covers financial activity during 2-year calendar period indicated. Some political party financial activities, such as building funds and State and local election spending, are not reported to the source. Also excludes contributions earmarked to Federal candidates through the party organizations, since some of those funds never passed through the committees' accounts]

## No. 398. National Party Nonfederal Activity: 1996 to 2000

[In dollars. During the 2000 election cycle, both major parties raised record amounts of **nonfederal** or "soft money." Soft money is used to pay a portion of the overhead expenses of party organizations, as well as other shared expenses that benefit both federal and nonfederal elections. In addition, it is used for issue advocacy, as well as generic party advertising. It may also be transferred from national committees to state and local party committees as well as being used to support construction and maintenance of party headquarters]

## State and Local Government Finances and Employment

This section presents data on revenues, expenditures, debt, and employment of state and local governments. Nationwide statistics relating to state and local governments, their numbers, finances, and employment are compiled primarily by the U.S. Census Bureau through a program of censuses and surveys. Every fifth year (for years ending in "2" and "7") the Census Bureau conducts a census of governments involving collection of data for all governmental units in the United States. In addition, the Census Bureau conducts annual surveys which cover all the state governments and a sample of local governments.

Annually, the Census Bureau releases information on the Internet which presents financial data for the federal government, nationwide totals for state and local governments, and state-local data by states. Also released annually is a series on state, city, county, and school finances and on state and local public employment. There is also a series of quarterly data releases covering tax revenue and finances of major public employee retirement systems.

Basic information for Census Bureau statistics on governments is obtained by mail canvass from state and local officials; however, financial data for each of the state governments and for many of the large local governments are compiled from their official records and reports by Census Bureau personnel. In over two-thirds of the states, all or part of local government financial data are obtained through central collection arrangements with state governments. Financial data on the federal government are primarily based on the *Budget* published by the Office of Management and Budget (see text, Section 9, Federal Government Finances and Employment).

**Governmental units**—The governmental structure of the United States includes, in addition to the federal government and

the states, thousands of local governments—counties, municipalities, townships, school districts, and numerous kinds of "special districts." In 1997, 87,453 local governments were identified by the census of governments (see Tables 413-415). As defined by the census, governmental units include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities and numerous local irrigation, power, and other types of districts—are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The count of governments excludes semi-autonomous agencies through which states, cities, and counties sometimes provide for certain functions—for example, "dependent" school systems, state institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

**Finances**—The financial statistics relate to government fiscal years ending June 30 or at some date within the 12 previous months. The following governments are exceptions and are included as though they were part of the June 30 group; ending September 30, the state governments of Alabama and Michigan, the District of Columbia, and Alabama school districts; and ending August 31, the state government of Texas and Texas school districts. New York State ends its fiscal year on March 31. The federal government ended the fiscal year June 30 until 1976 when its fiscal year, by an act of Congress, was revised to extend from Oct. 1 to Sept. 30. A 3-month quarter (July 1 to Sept. 30, 1976) bridged the transition.

Nationwide government finance statistics have been classified and presented in

terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure utilized by individual governments.

Statistics on governmental finances distinguish among general government, utilities, liquor stores, and insurance trusts. *General government* comprises all activities except utilities, liquor stores, and insurance trusts. Utilities include government water supply, electric light and power, gas supply, and transit systems. Liquor stores are operated by 17 states and by local governments in 6 states. Insurance trusts relate to employee retirement, unemployment compensation, and other social insurance systems administered by the federal, state, and local governments.

Data for cities or counties relate only to municipal or county and their dependent agencies and do not include amounts for other local governments in the same geographic location. Therefore, expenditure figures for "education" do not include spending by the separate school districts which administer public schools within most municipal or county areas. Variations in the assignment of governmental responsibility for public assistance, health, hospitals, public housing, and

other functions to a lesser degree also have an important effect upon reported amounts of city or county expenditure, revenue, and debt.

**Employment and payrolls**—These data are based mainly on mail canvassing of state and local governments. Payroll includes all salaries, wages, and individual fee payments for the month specified, and employment relates to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (unless otherwise specified) part-time as well as full-time personnel. Beginning 1986, statistics for full-time equivalent employment have been computed with a formula using hours worked by part-time employees. A payroll based formula was used prior to 1985. Full-time equivalent employment statistics were not computed for 1985. Figures shown for individual governments cover major dependent agencies such as institutions of higher education, as well as the basic central departments and agencies of the government.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

State and local	512.4	542.4	548.4	557.7	566.8	573.8	584.9	598.9

- Represents zero. <sup>1</sup> Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures. <sup>2</sup> Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to foreign countries by the Federal Government. <sup>3</sup> Compensation of government employees engaged in new own-account investment and related expenditures for goods and services are classified as investment in structures and in software. The compensation of all general government employees is shown in the addenda. <sup>4</sup> Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return.

No. 427. State Resources, Expenditures, and Balances: 2001 and 2002

[In millions of dollars (1,044,078 represents \$1,044,078,000,000). For fiscal year ending in year shown; see text; this section. General funds exclude special funds earmarked for particular purposes, such as highway trust funds and federal funds; they support most on-going broad-based state services and are available for appropriation to support any governmental activity. Minus sign (-) indicates deficit]

No. 433. Estimated State and Local Taxes Paid by a Family of Four in Selected Cities: 2000

[Data based on average family of four (two wage earners and two school age children) owning their own home and living in a city where taxes apply. Comprises state and local sales, income, auto, and real estate taxes. For definition of median, see Guide to Tabular Presentation]

City	Total taxes paid by gross family income level (dollars)					Total taxes paid as percent of income				
	\$25,000	\$50,000	\$75,000	\$100,000	\$150,000	\$25,000	\$50,000	\$75,000	\$100,000	\$150,000

<sup>1</sup> Player scratches a latex section on ticket which reveals instantly whether ticket is a winner. <sup>2</sup> Players choose and bet on three or four digits, depending on game, with various payoffs for different straight order or mixed combination bets. <sup>3</sup> Players typically select six digits out of a large field of numbers. Varying prizes are offered for matching three through six numbers drawn by lottery. <sup>4</sup> Includes breakopen tickets, spiel, keno, video lottery, etc. <sup>5</sup> Sales minus prizes and expenses equal net government income.

## Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the federal government. The fiscal data cover taxes, other receipts, outlays, and debt. The principal sources of fiscal data are the *Budget of the United States Government* and related documents, published annually by the Office of Management and Budget (OMB), and the Department of the Treasury's *United States Government Annual Report* and its *Appendix*. Detailed data on tax returns and collections are published annually by the Internal Revenue Service. The personnel data relate to staffing and payrolls. They are published by the Office of Personnel Management and the Bureau of Labor Statistics. The primary source for data on public lands is *Public Land Statistics*, published annually by the Bureau of Land Management, Department of the Interior. Data on federally owned land and real property are collected by the General Services Administration and presented in its annual *Inventory Report on Real Property Owned by the United States Throughout the World*.

**Budget concept**—Under the unified budget concept, all federal monies are included in one comprehensive budget. These monies comprise both federal funds and trust funds. Federal funds are derived mainly from taxes and borrowing and are not restricted by law to any specific government purpose. Trust funds, such as the Unemployment Trust Fund, collect certain taxes and other receipts for use in carrying out specific purposes or programs in accordance with the terms of the trust agreement or statute. Fund balances include both cash balances with Treasury and investments in U.S. securities. Part of the balance is obligated, part unobligated. Prior to 1985, the budget totals, under provisions of law, excluded some federal activities—including the Federal Financing Bank, the Postal Service, the Synthetic Fuels Corporation, and the lending activities of the Rural Electrification Administration. The Balanced Budget

and Emergency Deficit Control Act of 1985 (P.L. 99-177) repealed the off-budget status of these entities and placed social security (federal old-age and survivors insurance and the federal disability insurance trust funds) off-budget. Though social security is now off-budget and, by law, excluded from coverage of the congressional budget resolutions, it continues to be a federal program.

Receipts arising from the government's sovereign powers are reported as governmental receipts; all other receipts, i.e., from business-type or market-oriented activities, are offset against outlays. Outlays are reported on a checks-issued (net) basis (i.e., outlays are recorded at the time the checks to pay bills are issued).

**Debt concept**—For most of U.S. history, the total debt consisted of debt borrowed by the Treasury (i.e., public debt). The present debt series, includes both public debt and agency debt. The *gross federal debt* includes money borrowed by the Treasury and by various federal agencies; it is the broadest generally used measure of the federal debt. *Total public debt* is covered by a statutory debt limitation and includes only borrowing by the Treasury.

**Treasury receipts and outlays**—All receipts of the government, with a few exceptions, are deposited to the credit of the U.S. Treasury regardless of ultimate disposition. Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress.

The day-to-day cash operations of the federal government clearing through the accounts of the U.S. Treasury are reported in the *Daily Treasury Statement*. Extensive detail on the public debt is published in the *Monthly Statement of the Public Debt of the United States*.

Budget receipts such as taxes, customs duties, and miscellaneous receipts, which are collected by government agencies,

and outlays represented by checks issued and cash payments made by disbursing officers as well as government agencies are reported in the *Daily Treasury Statement of Receipts and Outlays of the United States Government* and in the Treasury's *United States Government Annual Report* and its *Appendix*. These deposits in and payments from accounts maintained by government agencies are on the same basis as the unified budget.

The quarterly *Treasury Bulletin* contains data on fiscal operations and related Treasury activities, including financial statements of government corporations and other business-type activities.

**Income tax returns and tax collections**—Tax data are compiled by the Internal Revenue Service of the Treasury Department. The *Annual Report of the Commissioner and Chief Counsel of the Internal Revenue Service* gives a detailed account of tax collections by kind of tax and by regions, districts, and states. The agency's annual *Statistics of Income* reports present detailed data from individual income tax returns and corporation income tax returns. The quarterly *Statistics of Income Bulletin* has, in general, replaced the supplemental *Statistics of Income* publications which presented data on such diverse subjects as tax-exempt organizations, unincorporated businesses, fiduciary income tax and estate tax returns, sales of capital assets by individuals, international income and taxes reported by corporations and individuals, and estate tax wealth.

**Employment and payroll**—The Office of Personnel Management collects employment and payroll data from all departments and agencies of the federal government, except the Central Intelligence Agency, the National Security Agency, and the Defense Intelligence Agency. Employment figures represent the number of persons who occupied civilian

positions at the end of the report month shown and who are paid for personal services rendered for the federal government, regardless of the nature of appointment or method of payment. Federal payrolls include all payments for personal services rendered during the report month and payments for accumulated annual leave of employees who separate from the service. Since most federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap.

Federal employment and payroll figures are published by the Office of Personnel Management in its *Federal Civilian Workforce Statistics—Employment and Trends*. It also publishes biennial employment data for minority groups, data on occupations of white- and blue-collar workers, and data on employment by geographic area; reports on salary and wage distribution of federal employees are published annually. General schedule is primarily white-collar; wage system primarily blue-collar. Data on federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review* and in *Employment and Earnings* and by the U.S. Census Bureau in its annual *Public Employment*.

**Public lands**—The data on applications, entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public land laws (including the homestead laws), of federal public lands to nonfederal owners. In general, original entries and selections are applications to secure title to public lands which have been accepted as properly filed (i.e., allowed). Some types of applications, however, are not reported until issuance of the final certificate, which passes equitable title to the land to the applicant.

No. 449. Federal Budget—Receipts, Outlays, and Debt: 1960 to 2002

[In billions of dollars (92.5 represents \$92,500,000,000), except percent. For fiscal years ending in year shown; see text, Section 8, State and Local Government Finances and Employment. The Balanced Budget and Emergency Deficit Control Act of 1985 put all the previously off-budget federal entities into the budget and moved social security off-budget. Minus sign (-) indicates deficit or decrease]

## No. 451. Federal Budget Outlays in Constant (1996) Dollars: 1980 to 2002

[Dollar amounts in billions of dollars (1,092.5 represents \$1,092,500,000,000). For fiscal year ending in year shown; see text, Section 8. State and Local Government Finances and Employment. Given the inherent imprecision in deflating outlays, the data shown in constant dollars present a reasonable perspective—not precision. The deflators and the categories that are deflated are as comparable over time as feasible. Minus sign (-) indicates offset]

Type	1980	1990	1995	1998	1999	2000	2001	2002, est.
<b>Constant (1996) dollar outlays, total</b>	<b>1,092.5</b>	<b>1,483.6</b>	<b>1,551.5</b>	<b>1,598.9</b>	<b>1,620.7</b>	<b>1,659.7</b>	<b>1,692.9</b>	<b>1,826.7</b>

No. 456. Tax Expenditures Estimates Relating to Individual and Corporate Income Taxes by Selected Function: 2001 to 2003

[In millions of dollars (2,160 represents \$2,160,000,000). For years ending Sept. 30. Tax expenditures are defined as revenue losses attributable to provisions of the federal tax laws which allow a special exclusion, exemption, or deduction from gross income or which provide a special credit, a preferential rate of tax, or a deferral of liability]

Function and provision	2001	2002	2003	2003, rank
National defense:				
Exclusion of benefits and allowances to armed forces personnel . . . . .	2,160	2,190	2,210	43
International affairs:				
Exclusion of income earned abroad by U.S. citizens . . . . .	2,450	2,540	2,660	37
Exclusion of certain allowances for federal employees abroad . . . . .	760	800	840	59
Extraterritorial income exclusion . . . . .	4,490	4,820	5,150	23
Inventory property sales source rules exception . . . . .	1,400	1,470	1,540	48
Deferral of income from controlled foreign corporations (normal tax method) . . . . .	6,600	7,000	7,450	17
General science, space, and technology:				
Expensing of research and experimentation expenditures (normal tax method) . . . . .	2,020	1,780	2,380	39
Credit for increasing research activities . . . . .	5,370	6,010	4,590	26
Agriculture:				
Capital gains treatment of certain income . . . . .	990	1,040	1,100	56
Commerce and housing:				
Financial institutions and insurance:				
Exemption of credit union income . . . . .	1,000	1,070	1,150	53
Exclusion of interest on life insurance savings . . . . .	16,290	17,710	19,250	14
Housing:				
Exclusion of interest on owner-occupied mortgage subsidy bonds . . . . .	800	830	870	58
Deductibility of mortgage interest on owner-occupied homes . . . . .	64,510	64,190	66,110	2
Deductibility of state and local property tax on owner-occupied homes . . . . .	22,410	22,680	23,580	11
Deferral of income from post 1987 installment sales . . . . .	1,040	1,050	1,080	57
Capital gains exclusion on home sales . . . . .	19,090	19,670	20,260	12
Exception from passive loss rules for \$25,000 of rental loss . . . . .	4,800	4,400	4,070	30
Credit for low-income housing investments . . . . .	3,220	3,330	3,460	33
Accelerated depreciation on rental housing (normal tax method) . . . . .	5,190	5,440	5,710	21
Commerce:				
Capital gains (except agriculture, timber, iron ore, and coal) <sup>1</sup> . . . . .	67,800	61,810	60,200	3
Step-up basis of capital gains at death . . . . .	26,540	27,610	28,710	9
Accelerated depreciation of buildings other than rental housing <sup>1</sup> . . . . .	4,540	4,560	4,240	28
Accelerated depreciation of machinery and equipment <sup>1</sup> . . . . .	37,860	37,130	36,480	7
Expensing of certain small investments . . . . .	1,670	1,430	1,420	49
Graduated corporation income tax rate <sup>1</sup> . . . . .	4,940	5,590	6,210	19
Transportation:				
Exclusion of reimbursed employee parking expenses . . . . .	1,980	2,090	2,190	44
Education, training, employment, and social services:				
Exclusion of scholarship and fellowship income <sup>1</sup> . . . . .	1,210	1,200	1,210	51
HOPE tax credit . . . . .	4,130	4,110	3,520	32
Lifetime Learning tax credit . . . . .	2,370	2,290	2,360	40
Deduction for higher education expenses . . . . .	-	430	2,290	41
Parental personal exemption for students age 19 or over . . . . .	1,010	1,070	1,120	55
Deductibility of charitable contributions (education) . . . . .	3,830	3,980	4,200	29
Training, employment, and social services:				
Exclusion of employee meals and lodging (other than military) . . . . .	710	740	780	60
Child credit . . . . .	19,840	19,760	19,680	13
Credit for child and dependent care expenses . . . . .	2,670	2,610	2,670	36
Deductibility of charitable contributions, other than education and health . . . . .	30,150	30,810	32,080	8
Health:				
Exclusion of employer contributions for medical insurance premiums <sup>2</sup> . . . . .	82,800	90,910	99,260	1
Self-employed medical insurance premiums . . . . .	1,520	1,730	2,420	38
Workers' compensation insurance premiums . . . . .	4,730	4,870	5,080	24
Deductibility of medical expenses . . . . .	4,990	5,260	5,530	22
Exclusion of interest on hospital construction bonds . . . . .	1,100	1,130	1,190	52
Deductibility of charitable contributions (health) . . . . .	4,010	4,180	4,420	27
Income security:				
Exclusion of workers' compensation benefits . . . . .	5,560	5,810	6,070	20
Net exclusion of pension contributions and earnings:				
Employer plans . . . . .	42,070	48,070	53,080	5
401(k) plans . . . . .	44,080	52,960	59,510	4
Individual Retirement Accounts . . . . .	18,680	18,090	18,660	15
Low and moderate income savers credit . . . . .	-	550	1,960	45
Keogh plans . . . . .	6,160	6,520	6,770	18
Exclusion of other employee benefits:				
Premiums on group term life insurance . . . . .	1,750	1,780	1,800	47
Special ESOP rules . . . . .	1,290	1,340	1,420	50
Additional deduction for the elderly . . . . .	1,970	1,890	1,950	46
Earned income tax credit . . . . .	4,940	4,370	4,800	25
Social Security:				
Exclusion of social security benefits:				
Social Security benefits for retired workers . . . . .	17,830	18,000	18,180	16
Social Security benefits for disabled . . . . .	2,690	2,930	3,240	35
Social Security benefits for dependents and survivors . . . . .	3,720	3,870	4,060	31
Veterans benefits and services:				
Exclusion of veterans death benefits and disability compensation . . . . .	3,150	3,190	3,300	34
General purpose fiscal assistance:				
Exclusion of interest on public purpose state and local bonds . . . . .	23,100	23,680	24,270	10
Deductibility of nonbusiness state and local taxes other than on owner-occupied . . . . .	45,520	46,160	48,150	6
Tax credit for corporations receiving income from doing business in U.S. pos. . . . .	2,190	2,240	2,240	42

- Represents zero. <sup>1</sup> Normal tax method. <sup>2</sup> Includes premiums and medical care.

No. 462. Per Capita Federal Balance of Payments by State: 1990 to 1999

[In dollars, except rank. For year ending Sept. 30. Represents federal spending within the borders of the 50 states, including defense and excluding interest payments on the federal debt. Each state runs a balance of payments surplus or deficit with the federal government. Put another way, each state indirectly subsidizes or is being subsidized by the other states]

No. 463. Tax Returns Filed—Examination Coverage: 1990 to 2000

[In thousands (103,251 represents 103,251,000, except as indicated. Return classification as Schedule C or C-EZ (nonfarm sole proprietorships) or Schedule F (farm proprietorships) for audit examination purposes was based on the largest source of income on the return and certain other characteristics. Therefore, some returns with business activity are reflected in the nonbusiness individual income tax return statistics in the table below (and vice versa), so that the statistics for the number of returns with Schedule C is not comparable to the number of nonfarm sole proprietorship returns in Table 702]

Year and type of return	Returns examined						Average tax and penalty per return (dollars)		
	Returns filed <sup>1</sup>	Total	Percent coverage	By—

# No. 470. Federal Individual Income Tax—Tax Liability and Effective and Marginal Tax Rates for Selected Income Groups: 1990 to 1999

[Refers to income after exclusions. Effective rate represents tax liability divided by stated income. The marginal tax rate is the percentage of the first additional dollar of income which would be paid in income tax. Computations assume the low income allowance, standard deduction, zero bracket amount, or itemized deductions equal to 10 percent of adjusted gross income, whichever is greatest. Excludes self-employment tax]

<sup>1</sup> An installation may consist of land, buildings, other structures and facilities, or combinations of them. Examples of installations are a national forest, national park, a hydroelectric project, a single office or warehouse building, and an unimproved site. <sup>2</sup> Covers cost of land, buildings, and structures and facilities. All properties are reported at actual or estimated cost without considering depreciation, obsolescence, or economic changes in value.

## National Defense and Veterans Affairs

This section presents data on national defense and its human and financial costs; active and reserve military personnel; ships, equipment, and aircraft; and federally sponsored programs and benefits for veterans. The principal sources of these data are the annual *Selected Manpower Statistics* and the *Atlas/Data Abstract for the United States and Selected Areas* issued by the Office of the Secretary of Defense; *Annual Report of Secretary of Veterans Affairs*, *Department of Veterans Affairs*, and *The Budget of the United States Government*, Office of Management and Budget. For more data on expenditures, personnel, and ships, see Section 30.

**Department of Defense (DOD)**—The Department of Defense is responsible for providing the military forces of the United States. It includes the Office of the Secretary of Defense, the Joint Chiefs of Staff, the Army, the Navy, the Air Force, and the defense agencies. The President serves as Commander in Chief of the Armed Forces; from him, the authority flows to the Secretary of Defense and through the Joint Chiefs of Staff to the commanders of unified and specified commands (e.g., U.S. Strategic Command).

**Reserve components**—Reserve personnel of the Armed Forces consist of the Army National Guard, Army Reserve, Naval Reserve, Marine Corps Reserve, Air National Guard, Air Force Reserve, and Coast Guard Reserve. They provide trained personnel available for active duty in the Armed Forces in time of war or national emergency and at such other times as authorized by law.

The National Guard has dual federal-state responsibilities and uses jointly provided equipment, facilities, and budget support.

The President is empowered to mobilize the National Guard and to use such of the Armed Forces as he considers necessary to enforce federal authority in any state.

The ready reserve includes selected reservists who are intended to assist active forces in a war and the individual ready reserve who, in a major war, would be used to fill out active and reserve units and later would be a source of combat replacements; a portion of the ready reserve serves in an active status. The standby reserve cannot be called to active duty unless the Congress gives explicit approval. The retired reserve represents a low potential for mobilization.

### Department of Veterans Affairs

**(VA)**—The Department of Veterans Affairs administers laws authorizing benefits for eligible former and present members of the Armed Forces and for the beneficiaries of deceased members. Veterans benefits available under various acts of Congress include compensation for service-connected disability or death; pensions for nonservice-connected disability or death; vocational rehabilitation, education, and training; home loan insurance; life insurance; health care; special housing and automobiles or other conveyances for certain disabled veterans; burial and plot allowances; and educational assistance to families of deceased or totally disabled veterans, servicemen missing in action, or prisoners of war. Since these benefits are legislated by Congress, the dates they were enacted and the dates they apply to veterans may be different from the actual dates the conflicts occurred.

VA estimates of veterans cover all persons with active duty service during periods of war or armed conflict and until 1982 include those living outside the United States.

## No. 484. National Defense Outlays and Veterans Benefits: 1960 to 2003

[For fiscal year ending in year shown; see text, Section 8, State and Local Government Finances and Employment. Includes outlays of Department of Defense, Department of Veterans Affairs, and other agencies for activities primarily related to national defense and veterans programs. For explanation of average annual percent change, see Guide to Tabular Presentation. Minus sign (-) indicates decline.]

Year	National defense and veterans outlays				Annual percent change <sup>1</sup>			Defense outlays, percent of—	
	Defense outlays				Total outlays	Defense outlays	Veterans outlays	Federal outlays	Gross domestic product <sup>2</sup>
	Total outlays (bil. dol.)	Current dollars (bil. dol.)	Constant (1996) dollars (bil. dol.)	Veterans outlays (bil. dol.)

<sup>1</sup> Military awards for supplies, services, and construction. Net value of contracts of over \$25,000 for work in each state and DC. Figures reflect impact of prime contracting on state distribution of defense work. Often the state in which a prime contractor is located is not the state where the subcontracted work is done. See also headnote, Table 487. Undistributed civilians and military personnel, their payrolls, and prime contract awards for performance in classified locations are excluded.

No. 501. Military Reserve Personnel: 1990 to 2001

[As of end of fiscal year. The Ready Reserve includes the Selected Reserve which is scheduled to augment active forces during times of war or national emergency, and the Individual Ready Reserve which, during times of war or national emergency, would be used to fill out Active, Guard and Reserve units, and which would also be a source for casualty replacements; Ready Reservists serve in an active status (except for the Inactive National Guard - a very small pool within the Army National Guard). The Standby Reserve cannot be called to active duty except in situations where those members are the only available assets with specific required specialties. The Retired Reserve is categorized into three groups, based on age and length of retirement, prioritized for mobilization purposes.

Reserve status and branch of service	1990	1995	1997	1998	1999	2000	2001
Total reserves <sup>1</sup> . . . . .	1,688,674	1,674,164	1,474,167	1,382,348	1,316,984	1,276,843	1,250,155

No. 505. Veterans by Sex, by Period of Service, and by States: 2001

[In thousands (25,349 represents 25,349,000). As of end of fiscal year; see text, Section 8, State and Local Government Finances and Employment. Estimated starting with veteran's place of residence as of April 1, 1980, based on 1980 Census of Population data, extended to later years on the basis of estimates of veteran interstate migration, separations from the Armed Forces, and mortality; not directly comparable with earlier estimates previously published by the VA. Excludes 602,000 veterans whose only active-duty military service of less than 2 years occurred since Sept. 30, 1980, and who failed to satisfy the minimum service requirement. Also excludes a small number of National Guard personnel or reservists who incurred service-connected disabilities while on an initial tour of active duty for training only]

## Social Insurance and Human Services

This section presents data related to governmental expenditures for social insurance and human services; governmental programs for old-age, survivors, disability, and health insurance (OASDHI); governmental employee retirement; private pension plans; government unemployment and temporary disability insurance; federal supplemental security income payments and aid to the needy; child and other welfare services; and federal food programs. Also included here are selected data on workers compensation and vocational rehabilitation, child support, child care, charity contributions, and philanthropic trusts and foundations.

The principal source for these data is the Social Security Administration's *Annual Statistical Supplement to the Social Security Bulletin* which presents current data on many of the programs.

**Social insurance under the Social Security Act**—Programs established by the Social Security Act provide protection against wage loss resulting from retirement, prolonged disability, death, or unemployment, and protection against the cost of medical care during old age and disability. The federal OASDI program provides monthly benefits to retired or disabled insured workers and their dependents and to survivors of insured workers. To be eligible, a worker must have had a specified period of employment in which OASDI taxes were paid. The age of eligibility for full retirement benefits has been 65 years old for many years. However, for persons born in 1938 or later that age will gradually increase until it reaches age 67 for those born after 1959. Reduced benefits may be obtained as early as age 62. The worker's spouse is under the same limitations. Survivor benefits are payable to dependents of deceased insured workers. Disability benefits are payable to an insured worker under full retirement age with a prolonged disability and to the disabled worker's dependents on the same basis as

dependents of retired workers. Disability benefits are provided at age 50 to the disabled widow or widower of a deceased worker who was fully insured at the time of death. Disabled children, aged 18 or older, of retired, disabled, or deceased workers are also eligible for benefits. A lump sum benefit is generally payable on the death of an insured worker to a spouse or minor children. For information on the medicare program, see Section 3, Health and Nutrition.

Retirement, survivors, disability, and hospital insurance benefits are funded by a payroll tax on annual earnings (up to a maximum of earnings set by law) of workers, employers, and the self-employed. The maximum taxable earnings are adjusted annually to reflect increasing wage levels (see Table 517). Effective January 1994, there is no dollar limit on wages and self-employment income subject to the hospital insurance tax. Tax receipts and benefit payments are administered through federal trust funds. Special benefits for uninsured persons; hospital benefits for persons aged 65 and over with specified amounts of social security coverage less than that required for cash benefit eligibility; and that part of the cost of supplementary medical insurance not financed by contributions from participants are financed from federal general revenues.

Unemployment insurance is presently administered by the U.S. Employment and Training Administration and each state's employment security agency. By agreement with the U.S. Secretary of Labor, state agencies also administer unemployment compensation for eligible ex-military personnel and federal employees. Under state unemployment insurance laws, benefits related to the individual's past earnings are paid to unemployed eligible workers. State laws vary concerning the length of time benefits are paid and their amount. In most states, benefits are payable for 26 weeks and, during periods

of high unemployment, extended benefits are payable under a federal-state program to those who have exhausted their regular state benefits. Some states also supplement the basic benefit with allowances for dependents.

Unemployment insurance is funded by a federal unemployment tax levied on the taxable payrolls of most employers. Taxable payroll under the federal act and 12 state laws is the first \$7,000 in wages paid each worker during a year. Forty-one states have taxable payrolls above \$7,000. Employers are allowed a percentage credit of taxable payroll for contributions paid to states under state unemployment insurance laws. The remaining percent of the federal tax finances administrative costs, the federal share of extended benefits, and advances to states. About 97 percent of wage and salary workers are covered by unemployment insurance.

### **Retirement programs for government employees**

—The Civil Service Retirement System (CSRS) and the Federal Employees' Retirement System (FERS) are the two major programs providing age and service, disability, and survivor annuities for federal civilian employees. In general, employees hired after December 31, 1983, are covered under FERS and the social security program (OASDHI), and employees on staff prior to that date are members of CSRS and are covered under medicare. CSRS employees were offered the option of transferring to FERS during 1987 and 1998. There are separate retirement systems for the uniformed services (supplementing OASDHI) and for certain special groups of federal employees. State and local government employees are covered for the most part by state and local retirement systems similar to the federal CSRS. In many jurisdictions these benefits supplement OASDHI coverage.

**Workers' compensation**—All states provide protection against work-connected injuries and deaths, although some states exclude certain workers (e.g., domestic help). Federal laws cover federal employees, private employees in the District of Columbia, and longshoremen and harbor workers. In addition, the Social Security Administration and the Department of

Labor administer "black lung" benefits programs for coal miners disabled by pneumoconiosis and for specified dependents and survivors. Specified occupational diseases are compensable to some extent. In most states, benefits are related to the worker's salary. The benefits may or may not be augmented by dependents' allowances or automatically adjusted to prevailing wage levels.

**Income support**—Income support programs are designed to provide benefits for persons with limited income and resources. The Supplemental Security Income (SSI) program and Temporary Assistance for Needy Families (TANF) program are the major programs providing monthly payments. In addition, a number of programs provide money payments or in-kind benefits for special needs or purposes. Several programs offer food and nutritional services. Also, various federal-state programs provide energy assistance, public housing, and subsidized housing to individuals and families with low incomes. General assistance may also be available at the state or local level.

The SSI program, administered by the Social Security Administration, provides income support to persons aged 65 or older and blind or disabled adults and children. Eligibility requirements and federal payment standards are nationally uniform. Most states supplement the basic SSI payment for all or selected categories of persons.

The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 contained provisions that replaced the Aid to Families With Dependent Children (AFDC), Job Opportunities and Basic Skills (JOBS), and Emergency Assistance programs with the Temporary Assistance for Needy Families block grant program. This law contains strong work requirements, comprehensive child support enforcement, support for families moving from welfare to work, and other features. The TANF became effective as soon as each state submitted a complete plan implementing TANF, but no later than July 1, 1997. The AFDC program provided cash assistance based on need, income, resources, and family size.

**Federal food stamp program**—Under the food stamp program, single persons and those living in households meeting nationwide standards for income and assets may receive coupons redeemable for food at most retail food stores. The monthly amount of coupons a unit receives is determined by household size and income. Households without income receive the determined monthly cost of a nutritionally adequate diet for their household size. This amount is updated to account for food price increases. Households with income receive the difference between the amount of a nutritionally adequate diet and 30 percent of their income, after certain allowable deductions.

To qualify for the program, a household must have less than \$2,000 in disposable assets (\$3,000 if one member is aged 60 or older), gross income below 130 percent of the official poverty guidelines for the household size, and net income below 100 percent of the poverty guidelines. Households with a person aged 60 or older or a disabled person receiving SSI, social security, state general assistance, or veterans' disability benefits may have gross income exceeding 130 percent of the poverty guidelines. All households in which all members receive TANF or SSI are categorically eligible for food stamps without meeting these income or resource criteria. Households are certified for varying lengths of time, depending on their income sources and individual circumstances.

### **Health and welfare services—**

Programs providing health and welfare services are aided through federal grants to states for child welfare services, vocational rehabilitation, activities for the aged, maternal and child health services, maternity and infant care projects, comprehensive health services, and a variety of public health activities. For information about the medicaid program, see Section 3, Health and Nutrition.

**Noncash benefits**—The U.S. Census Bureau annually collects data on the characteristics of recipients of noncash (in-kind) benefits to supplement the collection of annual money income data in the Current Population Survey (see text, Section 1, Population, and Section 14, Prices). Noncash benefits are those benefits received in a form other than money which serve to enhance or improve the economic well-being of the recipient. As for money income, the data for noncash benefits are for the calendar year prior to the date of the interview. The major categories of noncash benefits covered are public transfers (e.g., food stamps, school lunch, public housing, and medicaid) and employer or union-provided benefits to employees.

**Statistical reliability**—For discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to HHS and Census Bureau data, see Appendix III.

## No. 510. Government Transfer Payments to Individuals—Summary: 1970 to 2000

[In billions of dollars (69.3 represents \$69,300,000,000)]

Federal education & training assistance payments <sup>9</sup>	7,300	9,007	8,568	11,481	11,189	11,366	10,729
Other payments to individuals <sup>10</sup>	1,770	1,622	2,105	1,669	1,888	2,050	2,115

<sup>1</sup> Consists largely of temporary disability payments, pension benefit guaranty payments, and black lung payments. <sup>2</sup> Consists of medicaid and other medical vendor payments. <sup>3</sup> Consists of payments made under the TriCare Management Program (formerly called CHAMPUS) for the medical care of dependents of active duty military personnel and of retired military personnel and their dependents at nonmilitary medical facilities. <sup>4</sup> Through 1995, consists of emergency assistance and aid to families with dependent children. Beginning with 1998, consists of benefits—generally known as temporary assistance for needy families—provided under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996. For 1996-97, consists of payments under all three of these programs. <sup>5</sup> Consists largely of general assistance, expenditures for food under the supplemental program for women, infants, and children; refugee assistance; foster home care and adoption assistance; earned income tax credits; and energy assistance. <sup>6</sup> Consists of trade readjustment allowance payments, Redwood Park benefit payments, public service employment benefit payments, and transitional benefit payments. <sup>7</sup> Consists largely of veterans' readjustment benefit payments, educational assistance to spouses and children of disabled or deceased veterans, payments to paraplegics, and payments for autos and conveyances for disabled veterans. <sup>8</sup> Consists largely of state and local government payments to veterans. <sup>9</sup> Excludes veterans. Consists largely of federal fellowship payments (National Science Foundation fellowships and traineeships, subsistence payments to state maritime academy cadets, and other federal fellowships), interest subsidy on higher education loans, basic educational opportunity grants, and Job Corps payments. <sup>10</sup> Consists largely of Bureau of Indian Affairs payments, education exchange payments, Alaska Permanent Fund dividend payments, compensation of survivors of public safety officers, compensation of victims of crime, disaster relief payments, compensation for Japanese internment, and other special payments to individuals.

## No. 514. Households Receiving Means-Tested Noncash Benefits: 1980 to 2000

[In thousands (82,368 represents 82,368,000), except percent. Households as of March of following year. Covers civilian noninstitutional population, including persons in the Armed Forces living off post or with their families on post. A means-tested benefit program requires that the household's income and/or assets fall below specified guidelines in order to qualify for benefits. There are general trends toward underestimation of noncash beneficiaries. Households are classified according to poverty status of family or nonfamily householder; for explanation of poverty level, see text, Section 13, Income, Expenditures, and Wealth. Data for 1980 and 1990 based on 1980 census population controls; beginning 1995, based on 1990 census population controls. Based on Current Population Survey; see text, Section 1, Population, and Appendix III]

Type of benefit received	2000						
	1980	1990	1995	1999	Below poverty level		
					Total	Number	Percent of total
<b>Total households</b> . . . . .	<b>82,368</b>	<b>94,312</b>	<b>99,627</b>	<b>104,705</b>	<b>106,418</b>	<b>11,881</b>	<b>100</b>

Means-Tested Noncash Benefits Received by Households, by Selected Household Characteristics, Race and Hispanic Origin, and Poverty Status: 2000"; published 10 December 2001; <<http://ferret.bls.census.gov/macro/032001/noncash/nc1000.htm>> and *Current Population Reports*, P-60 reports.

## No. 515. Government Expenditures for Income-Tested Benefits by Type of Benefit: 1980 to 2000

[In millions of dollars (105,312 represents \$105,312,000,000). For years ending September 30. Programs covered provide cash, goods, or services to persons who make no payment and render no service in return. In case of many programs, including family cash welfare, food and housing programs, job and training programs and some educational programs, some recipients must work or study. Most of the programs base eligibility on individual, household, or family income, but some use group or area income tests; and a few offer help on the basis of presumed need. Constant dollar figures are based on the Consumer Price Index for all Urban Consumers]

No. 524. Private Pension Plans—Summary by Type of Plan: 1990 to 1998

[712.3 represents 712,300. "Pension plan" is defined by the Employee Retirement Income Security Act (ERISA) as "any plan, fund, or program which was heretofore or is hereafter established or maintained by an employer or an employee organization, or by both, to the extent that such plan (a) provides retirement income to employees, or (b) results in a deferral of income by employees for periods extending to the termination of covered employment or beyond, regardless of the method of calculating the contributions made to the plan, the method of calculating the benefits under the plan, or the method of distributing benefits from the plan." A defined benefit plan provides a definite benefit formula for calculating benefit amounts - such as a flat amount per year of service or a percentage of salary times years of service. A defined contribution plan is a pension plan in which the contributions are made to an individual account for each employee. The retirement benefit is dependent upon the account balance at retirement. The balance depends upon amounts contributed, investment experience, and, in the case of profit sharing plans, amounts which may be allocated to the account due to forfeitures by terminating employees. Employee Stock Ownership Plans (ESOP) and 401(k) plans (see Table 527) are included among defined contribution plans. Data are based on Form 5500 series reports filed with the Internal Revenue Service]

<sup>1</sup> Data for years 1980 and 1985 not comparable with later years. <sup>2</sup> Premium and benefit amounts include estimated payments under insurance policy deductible provisions. Deductible benefits are allocated to private carriers and state funds. <sup>3</sup> Includes federal employer compensation program and that portion of federal black lung benefits program financed from employer contributions. <sup>4</sup> Net cash and medical benefits paid by competitive and exclusive state funds and by federal workers' compensation programs, including black lung benefit program. <sup>5</sup> Cash and medical benefits paid by self-insurers, plus value of medical benefits paid by employers carrying workers' compensation policies that exclude standard medical coverage. <sup>6</sup> Premiums written by private carriers and state funds, and benefits paid by self-insurers increased by 5-10 percent from 1980 to 1990 and by 11 percent for 1994-2000 for administrative costs. Also includes benefits paid and administrative costs of federal system for government employees. <sup>7</sup> Excludes programs financed from general revenue—black lung benefits and supplemental pensions in some states.

# No. 533. Workers' Compensation Payments by State: 1990 to 2000

[In millions of dollars (\$8,238 represents \$8,238,000,000). Calendar-year data, except fiscal-year data for federal civilian and other programs and for some states with state funds. Payments represent compensation and medical benefits and include insurance losses paid by private insurance carriers (compiled from state workers' compensation agencies and A.M. Best Co); disbursements of state funds (compiled from the A.M. Best Co. and state workers' compensation agencies); and self-insurance payments, based on information from the National Association of Insurance Commissioners and the source's estimates. Includes benefit payments under Longshore and Harbor Workers' Compensation Act for states in which such payments are made]

No. 536. Temporary Assistance for Needy Families (TANF)—Families and Recipients: 1980 to 2001

[In thousands (3,712 represents 3,712,000). Average monthly families and recipients for calendar year, except 2001 for Jan.-Sept. period. Prior to TANF, the cash assistance program to families was called Aid to Families with Dependent Children (1980-1996). Under the new welfare law (Personal Responsibility and Work Opportunity Reconciliation Act of 1996), the program became TANF. See text, this section. Includes Puerto Rico, Guam, and Virgin Islands]

No. 540. Child Support Enforcement Program—Caseload and Collections: 1990 to 2001

[For years ending Sept. 30 (12,796 represents 12,796,000). Includes Puerto Rico, Guam and the Virgin Islands. The child support enforcement program locates absent parents, establishes paternity of children born out-of-wedlock, and establishes and enforces support orders. By law, these services are available to all families that need them. The program is operated at the state and local government level but 68 percent of administrative costs are paid by the federal government. Child support collected for families not receiving Temporary Assistance for Needy Families (TANF) goes to the family to help it remain self-sufficient. Most of the child support collected on behalf of TANF families goes to federal and state governments to offset TANF payments. Based on data reported by state agencies. Minus sign (-) indicates net outlay]

No. 541. Federal Food Programs: 1990 to 2001

[20.1 represents 20,100,000. For years ending Sept. 30. Program data include Puerto Rico, Virgin Islands, Guam, American Samoa, Northern Marianas, and the former Trust Territory when a federal food program was operated in these areas. Participation data are average monthly figures except as noted. Participants are not reported for the commodity distribution programs. Cost data are direct federal benefits to recipients; they exclude Federal administrative payments and applicable state and local contributions. Federal costs for commodities and cash-in-lieu of commodities are shown separately from direct cash benefits for those programs receiving both]

1998	8,246	58.3	18.2	24.4	19,969	52.8	8.2
1999	7,670	55.7	20.1	26.5	18,149	51.5	9.4
2000	7,335	53.9	21.0	27.5	17,091	51.3	10.0

<sup>1</sup> Persons 60 years old and over. <sup>2</sup> Beginning 1995, disabled households are defined as households with at least one member under age 65 who received SSI, or at least one member age 18 to 61 who received Social Security, veterans benefits, or other government benefits as a result of a disability. For years prior to 1995, disabled households are defined as households with SSI but no members over age 59. The substantial increase in the percentage of households with a disabled member between 1994 and 1995 is due in part to the change in the definition of disabled households. Using the previous definition, 13.3 percent of households included a disabled person in fiscal year 1995.

No. 544. Food Stamp Households and Participants—Summary: 2000

[For year ending September 30. Based on a sample of 46,963 households from the Food Stamp Quality Control System]

Household type and income source	Households		Age, sex, race, and Hispanic origin	Participants

No. 555. Foundations—Number and Finances: 1980 to 2000

[48.2 represents \$48,200,000,000. Covers nongovernmental nonprofit organizations with funds and programs managed by their own trustees or directors, whose goals were to maintain or aid social, educational, religious, or other activities deemed to serve the common good. Excludes organizations that make general appeals to the public for funds, act as trade associations for industrial or other special groups, or do not currently award grants. Constant dollar figures based on Consumer Price Index, all urban consumers, supplied by US Bureau of Labor Statistics. Minus sign (-) indicates decrease]

## Labor Force, Employment, and Earnings

This section presents statistics on the labor force; its distribution by occupation and industry affiliation; and the supply of, demand for, and conditions of labor. The chief source of these data is the Current Population Survey (CPS) conducted by the U.S. Census Bureau for the Bureau of Labor Statistics (BLS). Comprehensive historical and current data are available from the BLS Internet site <<http://www.bls.gov/cps/home.htm>>. These data are published on a current basis by the BLS monthly publication *Employment and Earnings*. Detailed data on the labor force are also available from the Census Bureau's decennial census of population.

**Types of data**—Most statistics in this section are obtained by two methods: household interviews or questionnaires and reports of establishment payroll records. Each method provides data which the other cannot suitably supply. Population characteristics, for example, are readily obtainable only from the household survey, while detailed industrial classifications can be readily derived only from establishment records.

Household data are obtained from a monthly sample survey of the population. The CPS is used to gather data for the calendar week including the 12th of the month and provides current comprehensive data on the labor force (see text, Section 1, Population). The CPS provides information on the work status of the population without duplication since each person is classified as employed, unemployed, or not in the labor force. Employed persons holding more than one job are counted only once, according to the job at which they worked the most hours during the survey week.

Monthly, quarterly, and annual data from the CPS are published by the Bureau of Labor Statistics in *Employment and Earnings*. Data presented include national totals of the number of persons in the civilian labor force by sex, race, Hispanic

origin, and age; the number employed; hours of work; industry and occupational groups; and the number unemployed, reasons for, and duration of unemployment. Annual data shown in this section are averages of monthly figures for each calendar year, unless otherwise specified.

The CPS also produces annual estimates of employment and unemployment for each state, 50 large metropolitan statistical areas, and selected cities. These estimates are published by BLS in its annual *Geographic Profile of Employment and Unemployment*. More detailed geographic data (e.g., for counties and cities) are provided by the decennial population censuses.

Data based on establishment records are compiled by BLS and cooperating state agencies as part of an ongoing Current Employment Statistics program. Survey data, gathered monthly from a sample of employers through electronic interviewing or mail questionnaires or electronic interviewing, are supplemented by data from other government agencies and adjusted at intervals to data from government social insurance program reports. The estimates exclude self-employed persons, private household workers, unpaid family workers, agricultural workers, and the Armed Forces. In March 2001, reporting establishments employed 6 million manufacturing workers (33 percent of the total manufacturing employment at the time), 18 million workers in private nonmanufacturing industries (19 percent of the total in private nonmanufacturing), and 15 million federal, state, and local government employees (73 percent of total government).

The establishment survey counts workers each time they appear on a payroll during the reference period (as with the CPS, the week including the 12th of the month). Thus, unlike the CPS, a person with two jobs is counted twice. The establishment survey is designed to provide detailed

industry information for the nation, states, and metropolitan areas on non-farm wage and salary employment, average weekly hours, and average hourly and weekly earnings. Establishment survey data also are published in *Employment and Earnings*. Historical national data are available on the site <<http://www.bls.gov/ces/>>. Historical data for states and metropolitan areas are available on the site <<http://www.bls.gov/sae/>>.

In June 2000, BLS began to phase in a comprehensive sample redesign of the establishment survey, changing from a quota sample to a probability-based sample. Probability-based sample estimates for the wholesale trade industry were published at that time. In June 2001, estimates for the mining, construction, and manufacturing industries were published under the new sample design for the first time. In June 2002, estimates for the transportation and public utilities; retail trade; and finance, insurance, and real estate industries were published under the new sample design for the first time. The sample redesign will be completed in June 2003 with the publication of estimates for the services industry under the new design. More information on the sample redesign appears in "BLS Establishment Estimates Revised to Incorporate March 2001 Benchmarks" in the June 2002 issue of *Employment and Earnings*, as well as the Establishment Data portion of the Explanatory Notes and Estimates of Error section of *Employment and Earnings*.

**Labor force**—According to the CPS definitions, the civilian labor force comprises all civilians in the noninstitutional population 16 years and over classified as "employed" or "unemployed" according to the following criteria: Employed civilians comprise (a) all civilians, who, during the reference week, did any work for pay or profit (minimum of an hour's work) or worked 15 hours or more as unpaid workers in a family enterprise and (b) all civilians who were not working but who had jobs or businesses from which they were temporarily absent for noneconomic reasons (illness, weather conditions, vacation, labor-management dispute, etc.) whether they were paid for the time off or

were seeking other jobs. Unemployed persons comprise all civilians who had no employment during the reference week, who made specific efforts to find a job within the previous 4 weeks (such as applying directly to an employer or to a public employment service or checking with friends) and who were available for work during that week, except for temporary illness. Persons on layoff from a job and expecting recall also are classified as unemployed. All other civilian persons, 16 years old and over, are "not in the labor force."

Beginning in 1982, changes in the estimation procedures and the introduction of 1980 census data caused substantial increases in the population and estimates of persons in all labor force categories. Rates on labor force characteristics, however, were essentially unchanged. In order to avoid major breaks in series, some 30,000 labor force series were adjusted back to 1970. The effect of the 1982 revisions on various data series and an explanation of the adjustment procedure used are described in "Revisions in the Current Population Survey in January 1982," in the February 1982 issue of *Employment and Earnings*. The revisions did not, however, smooth out the breaks in series occurring between 1972 and 1979, and data users should make allowances for them in making certain data comparisons.

Beginning in January 1994, several changes were introduced into the CPS that effect all data comparisons with prior years. These changes include the results of a major redesign of the survey questionnaire and collection methodology, revisions to some of the labor force concepts and definitions, and the introduction of 1990 census population controls, adjusted for the estimated undercount. An explanation of the changes and their effects on the labor force data appears in "Revisions in the Current Population Survey Effective January 1994" in the February 1994 issue of *Employment and Earnings*.

Beginning 1996, 1990 census population controls, adjusted for the estimated undercount, were extended back to January 1990. A discussion of the changes and their effects on the labor force data

appears in "Revisions In Household Survey Data Effective February 1996" in the March 1996 issue of *Employment and Earnings*.

Beginning in January 1997, the CPS reflects updated 1990 census-based population controls. The greatest impact of the new population controls was on estimates for persons of Hispanic origin. An explanation of the changes and their effects on labor force estimates appear in "Revisions in the Current Population Survey Effective January 1997" in the February 1997 issue of *Employment and Earnings*.

Beginning in January 1998, the CPS reflects the introduction of new composite estimation procedures and revised 1990 census-based population controls. An explanation of the changes and their effects on labor force estimates appear in "Revisions in the Current Population Survey Effective January 1998" in the February 1998 issue of *Employment and Earnings*.

Beginning in January 1999 and January 2000, the CPS reflects the introduction of revised 1990 census-based population controls that incorporate newly updated information on immigration. An explanation of the changes and their effects on labor force estimates appear in "Revisions in the Current Population Survey Effective January 1999" and "Revisions in the Current Population Survey Effective January 2000" in the February 1999 and February 2000 issues, respectively, of *Employment and Earnings*.

**Hours and earnings**—Average hourly earnings, based on establishment data, are gross earnings (i.e., earnings before payroll deductions) and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those for which pay was received. Wages and salaries from the CPS consist of total monies received for work performed by an employee during the income year. It includes wages, salaries, commissions, tips, piece-rate payments, and cash bonuses earned before deductions were made for taxes, bonds, union dues, etc. Persons who worked 35 hours or more are classified as working full time.

### **Industry and occupational groups—**

Industry data derived from the CPS for 1983-91 utilize the 1980 census industrial classification developed from the 1972 SIC. CPS data from 1971 to 1982 were based on the 1970 census classification system which was developed from the 1967 SIC. Most of the industry categories were not affected by the change in classification.

Establishments responding to the establishment survey are classified according to the *Standard Industrial Classification (SIC) Manual*. Beginning in June 2003, the establishment survey will begin using the 2002 North American Industrial Classification System (NAICS) to classify establishments responding to the survey. See text, Section 15, Business Enterprise, for information about the SIC manual and NAICS.

The occupational classification system used in the 1980 census and in the CPS for 1983-91, evolved from the 1980 Standard Occupational Classification (SOC) system, first introduced in 1977. Occupational categories used in the 1980 census classification system are so radically different from the 1970 census system used in the CPS through 1982, that their implementation represented a break in historical data series. In cases where data have not yet been converted to the 1980 classifications and still reflect the 1970 classifications (e.g., Table 615), comparisons between the two systems should not be made. To help users bridge the data gap, a limited set of estimates was developed for the 1972-82 period based on the new classifications. The estimates were developed by means of applying conversion factors created by double coding a 20-percent sample of CPS occupational records for 6 months during 1981-82. For further details, contact BLS.

Beginning in January 1992, the occupational and industrial classification system used in the 1990 census were introduced into the CPS. (These systems were largely based on the 1980 Standard Occupational Classification and the 1987 Standard Industrial Classification.) There were a few breaks in comparability between the 1980 and 1990 census-based systems, particularly within the "technical, sales, and administrative support" categories.

The most notable changes in industry classification were the shift of several industries from "business services" to "professional services" and the splitting of some industries into smaller, more detailed categories. A number of industry titles were changed as well, with no change in content.

**Productivity**—BLS publishes data on productivity as measured by output per hour (labor productivity), output per combined unit of labor and capital input (multifactor productivity), and, for manufacturing industries, output per combined unit of capital, labor, energy, materials, and purchased service inputs. Labor productivity and related indexes are published for the business sector as a whole and its major subsectors: nonfarm business, manufacturing, and nonfinancial corporations, and for over 450 specific industries. Multifactor productivity and related measures are published for the private business sector and its major subsectors. Productivity indexes which take into account capital, labor, energy, materials, and service inputs are published for the 18 major industry groups which comprise the manufacturing sector, the utility services industry group, for 108 three-digit SIC manufacturing industries, and railroad transportation. The major sector data are published in the BLS quarterly news release, *Productivity and Costs* and in the annual *Multifactor Productivity Trends* release. Industry productivity measures are published annually in the news releases *Productivity and Costs*, *Manufacturing Industries*, and *Productivity and Costs, Services - Producing and Mining Industries*. Detailed information on methods, limitations, and data sources appears in the BLS *Handbook of Methods*, BLS Bulletin 2490 (1997), Chapters 10 and 11.

**Unions**—As defined here, unions include traditional labor unions and employee associations similar to labor unions. Data on union membership status provided by

BLS are for employed wage and salary workers and relate to their principal job. Earnings by union membership status are usual weekly earnings of full-time wage and salary workers. The information is collected through the Current Population Survey. Collective bargaining settlements data are available for bargaining situations involving 1,000 or more workers in private industry and state and local government.

**Work stoppages**—Work stoppages include all strikes and lockouts known to BLS which last for at least 1 full day or shift and involve 1,000 or more workers. All stoppages, whether or not authorized by a union, legal or illegal, are counted. Excluded are work slowdowns and instances where employees report to work late or leave early to attend mass meetings or mass rallies.

**Seasonal adjustment**—Many economic statistics reflect a regularly recurring seasonal movement which can be estimated on the basis of past experience. By eliminating that part of the change which can be ascribed to usual seasonal variation (e.g., climate or school openings and closings), it is possible to observe the cyclical and other nonseasonal movements in the series. However, in evaluating deviations from the seasonal pattern—that is, changes in a seasonally adjusted series—it is important to note that seasonal adjustment is merely an approximation based on past experience. Seasonally adjusted estimates have a broader margin of possible error than the original data on which they are based, since they are subject not only to sampling and other errors, but also are affected by the uncertainties of the adjustment process itself.

**Statistical reliability**—For discussion of statistical collection, estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau and BLS data, see Appendix III.

No. 560. Employment Status of the Civilian Population: 1960 to 2001

[In thousands (117,245 represents 117,245,000), except as indicated. Annual averages of monthly figures. For the civilian noninstitutional population 16 years old and over. Based on Current Population Survey; see text, Section 1, Population, and Appendix III]

No. 561. Civilian Labor Force and Participation Rates, With Projections: 1980 to 2010

[106.9 represents 106,900,000. For civilian noninstitutional population 16 years old and over. Annual averages of monthly figures. Rates are based on annual average civilian noninstitutional population of each specified group and represent proportion of each specified group in the civilian labor force. Based on Current Population Survey; see text, Section 1, Population, and Appendix III]

# No. 601. Nonfarm Establishments—Employees, Hours, and Earnings by Industry: 1980 to 2001

[Annual averages of monthly data (90,406 represents 90,406,000). Based on data from establishment reports. Includes all full- and part-time employees who worked during, or received pay for, any part of the pay period reported. Excludes proprietors, the self-employed, farm workers, unpaid family workers, private household workers, and Armed Forces. Establishment data shown here conform to industry definitions in the 1987 Standard Industrial Classification and are adjusted to March 2000 employment benchmarks, and reflect historical corrections to previously published data. Based on the Current Employment Statistics Program; see Appendix III]

Item and year	Goods producing					Service producing

No. 602. Employees in Nonfarm Establishments—States: 1990 to 2001

[In thousands (109,403 represents 109,403,000). For coverage, see headnote, Table 601. National totals differ from the sum of the state figures because of differing benchmarks among states and differing industrial and geographic stratification. Based on 1987 Standard Industrial Classification Manual, see text, this section]

No. 603. Nonfarm Industries—Employees and Earnings: 1990 to 2001

[Annual averages of monthly figures (109,403 represents 109,403,000). Covers all full- and part-time employees who worked during, or received pay for, any part of the pay period including the 12th of the month. For mining and manufacturing, data refer to production and related workers, for construction, to employees engaged in actual construction work; and for other industries, to nonsupervisory employees and working supervisors. See also headnote, Table 601]

No. 603. Nonfarm Industries—Employees and Earnings: 1990 to 2001—Con.

[Annual averages of monthly figures (109,403 represents 109,403,000). Covers all full- and part-time employees who worked during, or received pay for, any part of the pay period including the 12th of the month. For mining and manufacturing, data refer to production and related workers; for construction, to employees engaged in actual construction work; and for other industries, to nonsupervisory employees and working supervisors. See also headnote, Table 601]

## No. 611. Average Annual Pay by State: 1999 and 2000

[In dollars, except percent change. For workers covered by state unemployment insurance laws and for federal civilian workers covered by unemployment compensation for federal employees, approximately 99 percent of wage and salary civilian employment in 2000. Excludes most agricultural workers on small farms, all Armed Forces, elected officials in most states, railroad employees, most domestic workers, most student workers at school, employees of certain nonprofit organizations, and most self-employed individuals. Pay includes bonuses, cash value of meals and lodging, and tips and other gratuities.]

<sup>1</sup> Arrangements permitting employees to work at home several days of the workweek. <sup>2</sup> A cash payment not directly related to output of the employee or group of employees, such as attendance or profit sharing bonuses. <sup>3</sup> Employers subsidize employees' cost of commuting to and from work via public transportation, company sponsored van pool, discounted subway fares, etc. <sup>4</sup> Under flexible benefit plans, employees are able to create a benefits package from among several options; reimbursement accounts are funded by employee pretax contributions to pay for health care or dependent care benefits; premium conversion plans allow medical plan participants to pay the required plan premium with pretax dollars. <sup>5</sup> Employees are classified as working either a full-time or part-time schedule based on the definition used by each establishment. <sup>6</sup> Union workers are those whose wages are determined through collective bargaining. <sup>7</sup> Includes mining not shown separately. <sup>8</sup> For composition of regions, see map, inside front cover.

No. 623. Industries With the Highest Total Case Incidence Rates for Nonfatal Injuries and Illnesses: 1999 and 2000

[Rates per 100 full-time employees. Industries shown are those with the highest rates for 2000. For nonfarm employment data, see Table 603. Rates refer to any occupational injury or illness resulting in (1) lost workday cases, or (2) nonfatal cases without lost workdays. Incidence rates were calculated as: Number of injuries and illnesses divided by total hours worked by all employees during year multiplied by 200,000 as base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks a year)]

Industry	1987 SIC <sup>1</sup> code			Industry	1987 SIC <sup>1</sup> code

No. 627. Work Stoppages: 1960 to 2001

[896 represents 896,000. Excludes work stoppages involving fewer than 1,000 workers and lasting less than 1 day. Information is based on reports of labor disputes appearing in daily newspapers, trade journals, and other public sources. The parties to the disputes are contacted by telephone, when necessary, to clarify details of the stoppages]

# No. 630. Labor Union Membership by State: 1983 and 2001

[Annual averages of monthly figures (17,717.4 represents 17,717,400). For wage and salary workers in agriculture and non-agriculture. Data represent union members by place of residence. Based on the Current Population Survey and subject to sampling error. For methodological details, see source. The 2001 figures are based on publicly released Current Population Survey files. Figures for 2001 differ slightly from annual figures compiled by the Bureau of Labor Statistics, which are based on nonpublic files that included an experimental sample during January-June 2001]

## Income, Expenditures, and Wealth

This section presents data on gross domestic product (GDP), gross national product (GNP), national and personal income, saving and investment, money income, poverty, and national and personal wealth. The data on income and expenditures measure two aspects of the U.S. economy. One aspect relates to the national income and product accounts (NIPAs), a summation reflecting the entire complex of the nation's economic income and output and the interaction of its major components; the other relates to the distribution of money income to families and individuals or consumer income.

The primary source for data on GDP, GNP, national and personal income, gross saving and investment, and fixed reproducible tangible wealth is the *Survey of Current Business*, published monthly by the Bureau of Economic Analysis (BEA). A comprehensive revision to the NIPAs was released beginning in October 1999. Discussions of the revision appeared in the August, September, October, December 1999, and the April 2000 issues of the *Survey of Current Business*. Summary historical estimates appeared in the August 2000 issue of the *Survey of Current Business*. Detailed historical data will appear in forthcoming *National Income and Product Accounts of the United States, 1929-97* report.

Sources of income distribution data are the decennial censuses of population and the Current Population Survey (CPS), both products of the U.S. Census Bureau (see text, Section 1 and new Section 31). Annual data on income of families, individuals, and households are presented in *Current Population Reports*, *Consumer Income*, P60 Series, in print, and many data series found on the census Web site at <<http://www.census.gov/hhes/www/income.html>>.

Data on individuals' saving and assets are published by the Board of Governors of the Federal Reserve System in the quarterly *Flow of Funds Accounts*. The Board

also periodically conducts the *Survey of Consumer Finances*, which presents financial information on family assets and net worth. Detailed information on personal wealth is published periodically by the Internal Revenue Service (IRS) in *SOI Bulletin*.

**National income and product**—Gross domestic product is the total output of goods and services produced by labor and property located in the United States, valued at market prices. GDP can be viewed in terms of the expenditure categories that comprise its major components—purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. A number of inclusions, however, represent imputed values, the most important of which is rental value of owner-occupied housing. GDP, in this broad context, measures the output attributable to the factors of production located in the United States. Gross state product (GSP) is the gross market value of the goods and services attributable to labor and property located in a state. It is the state counterpart of the nation's gross domestic product.

In January 1996, BEA replaced its fixed-weighted index as the featured measure of real GDP with an index based on chain-type annual weights. Changes in this measure of real output and prices are calculated as the average of changes based on weights for the current and preceding years. (Components of real output are weighted by price, and components of prices are weighted by output.) These annual changes are "chained" (multiplied together to form a time series that allows for the effects of changes in relative prices and changes in the composition of output over time. Quarterly and monthly changes are also based on annual

weights. The new output indexes are expressed as 1996=100, and for recent years, in 1996 dollars; the new price indexes are based to 1996=100.

Chained (1996) dollar estimates of most components of GDP are not published for periods prior to 1987, because during periods far from the base period, the levels of the components may provide misleading information about their contributions to an aggregate. Values are published in index form (1996=100) for 1929 to the present to allow users to calculate the percent changes for all components, changes which are accurate for all periods. In addition, the Bureau of Economic Analysis publishes estimates of the contribution of major components to the percent change in GDP for all periods.

*Gross national product* measures the output attributable to all labor and property supplied by United States residents. GNP differs from "national income" mainly in that GNP includes allowances for depreciation and for indirect business taxes (sales and property taxes); see Table 646.

In December 1991, the Bureau of Economic Analysis began featuring gross domestic product rather than gross national product as the primary measure of U.S. production. GDP is now the standard measure of growth because it is the appropriate measure for much of the short-term monitoring and analysis of the economy. In addition, the use of GDP facilitates comparisons of economic activity in the United States with that in other countries.

*National income* is the aggregate of labor and property earnings which arises in the current production of goods and services. It is the sum of employee compensation, proprietors' income, rental income of persons, corporate profits, and net interest. It measures the total factor costs of the goods and services produced by the economy. Income is measured before deduction of taxes.

*Capital consumption adjustment* for corporations and for nonfarm sole proprietorships and partnerships is the difference between capital consumption based

on income tax returns and capital consumption measured using empirical evidence on prices of used equipment and structures in resale markets, which have shown that depreciation for most types of assets approximates a geometric pattern. The tax return data are valued at historical costs and reflect changes over time in service lives and depreciation patterns as permitted by tax regulations. *Inventory valuation adjustment* represents the difference between the book value of inventories used up in production and the cost of replacing them.

*Personal income* is the current income received by persons from all sources minus their personal contributions for social insurance. Classified as "persons" are individuals (including owners of unincorporated firms), nonprofit institutions that primarily serve individuals, private trust funds, and private noninsured welfare funds. Personal income includes transfers (payments not resulting from current production) from government and business such as social security benefits, public assistance, etc., but excludes transfers among persons. Also included are certain nonmonetary types of income—chiefly estimated net rental value to owner-occupants of their homes and the value of services furnished without payment by financial intermediaries. Capital gains (net losses) are excluded.

*Disposable personal income* is personal income less personal tax and nontax payments. It is the income available to persons for spending or saving. Personal tax and nontax payments are tax payments (net of refunds) by persons (except personal contributions for social insurance) that are not chargeable to business expense and certain personal payments to general government that are treated like taxes. Personal taxes include income, estate and gift, and personal property taxes and motor vehicle licenses. Nontax payments include passport fees, fines and forfeitures, and donations.
